The Power of Mobile Banking Sankar Krishnan, 2014-04-28 Today's tech-savvy consumers are demanding a more personal customer experience from their banks, and banks are discovering that mobile services deliver individualized, tailored experiences better than any other technology. The Power of Mobile Banking: How to Profit from the Revolution in Retail Financial Services gives banking and financial professionals a well-researched guide for becoming transformational leaders. These leaders can convert their traditional retail branch banks into streamlined systems that deliver personalized services to their customers' laptops, tablets, and smartphones. Written by Sankar Krishnan—a career banker and noted financial services industry thought leader—The Power of Mobile Banking includes strategies for adapting mobile banking practices that suit the needs of both developed and emerging markets. Krishnan also shows how bankers can make their products and services relevant to a new generation of digital natives. Krishnan explores the expanding mobile payment systems that offer a wealth of financial opportunities for banking institutions and includes information on the growth of e-commerce, which holds the potential for new and profitable ways for banks to engage with consumers. The Power of Mobile Banking outlines the practical aspects of adapting to a mobile banking strategy and shows how to put the right players in place to ensure the technology works seamlessly. Once in place, a great mobile system delivers excellent service and benefits to users, as well as real value and unique features that cement customer loyalty. The book also offers advice for bankers who want to increase their bottom line by delving into the world-wide prepaid card market. Krishnan includes a discussion on the risks and hazards of mobile banking and reveals the critical investments that banks must be willing to make in order to avoid losing customers to telecoms, retailers, and technology providers. The time for retail banking to prepare for the new paradigm is now and The Power of Mobile Banking is the guide for professionals who want to adapt, evolve, and succeed in this new mobile-driven world.

Mobile banking in the Ethiopian bank sector Dereje Tesfa, 2019-08-30 Seminar paper from the year 2019 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Wolkite University (College of Business and Economics), language: English, abstract: This article looks at how and why banking customers have begun to take advantage of mobile services for their banking requirements and why some of them are still hesitant to adopt mobile banking in Ethiopian banking sector. Also, this article throws light on some of the eminent challenges faced by the mobile banking service providers, which can be seen as opportunities for the financial institutions and the bankers. The internet and the mobile phone, the two technological advancements that have profoundly affected human behavior in the last decade have started to converge. Using a variety of platforms, services are being created to enable mobile devices to perform many activities of the traditional internet in a reduced format for mobile devices. One such area of activity is mobile banking. A cluster of dedicated and demanding mobile phone users (consumers) have multiplied tremendously over the years, who expect real-time information and access and high levels of service.

Marketing and Mobile Financial Services Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently

dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

Effects of Mobile Banking Service Quality on Customer Satisfaction. The Case of Commercial Bank, Ethiopia Tarekegn Balango, 2023-04-25 Seminar paper from the year 2023 in the subject Business economics - Business Management, Corporate Governance, grade: 3.85, , course: Master of business administration, language: English, abstract: It was proven that perceived service quality had a positive relationship with customer satisfaction and the researcher think this supports the argument of linking mobile banking service and customer satisfaction. They use the SERVQUAL model but rather the dimension only scale to assess service quality other than website design and responsiveness. The researcher therefore think using the SERVQUAL model (Miykel Sisaye) model would be a contribution to existing research mobile banking context. This is the current research gap and in order to fill the gap, the researcher was try to measure service quality and customer satisfaction, The study aimed at examining the effect of five online banking service quality dimensions on the customers satisfaction in the case of CBE. The study followed an explanatory research design identifying the dimensions of service quality for online services namely reliability, responsiveness, ,personalization, web design and security as independent variable and customer satisfaction as dependent variable. Primary data was collected for the analysis based on five points Likert scale from 396 sample respondents who are customers of CBE online banking services. The data was coded and analyzed using SPSS version 25 software. The reliability of the instrument was checked using Cronbach's alpha test. The data analysis employed both descriptive and inferential statistical methods. The descriptive statistics was used for summarizing the background of respondents and computing average score of CBE on each dimensions of service quality and customers satisfaction. Correlation and multiple regression analysis were conducted to examine the relationship between the dependent and independent variables.

Service Promotion and its Impact on Building Customer Value Sanjeev Pradhan, 2018-05-17 Case Study from the year 2018 in the subject Business economics - Offline Marketing and Online Marketing, grade: Ass. Professor, , course: Management and IT, language: English, abstract: For banks to attract new business and sustain the loyalty of existing customers, consumers must be able to reach financial institutions through multiple channels. With consumer interest that was historically focused on Branch Banking, currently fast changing towards Mobile & Internet banking - the level of popularity and number of possible services it carries has a great potential. Through the use of wireless banking as a customer channel, as well as an internal tool within financial institutions, the combination of Mobile and wireless technologies with the wide variety of portable devices available today, enables new revenue opportunities for financial services organizations. This provides a new channel that can be used to refresh and expand the customer base, attract prime customers and enhance loyalty. The research topic has a greater importance in today's context in terms of customer retention. The mobile banking services provided by NIBL showed that the customers has a high degree of trust building factor and has made their financial transactions safe and easy to operate. Though a little consumer awareness is required at certain level to the first time users in order to boost their confidence to operate easily. The revolution in the field of technology has made a boon for the society and at the same time high risk factors are also associated with it. This research has made an extensive contribution in the area of promotional activities where personal interaction and advertisement program is a must for maintaining long term customer relationship. Moreover, providing better services with added value has made the customer to become more loyal towards their mobile banking services.

Bank 2.0 Brett King, 2010-06-05 BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet—all within the next 10 years.

Integrity in Mobile Phone Financial Services Pierre-Laurent Chatain,Raul Hernandez-Coss,Kamil Borowik,Andrew Zerzan,2008-06-10 Governments are challenged to make an innovation-friendly climate while simultaneously ensuring that business development remain sustainable. Criminal use of the technology terrorist financing and money laundering challenges long-run business viability via risk of massive investment flight and public distrust of new players entering the market. Sustainable business models are those that base regulation on a careful risk-based analysis. This study identifies the perceived risks and compares them with the actual level of risk for each category of mobile phone financial services. The comparison reveals that the perceptions do not weigh up to the reality. Based on fieldwork in seven locations where the technology has taken off, this paper finds that providers apply measures that are consistent with international standards to combat money laundering and terrorist financing. It identifies the sometimes non-traditional means the industry uses that both mitigate the risks and are in line with good business practices. Acknowledging that mobile phone financial services are no riskier than other channels, governments are called to treat them as an opportunity to expand access to finance.

Mobile Banking Adoption in the Western Europe Wilfred Odoke, 2011-01 The recent explosion in mobile phone growth and use, resulting from consumers' love affair with their mobile phones and tremendous advances in data connection speeds and other mobile technologies, offers unprecedented opportunities for banks and other financial institutions to provide their customers with a convenient anytime and anywhere access to mobile banking and payment. Mobile financial stakeholders have experimented with mobile banking and mobile payments for years but have failed to offer the consumer a better alternative than the payment instruments already available, such as cash, checks and cards. In Europe, these mobile financial services projects failed, one of the reasons is, because consumer attitudes are notoriously hard to change. A new mobile financial offering must clearly convince the consumer that it delivers great value - significant enough for the consumer to change their behaviour. There have been successful products and services which were created based on consumer perceptions and not because of the advanced nature of the technology they use.

Mobile Banking Services in Financial Industry Davood Manzoor, Alireza Miremadi, Hamid Boostani Golestani, 2013 The financial services industry, specially the retail banking sector, has experienced significant changes in which the consequences could be a competitive pressure, customer requirements, and technological innovation. One of these new service deliveries, which has been presented recently and has been developed dramatically in this industry, is mobile banking which offers a great deal of benefit for both banks and customers. As far as this new trend suggests, researchers in various fields draw their interests toward this new technology as a subject matter for their research. Although there is a great number of a researcher in this field, this still is an infancy stage of progress. No one would dispute the fact that in industrial services, customer satisfaction and customer relationship with management could be a key of success in business. There is a wide range of articles that focused on customer's acceptance and customer's adoption or the role of trust in this new research area.
