The workshop committee accepted three workshops for publication in this volume: 1st International Workshop on the Web of Things for Humans (WoT4H 2020), 2nd Semantics and the Web for Transport workshop (Sem4Tra 2020), and 6th International Workshop on Knowledge Discovery on the Web (KDWEB 2020). *The conference was held virtually due to the COVID-19 pandemic.

Legal Knowledge and Information Systems E. Francesconi, G. Borges, C. Sorge, 2022-12-21 In recent years, interest within the research community and the legal industry regarding technological advances in legal knowledge representation and processing has been growing. This relates to areas such as computational models of legal reasoning, cybersecurity, privacy, trust and blockchain methods, among other things. This book presents the proceedings of JURIX 2022, the 35th International Conference on Legal Knowledge and Information Systems, held from 14 –16 December in Saarbrücken, Germany, under the auspices of the Dutch Foundation for Legal Knowledge Based Systems and hosted by Saarland University. The annual JURIX conference has become an international forum for academics and professionals to exchange knowledge and experiences at the intersection of law and artificial intelligence (AI). For this edition, 62 submissions were received from 163 authors in 24 countries. Following a rigorous review process, carried out by a programme committee of 72 experts recognised in the field, 14 submissions were selected for publication as long papers, 22 as short papers and 5 as demo papers, making a total of 41 papers altogether and representing a 22.5% acceptance rate for long papers (66.1% overall). The broad array of topics covered includes argumentation and legal reasoning, legal ontologies and the semantic web, machine and deep learning and natural language processing for legal knowledge extraction, as well as argument mining, translation of legal texts, defeasible logic, legal compliance, explainable AI, alternative dispute resolution, legal drafting and smart contracts. Providing an overview of recent advances, the book will be of interest to all those working at the interface between the law and AI.

iPod: The Missing Manual J.D. Biersdorfer, David Pogue, 2011-12-14 Apple continues to set the bar for portable media players, but iPods still don't come with a guide to their impressive features. This full-color Missing Manual shows you how to play music, videos, and slideshows, shop the iTunes store, and create and manage your media library. It's the most comprehensive (and popular) iPod book available. The important stuff you need to know: Fill it up. Load your iPod with music, photos, movies, TV shows, games, and eBooks. Tune into iTunes. Download media from the iTunes store, rip your CDs, and organize your entire media collection. Tackle the Touch. Use the Touch to shoot photos and video, send and receive email and text messages, and make video calls to other iOS 5 gadgets. Go wireless. Sync your content and surf the Web over the air, using the Touch's new iOS 5 software. Get moving with the Nano. Track your workouts with the built-in Nike+ sensor; dial in FM radio; and even create slideshows. Master the Shuffle and Classic. Get your Shuffle talking with VoiceOver, and play music, video, and slideshows on your Classic.

A second is to assist those involved in such issues to make decisions in the context of possible future development scenarios.

Earthlink: Impact Sarah Barnard, 2012-01-26 Earthlink: Impact is a short novella, at only approx 20,000 words, a quick read. Sci fi, with a troubled teenager, aliens and spaceships. What if they are up there, monitoring us, and the planet? What if the planet has grown, developed, become conscious in some way? What if just one person could hear that consciousness in pain? What if that one person had just crashed a stolen car after a night of drink and drugs? Sage is eighteen years old and, ever since she can remember, there's been a voice in her head. She'll tell you that she doesn't hear voices, they don't tell her to do anything. It's just a single voice, and it doesn't speak, it screams. She hears an unending scream as if the voice is someone in constant agonising pain. She's been told she's hallucinating. She's spent time in psychiatric care and on strong drugs that cut her off from her feelings, and she hates all of it. But she's not hallucinating, the voice is all too real and Sage has been watched for years in the hope that she's not the only one who can hear. When Sage puts her life in danger, and it's clear that she is unique, intervention is necessary.

Information 2.0 Martin De Saulles,2015-04-30 This textbook provides an overview of the digital information landscape and explains the implications of the technological changes for the information industry, from publishers and broadcasters to the information professionals who manage information in all its forms. This fully-updated second edition includes examples of organizations and individuals who are seizing on the opportunities thrown up by this once-in-a-generation technological shift providing a cutting-edge guide to where we are going both as information consumers and in terms of broader societal changes. Each chapter explores aspects of the information lifecycle, including production, distribution, storage and consumption and contains case studies chosen to illustrate particular issues and challenges facing the information industry. One of the key themes of the book is the way that organizations, public and commercial, are blurring their traditional lines of responsibility. Amazon is moving from simply selling books to offering the hardware and software for reading them. Apple still makes computer hardware but also manages one of the world's leading marketplaces for music and software applications. Google maintains its position as the most popular internet search engine but has also digitized millions of copies of books from leading academic libraries and backed the development of the world's most popular computing platform, Android. At the heart of these changes are the emergence of cheap computing devices for decoding and presenting digital information and a network which allows the bits and bytes to flow freely, for the moment at least, from producer to consumer. While the digital revolution is impacting on everyone who works with information, sometimes negatively, the second edition of *Information 2.0* shows that the opportunities outweigh the risks for those who take the time to understand what is going on. Information has never been more abundant and accessible so those who know how to manage it for the benefit of others in the digital age will be in great demand. Readership: Students taking courses in library and information science, publishing and communication studies, with particular relevance to core modules exploring the information society and digital information.

Academics and practitioners who need to get to grips with the new information environment.

Future Histories Lizzie O'Shea, 2019-05-14 A highly engaging tour through progressive history in the service of emancipating our digital tomorrow. When we talk about technology we always talk about tomorrow and the future -- which makes it hard to figure out how to even get there. In *Future Histories*, public interest lawyer and digital specialist Lizzie O'Shea argues that we need to stop looking forward and start looking backwards. Weaving together histories of computing and progressive social movements with modern theories of the mind, society, and self, O'Shea constructs a usable past that can help us determine our digital future. What, she asks, can the Paris Commune tell us about earlier experiments in sharing resources--like the Internet--in common? How can Frantz Fanon's theories of anti colonial self-determination help us build digital world in which everyone can participate equally? Can debates over equal digital access be helped by American revolutionary Tom Paine's theories of democratic, economic redistribution? What can indigenous land struggles teach us about stewarding our digital climate? And, how is Elon Musk not a future visionary but a steampunk throwback to Victorian-era technological utopians? In engaging, sparkling prose, O'Shea shows us how very human our understanding of technology is, and how when we draw on the resources of the past, we can see the potential for struggle, for liberation, for art and poetry in our technological present. *Future Histories* is for all of us--makers, coders, hacktivists, Facebook-users, self-styled Luddites--who find ourselves in a brave new world.

The Co-Creation Paradigm Venkat Ramaswamy, Kerimcan Ozcan, 2014-04-09 A fundamental shift is underway that will change how we conceive of value. In an era of increasing interconnectedness, individuals, as opposed to institutions, stand at the center of value creation. To adapt to this tectonic shift, organizations can no longer unilaterally devise products and services. They must engage stakeholders—from customers and employees to suppliers, partners, and citizens at large—as co-creators. Co-creation guru Venkat Ramaswamy and Kerimcan Ozcan call for enterprises to be mindful of lived experiences, to build engagement platforms and management systems that are designed for creative collaboration, and to develop win more-win more strategies that enhance our wealth, welfare, and, well-being. Richly illustrated with examples of co-creation in action, *The Co-Creation Paradigm* provides a blueprint for the co-creative enterprise, economy, and society, while presenting a conceptual framework that will guide organizations across sectors in adopting this transformational approach. Challenging some of our most deeply held ideas about business and value, this book outlines the future of business as usual.
