Networking for People Who Hate Networking Devora Zack,2019-05-21 Would you rather get a root canal than face a group of strangers? Does the phrase "working a room" make you want to retreat to yours? Devora Zack, an avowed introvert and successful consultant who gives presentations to thousands of people at dozens of events annually, feels your pain. She found that other networking books assume that to succeed, you have to act like an extrovert. Not at all. There is another way. Zack politely examines and then smashes to tiny fragments the "dusty old rules" of standard networking advice. She shows how the very traits that make many people hate networking can be harnessed to forge an approach more effective and user-friendly than traditional techniques. This edition adds new material on applying networking principles in personal situations, handling interview questions, following up—what do you do with all those business cards?—and more. Networking enables you to accomplish the goals that are most important to you. But you can't adopt a style that goes against who you are—and you don't have to. As Zack writes, "You do not succeed by denying your natural temperament; you succeed by working with your strengths."

The Potential of Community Sport for Social Inclusion Hebe Schaillée, Reinhard Haudenhuyse, Lieve Bradt, 2022-05-11 Social inclusion is a pressing issue confronting all levels of sport today, and community sport in particular. Sport is being promoted as an inclusive environment in which people of all backgrounds and abilities can participate and access a range of social and health benefits. Moreover, sport is often heralded as a vehicle for promoting social inclusion in other societal domains. Yet, the policy ideal of 'sport for all' is not always realised in practice, and community sport continues to be plagued by various forms of discrimination and social exclusion. This book brings together a team of scholars from across the globe whose research addresses the complex relationship between community sport and social inclusion. Their contributions critically examine the dynamics of inclusion/exclusion in community sport, as well as the broader outcomes and impacts that sports programmes may have in promoting, or hindering, social inclusion in other areas of life, such as employment, education and migrant integration. This book will be of interest to academics, researchers, and advanced students of sport, sociology, politics, social work and public policy. The chapters in this book were originally published as a special issue of *Sport in Society*.

Hazards and Monitoring of Volcanic Activity 2 Jean-François Lénat,2022-09-09 The impact of natural disasters has become an important and ever-growing preoccupation for modern societies. Volcanic eruptions are particularly feared due to their devastating local, regional or global effects. Relevant scientific expertise that aims to evaluate the hazards of volcanic activity and monitor and predict eruptions has progressively developed since the start of the 20th century. The further development of fundamental knowledge and technological advances over this period have allowed scientific capabilities in this field to evolve. *Hazards and Monitoring of Volcanic Activity* groups a number of available techniques and approaches to render them easily accessible to teachers, researchers and students. This volume sets out different surveillance methods, starting with those most frequently used: seismic surveillance and deformation. It then examines surveillance by remote sensing from ground, air and space, methods that exemplify one of the most spectacular advances in this field in recent times.

God's Agents Matthew Engelke,2013-09-27 The British and Foreign Bible Society is one of the most illustrious Christian charities in the United Kingdom. Founded by evangelicals in the early nineteenth century and inspired by developments in printing technology, its goal has always been to make Bibles universally available. Over the past several decades, though, Bible Society has faced a

radically different world, especially in its work in England. Where the Society once had a grateful and engaged reading public, it now faces apathy—even antipathy—for its cause. These days, it seems, no one in England wants a Bible, and no one wants other people telling them they should: religion is supposed to be a private matter. Undeterred, these Christians attempt to spark a renewed interest in the Word of God. They’ve turned away from publishing and toward publicity to make the Bible heard. *God’s Agents* is a study of how religion goes public in today’s world. Based on over three years of anthropological research, Matthew Engelke traces how a small group of socially committed Christians tackle the challenge of publicity within what they understand to be a largely secular culture. In the process of telling their story, he offers an insightful new way to think about the relationships between secular and religious formations: our current understanding of religion needs to be complemented by greater attention to the process of generating publicity. Engelke argues that we are witnessing the dynamics of religious publicity, which allows us to see the ways in which conceptual divides such as public/private, religious/secular, and faith/knowledge are challenged and redefined by social actors on the ground.

When the Center Is on Fire Diane Harriford, Becky Thompson, 2009-02-17 In this lively and provocative book, two feminist public sociologists turn to classical social thinkers—W. E. B. Du Bois, Max Weber, Karl Marx, and Émile Durkheim—to understand a series of twenty-first century social traumas, including the massacre at Columbine High School, the 9/11 attacks, the torture at Abu Ghraib prison, and Hurricane Katrina. Each event was overwhelming in its own right, while the relentless pace at which they occurred made it nearly impossible to absorb and interpret them in any but the most superficial ways. Yet, each uncovered social problems that cry out for our understanding and remediation. In *When the Center Is on Fire*, Becky Thompson and Diane Harriford assert that classical social theorists grappled with the human condition in ways that remain profoundly relevant. They show, for example, that the loss of double consciousness that Du Bois identified in African Americans enabled political elites to turn a blind eye to the poverty and vulnerability of many of New Orleans’s citizens. The authors’ compelling, sometimes irreverent, often searing interpretations make this book essential reading for students, activists, generations X, Y, and Z, and everybody bored by the 6 o’clock news.
