Maker Literacy Lynn Pawloski,Cindy Wall,2016-11-07 This book takes the creativity and inventiveness of the maker movement and applies that energy in a new way to help children learn across all subject areas as well as broaden their world view. Traditional library literacy programs have helped many children foster a love of reading, but to prepare this next generation of learners, this programming needs to be modified to include technology. The inherent creativity and inventiveness of the Maker Movement, embracing both classic and innovative technological activities, provides the perfect bridge to invigorate, expand, and update these programs. This alternative to conventional library literacy programming will help children learn throughout all subject areas, see additional possibilities, and make connections in the world around them. With this guide, readers can discover how to apply maker literacy to introduce connections that help children better understand that their experiences in life are interrelated—that art can be made on a 3D printer and that science and technology are an essential part of design. This holistic approach provides a myriad of creative opportunities for both teaching staff and the children they serve. A great resource for youth services librarians in public libraries, this guide to infusing library programs with technology and maker activities to motivate learning will also appeal to preschool and elementary librarians, educators, and parents.

New Passages Gail Sheehy,2011-09-28 THE #1 NEW YORK TIMES BESTSELLER Millions of readers literally defined their lives through Gail Sheehy's landmark bestseller Passages. Seven years ago she set out to write a sequel, but instead she discovered a historic revolution in the adult life cycle. . . People are taking longer to grow up and much longer to die. A fifty-year-old woman--who remains free of cancer and heart disease-- can expect to see her ninety-second birthday. Men, too, can expect a dramatically lengthened life span. The old demarcations and descriptions of adulthood--beginning at twenty-one and ending at sixty-five--are hopelessly out of date. In New Passages, Gail Sheehy discovers and maps out a completely new frontier--a Second Adulthood in middle life. Stop and recalculate, Sheehy writes. Imagine the day you turn forty-five as the infancy of another life. Instead of declining, men and women who embrace a Second Adulthood are progressing through entirely new passages into lives of deeper meaning, renewed playfulness, and creativity--beyond both male and female menopause. Through hundreds of personal and group interviews, national surveys of professionals and working-class people, and fresh findings extracted from fifty years of U.S. Census reports, Sheehy vividly dramatizes these newly developing stages. Combining the scholar's ability to synthesize data with the novelist's gift for storytelling, she allows us to make sense of our own lives by understanding others like us. New Passages tells us we have the ability to customize our own life cycle. This groundbreaking work is certain to awaken and permanently alter the way we think about ourselves. SHEEHY CLEARLY STATES IDEAS ABOUT LIFE THAT HAVE NEVER BEFORE BEEN AS CLEARLY STATED. --Los Angeles Times Book Review AN OPTIMISTIC ANALYSIS OF ADULT DEVELOPMENT IN PESSIMISTIC TIMES. . . It is grounded in the economic and psychological realities that make adult life so complex today. --The New York Times Book Review

Treatment of Neurodevelopmental Disorders Randi Jenssen Hagerman,Robert L. Hendren,2014 This cutting-edge book brings advances in genetics, neurobiology, and psychopharmacology to the clinic to enhance treatment for neurodevelopmental disorders. Significant progress has been made in

identifying the neurobiological mechanisms of several disorders and targeted treatments are modifying the outcome of these disorders. However, the ability to utilize this knowledge has not been summarized in one place for the practicing clinician. This book will fill that gap by providing the theoretical underpinnings and the latest advances in targeted treatments. Several neurodevelopmental disorders are reviewed in detail including clinical features and behavioral phenotypes, standard treatments and new targeted treatments based on the latest advances in neurobiology and the animal model studies that have led to new treatments. The disorders covered include psychiatric disorders: schizophrenia, depression, autism and ADHD; single gene disorders including Tuberous Sclerosis, Fragile X Syndrome and fragile X-associated disorders, Angelman Syndrome, PKU, and Muscular Dystrophies; and complex genetic disorders such as Down syndrome. This book also highlights the commonalities across disorders and new genetic and molecular concepts in an easy to read format. This is a very exciting time for new targeted treatments and this volume is a landmark treatise on this new age of treatment.

How to Talk with Your Doctor Ronald L. Hoffman, M.D., Sidney Stevens, 2010-10-15 Now more than ever patients are taking control of their own health care, leaving many conventional physicians unsure about their role as dispensers of medical knowledge. More waiting rooms are now filled with highly informed medical consumers seeking to partner with their doctors. They want to explore all promising treatments, both mainstream and alternative, and connect emotionally. To physicians, these patients seem needy and demanding. They expect a lot of attention, but are all too quick to question authority and battle doctors for control of medical care. To patients, though, such physicians come off as distant and stodgy, even arrogant. Many walk away entirely from mainstream medicine seeking a better partnership or they neglect to mention the alternative treatments they're using for fear of disapproval. Less assertive patients simply clam up - put off by doctors' increasingly brusque bedside manner and shorthand use of medical jargon. The unfortunate result in each case is the same: miscommunication and missed opportunities. Patients fail to receive the best care available to them, and doctor-patient relationships fall far short of the caring and mutually satisfying exchanges they should be. *How to Talk with Your Doctor* is a book for patients and doctors alike. It arms patients with the tools and knowledge they need to communicate better with physicians about using the best high-tech and alternative treatments while also helping doctors balance their skepticism of complementary and alternative approaches with open-mindedness.

Green Obsession Stefano Boeri Architetti, 2021-12-09 *Green Obsession* traces the long path that architect Stefano Boeri and his studio - Stefano Boeri Architetti - have followed in the last fifteen years of practice, aiming at the redefinition of the relationship between city and nature. The book follows a discursive thread, alternating dialogues and scientific essays by some of the main protagonists who have contributed to widening the perspective on this subject, helping to raise awareness while protecting the world and its biodiversity. Cities have contributed for centuries to the promotion of some of humanity's greatest ideas, we must now urgently include them as among the principal players in the environmental debate and at the forefront of any policy tackling and countering - possibly reversing - climate change. Nevertheless, even today one of the most significant technologies capable of absorbing CO₂ and restoring our environment is photosynthesis. Planting trees, in addition to protecting existing natural areas and biodiversity, together with de-carbonization, renewable energies, digitalization, smart mobility and the circular economy could be the set of strategies necessary to tackle climate change. Today the effects of the Anthropocene age are ever more visible, changing our environment and affecting every species that lives within it. *Green Obsession* offers a path to be taken, a hard but still necessary paradigm shift - even for architecture and urbanism - that aims to give a voice to this much needed ecological transition. This book aims to unveil the processes and the complexity involved in the search for a new kind of urbanism, while raising questions and opening old wounds related to the relationship between the human species and Nature and finally putting these fragments together to create a portrait of our era. We need to conceive cities as new green catalysts. Now more than

ever, it is essential to act together as separate individuals and professionals, joining the cause as members of the global community with a shared environmental strategy. We all have to open the era of a new alliance between Nature and City. With Contributions from Emanuele Coccia, Jane Goodall, Paul Hawken, Cecil Konijnendijk, David Miller, Harini Nagendra, Giuseppe Sala and Giorgio Vacchiano.

The Real Drama-Incredible Medicine Pepi Granat, M D, 2021-07-22 Pepi Granat began a journey to aid her fellow human at a time when women were not encouraged to pursue professional careers of their own. Neither this nor anything else-including raising three children-could keep Dr. Granat from realizing her goal: to bring healing and comfort to those who need it. Why do you want to be around sickness and death? her grandmother once asked. Do something where you can laugh and be happy. But sickness and death will still be there, even if I can't see them, she replied. Knowing they're there and not doing anything about it, I can't laugh or be happy, either. In *The Real Drama: Incredible Medicine*, Pepi Granat, MD, recounts stories from a remarkable career filled with great achievements and joy-and no small measure of sacrifice or suffering. The details of her extensive activism, her cogent analysis of the current state of medicine (and creative solutions for improving it in a sustainable manner) are thoughtfully laid out with her characteristic warmth and accessible style.

I Belong to Vienna Anna Goldenberg, 2020-06-09 A memoir of family history, personal identity, and WWII Vienna—a “well-researched, intimate, evocative look at some of the 20th century’s foulest days” (Kirkus). In autumn 1942, Anna Goldenberg’s great-grandparents and one of their sons are deported to the Theresienstadt concentration camp. Hans, their elder son, survives by hiding in an apartment in the middle of Nazi-controlled Vienna. But this is no Anne Frank-like existence; teenage Hans passes time in the municipal library and buys standing room tickets to the Vienna State Opera. He never sees his family again. Goldenberg reconstructs this unique story in magnificent reportage. She also portrays Vienna’s undying allure. Although they tried living in the United States after World War Two, both grandparents eventually returned to the Austrian capital. The author, too, has returned to her native Vienna after living in New York herself, and her fierce attachment to her birthplace enlivens her engrossing biographical history. *I Belong to Vienna* is a probing tale of heroism and resilience marked by a surprising freshness as a new generation comes to terms with history’s darkest era.
