Mapping American Criminal Law Paul H. Robinson, Tyler Scot Williams, 2018-06-15 Containing 40 visually coded maps of the fifty states, this book offers an unprecedented look at America's diverse legal landscape. This first-of-its-kind volume sketches the diversity implicit in United States criminal law doctrine through its examination of a range of criminal laws pertaining to murder, sexual assault, drug offenses, the insanity defense, and more and the way in which different states deal with those issues. In addition to providing insights into the most widely invoked standards in criminal law, it raises awareness of the enormous discrepancies among the criminal laws of states, documenting them using dozens of visually coded maps that showcase geographic, political, and socioeconomic differences to explain patterns of agreement and disagreement. *Mapping American Criminal Law: Variations Across the 50 States* is for political scientists, criminologists, sociologists, legal scholars, policy advisors, legislators, lawyers, judges, and scholars and students of these fields. In addition, each chapter is highly accessible to laypersons and includes an explanation of the subject matter as well as explanations of the various approaches to criminal law taken by states.

Process Mapping, Process Improvement, and Process Management Dan Madison, 2005 At last, a simple, well-written survey of process redesign that will help you transform your organization into a world-class competitor.

Author Dan Madison explains the evolution of work management styles, from traditional to process-focused, and introduces the tools of process mapping, the roles and responsibilities of everyone in the organization, and a logical ten-step redesign methodology. Thirty-eight design principles allow readers to custom-fit the methodology to the particular challenges within their own organizations. Additional chapters by guest writers Jerry Talley, Ph.D., and Vic Walling, Ph.D., discuss cross-department process management and using computer simulation in redesign, respectively. (Publisher)

This third edition focuses on new developments in the field, such as mapping of complex arrhythmias, stereotaxis, and image integration. Mapping the Total Value Stream Mark A. Nash, Sheila R. Poling, 2011-03-23 Mapping the Total Value Stream defines and elaborates on the concepts of value stream mapping (VSM) for both production and transactional processes. This book reshapes and extends the lessons originally put forward in a number of pioneering works including the popular ,Value Stream Management for the Lean Office. It reinforces fundamental concepts and theoretical models with real-world applications and complete examples of the value stream mapping technique. To educate VSM mappers on the specific mechanics of the technique, the text provides in-depth explanations for commonly encountered situations. The authors also provide a more complete perspective on the concept of availability. While they discuss availability of equipment in transactional processes, they extend the concept by elaborating on availability as it applies to employees. The calculation of process lead time for work queues is taken to an advanced level – not only is the calculation of this lead time explained, but the text also covers the very real possibility of having more work in the queue than available time. While previous books have focused on only production process VSM or transactional process VSM, this work meets the real needs of both manufacturers and service sector organizations by dealing with both types. It goes beyond explaining each scenario, to teach readers what techniques are commonly applicable to both, and also explains areas of difference so that mappers will be able to readily adapt to whatever unique situations present themselves.

Mapping Chinese Rangoon Jayde Lin Roberts, 2016-08-25 Mapping Chinese Rangoon is both an intimate exploration of the Sino-Burmese, people of Chinese descent who identify with and choose to remain in Burma/Myanmar, and an illumination of twenty-first-century Burma during its emergence from decades of military-imposed isolation. This spatial ethnography examines how the Sino-Burmese have lived in between states, cognizant of the insecurity in their unclear political status but aware of the social and economic possibilities in this gray zone between two oppressive regimes. For the Sino-Burmese in Rangoon, the labels of Chinese and Tayout (the Burmese equivalent of Chinese) fail to recognize the linguistic and cultural differences between the separate groups that have settled in the city—Hokkien, Cantonese, and Hakka—and conflate this diverse population with the state actions of the People's Republic of China and the supposed dominance of the overseas Chinese network. In this first English-language study of the Sino-Burmese, Mapping Chinese Rangoon examines the concepts of ethnicity, territory, and nation in an area where ethnicity is inextricably tied to state violence.
