Horstmann, Java Concepts Early Objects, Eighth Edition ,2019-03-07

Big Java Cay S. Horstmann,2016-06-27 With Wiley's Interactive Edition, you get all the benefits of a downloadable, reflowable eBook with added resources to make your study time more effective, including: • Lambda Expressions, Default & Static Method interfaces • Embedded Problem Solving Sections & How-To Guides • Worked Examples & Self-Check Exercises at the end of each chapter • Progressive Figures that trace code segments using color for easy recognition • Linked Programming Tips for programming best practices • Integrated Try-With Resources from Java 7 Cay Horstmann's sixth edition of Big Java: Early Objects, Interactive Edition, 6th Edition provides an approachable introduction to fundamental programming techniques and design skills, helping students master basic concepts and become competent coders. Updates for the Java 8 software release and additional visual design elements make this student-friendly text even more engaging. The text is known for its realistic programming examples, great quantity and variety of homework assignments, and programming exercises that build student problem-solving abilities. This edition now includes problem solving sections, more example code online, and exercise from Science and Business.

Advances in Visual Computing George Bebis,Richard Boyle,Bahram Parvin,Darko Koracin,Ryan McMahan,Jason Jerald,Hui Zhang,Steven Drucker,Kambhamettu Chandra,El Choubassi Maha,Zhigang Deng,Mark Carlson,2014-12-02 The two volume set LNCS 8887 and 8888 constitutes the refereed proceedings of the 10th International Symposium on Visual Computing, ISVC 2014, held in Las Vegas, NV, USA. The 74 revised full papers and 55 poster papers presented together with 39 special track papers were carefully reviewed and selected from more than 280 submissions. The papers are organized in topical sections: Part I (LNCS 8887) comprises computational bioimaging, computer graphics; motion, tracking, feature extraction and matching, segmentation, visualization, mapping, modeling and surface reconstruction, unmanned autonomous systems, medical imaging, tracking for human activity monitoring, intelligent transportation systems, visual perception and robotic systems. Part II (LNCS 8888) comprises topics such as computational bioimaging , recognition, computer vision, applications, face processing and recognition, virtual reality, and the poster sessions.

Brief Java Cay S. Horstmann,2019-04-26 Brief Java: Early Objects, 9th Edition focuses on the essentials of effective learning and is suitable for a two-semester introduction to programming sequence. This text requires no prior programming experience and only a modest amount of high school algebra. Objects and classes from the standard library are used where appropriate in early sections with coverage on object-oriented design starting in Chapter 8. This gradual approach allows students to use objects throughout their study of the core algorithmic topics, without teaching bad habits that must be un-learned later. Choosing the enhanced eText format allows students to develop their coding skills using targeted, progressive interactivities designed to integrate with the eText. All sections include built-in activities, open-ended review exercises, programming exercises, and projects to help students practice programming and build confidence. These activities go far beyond simplistic multiple-choice questions and animations. They have been designed to guide students along a learning path for mastering the complexities of programming. Students demonstrate comprehension of programming structures, then practice programming with simple steps in scaffolded settings, and finally write complete, automatically graded programs. The perpetual access VitalSource Enhanced eText, when integrated with your school's learning management system, provides the capability to monitor student progress in VitalSource SCORECenter and track grades for homework or participation. Enhanced eText and interactive functionality available through select vendors and may require LMS integration approval for SCORECenter.

Hidden Attractions of Administration Malin Åkerström,Katarina Jacobsson,Erika Andersson Cederholm,David Wästerfors,2021-04-21 The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/9781003108436>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This book argues that the expansion of administrative activities in today's working life is driven not only by pressure from above, but also from below. The authors examine the inner dynamics of people-processing organizations—those formally working for clients, patients, or students—to uncover the hidden attractions of doing administrative work, despite all the complaints and laments about too many meetings or too much paperwork. There is something appealing to those compelled to participate in today's constantly multiplying and expanding administration that defies popular framings of it as merely pressure from above. Hidden Attractions of Administration shows in detail the emotional attractiveness, moral conflicts, and almost magical features that administrative tasks often entail in today's organizations, supported by ethnographic studies consisting of over 200 qualitative interviews and participant observations from ten organizational settings and contexts across Sweden. The authors also question and complement explanations in administration-related research that have previously been taken for granted, arguing that it is a simplification to attribute all aspects of the change to New Public Management and instead taking into account what the classic sociologist Georg Simmel called an Eigendynamik: a self-reinforcing tendency that, under certain circumstances, needs only a nudge in an administrative direction to get going. By applying ethnography to issues of bureaucratization and meeting cultures and by drawing on findings in emotional sociology and social anthropology, this volume contributes to both the sociology of work and the study of human service organizations and will appeal to scholars and students working across both areas.

Reinventing the Wheel Bronwen Percival,Francis Percival,2017-09-05 Reinventing the Wheel is equal parts popular science, history, and muckraking. Over the past hundred and fifty years, dairy farming and cheesemaking have been transformed, and this book explores what has been lost along the way. Today, using cutting-edge technologies like high-throughput DNA sequencing, scientists are beginning to understand the techniques of our great-grandparents. The authors describe how geneticists are helping conservationists rescue rare dairy cow breeds on the brink of extinction, microbiologists are teaching cheesemakers to nurture the naturally occurring microbes in their raw milk rather than destroying them, and communities of cheesemakers are producing real cheeses that reunite farming and flavor, rewarding diversity and sustainability at every level.--Provided by publisher.

Leave Only Footprints Conor Knighton,2021-04-06 NEW YORK TIMES BESTSELLER • “A delightful sampler plate of our national parks, written with charisma and erudition.”—Nick Offerman, author of Paddle Your Own Canoe From CBS Sunday Morning correspondent Conor Knighton, a behind-the-scenery look at his year traveling to each of America's National Parks, discovering the most beautiful places and most interesting

people our country has to offer NAMED ONE OF THE BEST BOOKS OF THE YEAR BY OUTSIDE When Conor Knighton set off to explore America's best idea, he worried the whole thing could end up being his worst idea. A broken engagement and a broken heart had left him longing for a change of scenery, but the plan he'd cooked up in response had gone a bit overboard in that department: Over the course of a single year, Knighton would visit every national park in the country, from Acadia to Zion. In *Leave Only Footprints*, Knighton shares informative and entertaining dispatches from what turned out to be the road trip of a lifetime. Whether he's waking up early for a naked scrub in a historic bathhouse in Arkansas or staying up late to stargaze along our loneliest highway in Nevada, Knighton weaves together the type of stories you're not likely to find in any guidebook. Through his unique lens, America the Beautiful becomes America the Captivating, the Hilarious, and the Inspiring. Along the way, he identifies the threads that tie these wildly different places together—and that tie us to nature—and reveals how his trip ended up changing his views on everything from God and love to politics and technology. Filled with fascinating tidbits about our parks' past and reflections on their fragile future, this book is both a celebration of and a passionate case for the natural wonders that all Americans share.

Making Numbers Count Chip Heath, Karla Starr, 2022-01-11 A clear, practical, first-of-its-kind guide to communicating and understanding numbers and data—from bestselling business author Chip Heath. How much bigger is a billion than a million? Well, a million seconds is twelve days. A billion seconds is...thirty-two years. Understanding numbers is essential—but humans aren't built to understand them. Until very recently, most languages had no words for numbers greater than five—anything from six to infinity was known as “lots.” While the numbers in our world have gotten increasingly complex, our brains are stuck in the past. How can we translate millions and billions and milliseconds and nanometers into things we can comprehend and use? Author Chip Heath has excelled at teaching others about making ideas stick and here, in *Making Numbers Count*, he outlines specific principles that reveal how to translate a number into our brain's language. This book is filled with examples of extreme number makeovers, vivid before-and-after examples that take a dry number and present it in a way that people click in and say “Wow, now I get it!” You will learn principles such as: -SIMPLE PERSPECTIVE CUES: researchers at Microsoft found that adding one simple comparison sentence doubled how accurately users estimated statistics like population and area of countries. -VIVIDNESS: get perspective on the size of a nucleus by imagining a bee in a cathedral, or a pea in a racetrack, which are easier to envision than “1/100,000th of the size of an atom.” -CONVERT TO A PROCESS: capitalize on our intuitive sense of time (5 gigabytes of music storage turns into “2 months of commutes, without repeating a song”). -EMOTIONAL MEASURING STICKS: frame the number in a way that people already care about (“that medical protocol would save twice as many women as curing breast cancer”). Whether you're interested in global problems like climate change, running a tech firm or a farm, or just explaining how many Cokes you'd have to drink if you burned calories like a hummingbird, this book will help math-lovers and math-haters alike translate the numbers that animate our world—allowing us to bring more data, more naturally, into decisions in our schools, our workplaces, and our society.

Big Dead Place Nicholas Johnson, 2005-06-01 Johnson's savagely funny [book] is a grunt's-eye view of fear and loathing, arrogance and insanity in a dysfunctional, dystopian closed community. It's like M*A*S*H on ice, a bleak, black comedy.”—The Times of London

Overcoming Body Image Problems including Body Dysmorphic Disorder Alexandra Clarke, David Veale, Rob Willson, 2012-11-01 Many people occasionally suffer from a negative body self-image but, for an increasing number of people, this can turn into a more serious preoccupation. One per cent of the population will develop Body Dysmorphic Disorder (BDD), a condition characterised by severe preoccupation with a perceived physical defect. Body image problems can cause significant distress and can lead to further problems such as anxiety, eating disorders and social phobia. It has long been recognised that negative body image problems are a factor in the onset and maintenance of many eating disorders. However, they can be successfully treated with cognitive behavioral therapy (CBT). Praise for Overcoming Obsessive Compulsive Disorder and the Overcoming series: '[Overcoming Obsessive Compulsive Disorder] is an affordable and highly recommended read.' The Psychologist 'The best consumer-friendly CBT-based books...All are very thorough.' Observer

Sacred Cyberspaces Oren Golan, Michele Martini, 2022-11-15 In recent years every major institution has had to adapt to the fast-evolving technologies of the digital age or risk being left behind. Amid a global crisis of faith and declining levels of religious participation in places around the world, the Catholic Church has likewise come face to face with the challenges and possibilities of new media. *Sacred Cyberspaces* reveals how long-standing conflicts over power, influence, and legitimacy within religious organizations are being waged in the digital realm. Oren Golan and Michele Martini describe the tensions that arise as religious groups seek to reach the faithful in online spaces where traditional clerical authorities have less expertise and control. Focusing on the Catholic world, they examine the rise of devotional digital entrepreneurship and the roles of lay religious webmasters: the video makers, app developers, and web designers who devote their lives to evangelization and who literally run the show. The book also explores the nature of religious experience as it pivots to online platforms: cyberculture, prayer, ceremonies, pilgrimage, proselytization, and the relation to the transcendental. From live-streaming at world-famous sites in the Holy Land to the Instagram feed of Pope Francis, *Sacred Cyberspaces* evaluates the contemporary media strategies of the Catholic Church and sheds light on the future of religion online.

Watch This, Listen Up, Click Here David Verklin, Bernice Kanner, 2007-04-20 A media and advertising CEO explains how his world shapes ours The TV program coming into our living rooms isn't free. It's a simple Faustian bargain consumers have made but one with enormous implications. It means that David Verklin, CEO of one of the world's largest ad-buying companies, and his clients-the world's largest advertisers-control what TV programs get aired, what magazines get published, and how Google and Yahoo stay in (very healthy) business. In *Watch This, Listen Up, Click Here*, Verklin and Kanner expose the inner workings of the media, marketing, and advertising industries. Readers will learn why their favorite shows get cancelled, why Oprah gives away cars, and how money, people, politics, and new technologies are transforming TV, the Internet, radio, magazines, and other media Americans consume every day. David Verklin (New York, NY) is CEO of Carat Americas, the world's largest independent media buying operation. He frequently speaks to executives in marketing, media, and management. Bernice Kanner (d. 2006) was a marketing expert and author for 13 years of New York magazine's On Madison Avenue column.

Overcoming Health Anxiety David Veale, Rob Willson, 2009-11-26 Stop worrying about your health and enjoy life. Many of us have a tendency to worry unnecessarily about our health. This can be worse in a time of global panic about pandemics. For some, the anxiety becomes chronic, and they may spend many hours checking for symptoms, seeking reassurance from others, surfing the internet for information about different diseases, or repeatedly visiting the doctor. It is distressing for them and for everyone around them. In fact, health anxiety can be very successfully treated with cognitive behavioural therapy - the approach taken in this self-help guide. Using a structured, step-by-step approach, the authors explain how the problem develops, how to recognise what feeds it and how to develop effective methods of dealing with it. - Includes questionnaires, case studies and exercises - Based on proven CBT techniques - Includes a chapter on fear of death and fear of vomiting

Practical Evaluation Techniques for Librarians Rachel Applegate,2013-08-15 Evaluation is essential to library management: it provides the data that underlies informed and effective decision-making. This book is a one-volume, how-to guide to library evaluation techniques, planning, and reporting. Library professionals—regardless of whether they operate in a school, public, or academic library setting—need to have effective evaluation skills in order to be accountable to stakeholders and to effect informed improvement. Practical Evaluation Techniques for Librarians provides information and guidance that is highly useful and accessible for all librarians looking to intelligently manage the strengths and weaknesses of their library as well as communicate its value to its stakeholders. Rather than focusing on data-gathering methods appropriate for researchers, the book concentrates on data collection at the local level that enables informed managerial decision-making. It describes and compares techniques that can be used with any level or type of resource—staffing, software, and expertise, for example—in any size library. Author Rachel Applegate makes it clear that accountability is everywhere and imperative, and any librarian can learn the simple techniques to benefit from evaluation.
