*Care Planning in Children and Young People's Nursing* Doris Corkin, Sonya Clarke, Lorna Liggett, 2011-11-07

Care Planning in Children and Young People's Nursing addresses a selection of the most common concerns that arise when planning care for infants, children and young people within the hospital and community setting. Clear and detailed, this text reflects both the uniqueness and diversity of contemporary children's nursing and utilizes images and case studies to provide a holistic insight into the practice of care planning through the reporting of best available evidence and current research, policy and education. Divided into sections for ease of reference, Care Planning in Children and Young People's Nursing explores both the theory and practice of care planning. Chapters on the principles of care planning include issues such as managing risk, safeguarding children, ethical and legal implications, integrated care pathways, interprofessional assessment, and invaluable parent perspectives. Additional chapters on the application of planning care examine the practical aspects of a wide range of specific conditions including cystic fibrosis, obesity, cardiac/renal failure and HIV/AIDS. Each chapter is interactive, with questions, learning activities and points for discussion creating an engaging and enquiry-based learning approach. Care Planning in Children and Young People's Nursing is a definitive resource, reflecting innovative practice which is suitable for undergraduate and postgraduate nurse education.

Strategic Planning for Public Managers James L. Mercer, 1991-05-09 Designed for local government managers and administrators, this pioneering work offers a clear and comprehensive guide to the use of strategic planning techniques in the public sector. The author presents a concise overview of the strategic planning process, defines the terms involved, and provides a step-by-step methodology for organizations ready to move into the actual implementation of strategic planning. In addition to differentiating between community-based, corporate, functional, and defined-purpose strategic planning processes, Mercer explains the delineation between strategic and tactical planning and offers practical approaches to overcoming barriers to the use of strategic planning in the public sector arena. Throughout, the author makes extensive use of case studies of strategic planning programs implemented by a variety of local government and public sector organizations. Mercer begins by describing how strategic planning can be both an effective tool for dealing with change and a technique of organizational development. He goes on to provide detailed instructions on how to prepare to conduct strategic planning, how to determine strategic issues, the importance of a values audit, and how to develop an environmental scan or assessment. Subsequent chapters address determining organizational threats and opportunities, composing the mission statement, defining critical success factors and

indicators, planning strategies, and assessing strategic risks and benefits. Finally, the author shows how to perform an internal assessment of ability to actually adopt and carry out strategies, the importance of contingency planning, and how to tie strategic planning to the budget and evaluate the process. The public sector manager experienced with strategic planning techniques can use the guide as a handy reference to particular aspects of the process, while those new to strategic planning will find this an indispensable aid in developing and implementing their own internal strategic planning processes.

*Chronology of the Hebrew Bible* Robert P. Killian,2012-08-10 Mr. Robert Paul Killians avid interest in biblical chronology has a history of over seventy years. The Killian family had visited the Natural History Museum and the La Brea Tar Pit in the Los Angeles area before his seventh birthday in June of 1939. Later, when the Killian family moved from Los Angeles to Grants Pass, Oregon, in early 1945, Bob continued to indulge his curiosity in the study of the biblical stories. He had enlisted in the US Navy Reserve during his last year at Grants Pass High School, graduating with the Class of 50. He then volunteered for two years active duty in the US Navy in late summer of 1951 to serve in the Korean Conflict. When that war ended in June of 1953, he was honorably discharged and chose to serve with the Grants Pass Naval Reserve Program for a total of eight years. That choice resulted in his being awarded a second honorable discharge from the US Naval Reserve in 1958.

**Ways of Residing in Transformation** Sten Gromark, Mervi Ilmonen, Katrin Paadam, Eli Støa, 2017-05-15  
Profound transformations in residential practices are emerging in Europe as well as throughout the urban world. They can be observed in the unfolding diversity of residential architecture and spatially restructured cities. The complexity of urban and societal processes behind these changes requires new research approaches in order to fully grasp the significant changes in citizens lifestyles, their residential preferences, capacities and future opportunities for implementing resilient residential practices. The international case studies in this book examine why ways of residing have changed as well as the meaning and the significance of the social, economic, political, cultural and symbolic contexts. The volume brings together an interdisciplinary range of perspectives to reflect specifically upon the dynamic exchange between evolving ways of residing and professional practices in the fields of architecture and design, planning, policy-making, facilities management, property and market. In doing so, it provides a resourceful basis for further inquiries seeking an understanding of ways of residing in transformation as a reflection of diversifying residential cultures. This book will offer insights of interest to academics, policy-makers and professionals as well as students of urban studies, sociology, architecture, housing, planning, business and economics,

engineering and facilities management.

**Studies in Manpower Planning** Abraham Charnes, William Wager Cooper, Richard J. Niehaus, 1973

Planning Policy Richard Harwood KC, Victoria Hutton, 2018-02-01 The making of planning policy is a major political and legal issue and there is currently a considerable focus by the government in England, Wales and Northern Ireland on local plan policy making. The current climate is characterised by government concern at the slow pace of local plan adoption in England, the controversial introduction of neighbourhood planning, new strategic planning tools with the Planning (Wales) Act 2015 and local development plans in Northern Ireland. Planning Policy is the only book dedicated to planning policy, both national and local and includes coverage of the Housing and Planning Act 2016. It covers the policy framework within which planning decisions are taken. It addresses how national and local policy is formulated, examined and challenged.

**Astronomy of the Inca Empire** Steven R. Gullberg, 2020-08-06 Astronomy in the Inca Empire was a robust and fundamental practice. The subsequent Spanish conquest of the Andes region disrupted much of this indigenous culture and resulted in a significant loss of information about its rich history. Through modern archaeoastronomy, this book helps recover and interpret some of these elements of Inca civilization. Astronomy was intricately woven into the very fabric of Andean existence and daily life. Accordingly, the text takes a

holistic approach to its research, considering first and foremost the cultural context of each astronomy-related site. The chapters necessarily start with a history of the Incas from the beginning of their empire through the completion of the conquest by Spain before diving into an astronomical and cultural analysis of many of the huacas found in the heart of the Inca Empire. Over 300 color images—original artwork and many photos captured during the author’s extensive field research in Machu Picchu, the Sacred Valley, Cusco, and elsewhere—are included throughout the book, adding visual insight to a rigorous examination of Inca astronomical sites and history.

*Shaping the Metropolis* Zack Taylor, 2019-05-23 Rising income inequality and concentrated poverty threaten the social sustainability of North American cities. Suburban growth endangers sensitive ecosystems, water supplies, and food security. Existing urban infrastructure is crumbling while governments struggle to pay for new and expanded services. Can our inherited urban governance institutions and policies effectively respond to these problems? In *Shaping the Metropolis* Zack Taylor compares the historical development of American and Canadian urban governance, both at the national level and through specific metropolitan case studies. Examining Minneapolis–St Paul and Portland, Oregon, in the United States, and Toronto and Vancouver in Canada, Taylor shows how differences in the structure of governing institutions in American states and Canadian provinces cumulatively produced different forms of urban governance. Arguing that since the nineteenth century American state governments have responded less effectively to rapid urban growth than Canadian provinces, he shows that the concentration of authority in Canadian provincial governments enabled the rapid adoption of coherent urban policies after the Second World War, while dispersed authority in American state governments fostered indecision and catered to parochial interests. Most contemporary policy problems and their solutions are to be found in cities. *Shaping the Metropolis* shows that urban governance encompasses far more than local government, and that states and provinces have always played a central role in responding to urban policy challenges and will continue to do so in

the future.

**A History of Family Planning in Twentieth-Century Peru** Raúl Necochea López, 2014-10-15 Adding to the burgeoning study of medicine and science in Latin America, this important book offers a comprehensive historical perspective on the highly contentious issues of sexual and reproductive health in an important Andean nation. Raul Necochea Lopez approaches family planning as a historical phenomenon layered with medical, social, economic, and moral implications. At stake in this complex mix were new notions of individual autonomy, the future of gender relations, and national prosperity. The implementation of Peru's first family planning programs led to a rapid professionalization of fertility control. Complicating the evolution of associated medical services were the conflicting agendas of ordinary citizens, power brokers from governmental and military sectors, clergy, and international health groups. While family planning promised a greater degree of control over individuals' intimate lives, as well as opportunities for economic improvement through the effective management of birth rates, the success of attempts to regulate fertility was far from assured. Today, Necochea Lopez observes, although the quality of family planning resources in Peru has improved, services remain far from equitably available.
