Nonattainment New Source Review, Us Environmental Protection Agency Regulation, 2018 Law Library,2018-08-24 Nonattainment New Source Review (NSR) (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) The Law Library presents the complete text of the Nonattainment New Source Review (NSR) (US Environmental Protection Agency Regulation) (EPA) (2018 Edition). Updated as of May 29, 2018 The EPA is finalizing revisions to the regulations governing the nonattainment new source review (NSR) program mandated by section 110(a)(2)(C) of the Clean Air Act (CAA or Act). These revisions implement changes to the preconstruction review requirements for major stationary sources in nonattainment areas in interim periods between designation of new nonattainment areas and adoption of a revised State Implementation Plan (SIP). The revisions conform the nonattainment permitting rules that apply during the SIP development period following nonattainment designations before SIP approval to the Federal permitting rules applicable to SIP-approved programs. The changes are intended to provide a consistent national program for permitting major stationary sources in nonattainment areas under section 110(a)(2)(C) and part D of title I of the Act. In particular, these changes conform the regulations to the NSR reform provisions that EPA promulgated by notice dated December 31, 2002, except that these changes do not include the NSR reform provisions for clean units or pollution control projects, which the U.S. Court of Appeals for the D.C. Circuit vacated in *New York v. EPA*, 413 F.3d 3 (DC Cir. 2005). In addition, these changes include an interim interpretation of the NSR reform provision for a reasonable possibility standard for recordkeeping and reporting requirements, in accordance with that court decision. This interim interpretation to the reasonable possibility standard applies for appendix S purposes, pending the completion of rulemaking to develop a more complete interpretation. This book contains: - The complete text of the Nonattainment New Source Review (NSR) (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) - A table of contents with the page number of each section

The Book of Bamboo David Farrelly,1984 Bamboo’s amazing versatility, strength, and beauty have given it a larger role in human culture than any other plant. Both sustainable and plentiful, it has been used for millennia to make objects ranging from clothing and housing to more exotic luxuries like phonograph needles and children’s toys, to name but a few. This acclaimed sourcebook--part history, part illustrated catalog, part cultivation guide--details the myriad uses of bamboo, along with an immense bounty of information and lore on how to grow, maintain, and harvest this extraordinary plant; how to use it in craft and construction projects, including floors, fences, papers, and play equipment; and bamboo’s place in the literary, visual, and musical arts. An encyclopedic roster of more than 1,200 bamboo species is a book in itself, as is author David Farrelly’s A-to-Z catalog of artifacts made from bamboo: acupuncture needles, blowguns, bridges, kites, ships, violins, windmills, and a thousand other things. Strong, flexible, and beautiful in both its natural and finished states, bamboo is an abundant resource that could beneficially replace many less sustainable materials currently in use, and continue to transform our culture in the process.
