Design Strategies for Reimagining the City Linda Matthews, 2022-06-24 Design Strategies for Reimagining the City is situated between projective geometry, optical science and architectural design. It draws together seemingly unrelated fields in a series of new digital design tools and techniques underpinned by tested prototypes. The book reveals how the relationship between architectural design and the ubiquitous urban camera can be used to question established structures of control and ownership inherent within the visual model of the Western canon. Using key moments from the broad trajectory of historical and contemporary representational mechanisms and techniques, it describes the image's impact on city form from the inception of linear perspective geometry to the digital turn. The discussion draws upon combined fields of digital geometry, the pictorial adaptation of human optical cues of colour brightness and shape, and modern image-capture technology (webcams, mobile phones and UAVs) to demonstrate how the permeation of contemporary urban space by digital networks calls for new architectural design tools and techniques. A series of speculative drawings and architectural interventions that apply the new design tools and techniques complete the book. Aimed at researchers, academics and upper-level students in digital design and theory, it makes a timely contribution to the ongoing and broadly debated relationship between representation and architecture.

Advances in Urban Engineering and Management Science Volume 2 Rashwan Khalil, Jun Yang, 2022-12-12 Advances in Urban Engineering and Management Science contains the selected papers resulting from the 2022 3rd International Conference on Urban Engineering and Management Science (ICUEMS 2022). Covering a wide range of topics, the Proceedings of ICUEMS 2022 presents the latest developments in: (i) Architecture and Urban Planning (Architectural design and its theory, Urban planning and design, Building technology science, Urban protection and regeneration, Urban development strategy, Ecological construction and intelligent control, Sustainable infrastructure); (ii) Logistics and supply chain management (Warehousing and distribution, Logistics outsourcing, Logistics automation, Production and material flow, Supply chain management technology, Supply chain risk management, Global service supply chain management, Supply Chain Planning and Inventory Management, Coordination and collaboration of supply chain networks, Governance and regulatory aspects affecting supply chain management); (iii) Urban traffic management (Smart grid management, Belt and Road Development, Intelligent traffic analysis and planning management, Big data and transportation management). The Proceedings of ICUEMS 2022 will be useful to professionals, academics, and Ph.D. students interested in the above-mentioned fields. Emphasis was put on basic methodologies, scientific development and engineering applications. ICUEMS 2022 is to provide a platform for experts, scholars, engineers and technical researchers engaged in the related fields of urban engineering management to share scientific research achievements and cutting-edge technologies, understand academic development trends, broaden research ideas, strengthen academic research and discussion, and promote the industrialization cooperation of academic achievements. Experts, scholars, business people and other relevant personnel from universities and research institutions at home and abroad are cordially invited to attend and exchange.

Earth Observation in Urban Monitoring Amit Kumar, Prashant K. Srivastava, Purabi Saikia, Rajesh Kumar Mall, 2023-11-09 Earth Observation in Urban Monitoring: Techniques and Challenges presents the latest techniques of remote sensing in urban monitoring, along with methods for quantitative and qualitative assessment using state-of-the-art Earth observation technologies. The book details the advances of remote sensing technologies in urban environmental monitoring for a range of practical and research applications, Earth observation datasets, remote sensing of environmental considerations, geostatistical

techniques and resilience perspectives. Chapters cover sensor applications, urban growth modelling, SAR applications, surveying techniques, satellite time series analysis and a variety of other remote sensing technologies for urban monitoring. Each chapter includes detailed case studies at a variety of scales and from a variety of geographies, offering up-to-date, global, urban monitoring methodologies for researchers, scientists and academics in remote sensing, geospatial research, environmental science and sustainability. Focuses on a variety of interdisciplinary applications using Earth observation data, GIS and soft computing techniques to address various challenges in urban monitoring Provides numerous case studies at a variety of scales, from local to global, to aid readers in implementing urban monitoring techniques at any level Includes theoretical and applied research contributions along with background information on the use of concurrent technologies in the disciplines of urban studies

Computational History and Data-Driven Humanities Bojan Bozic,Gavin Mendel-Gleason,Christophe Debruyne,Declan O'Sullivan,2016-11-07 This book constitutes the refereed post-proceedings of the Second IFIP WG 12.7 International Workshop on Computational History and Data-Driven Humanities, held in Dublin, Ireland, in May 2016. The 7 full papers presented together with 2 invited talks and 4 lightning talks were carefully reviewed and selected from 14 submissions. The papers focus on the challenge and opportunities of data-driven humanities and cover topics at the interface between computer science, social science, humanities, and mathematics.

Big Data Analytics for Cyber-Physical System in Smart City Mohammed Atiquzzaman,Neil Yen,Zheng Xu,2020-12-17 This book gathers a selection of peer-reviewed papers presented at the second Big Data Analytics for Cyber-Physical System in Smart City (BDCPS 2020) conference, held in Shanghai, China, on 28–29 December 2020. The contributions, prepared by an international team of scientists and engineers, cover the latest advances made in the field of machine learning, and big data analytics methods and approaches for the data-driven co-design of communication, computing, and control for smart cities. Given its scope, it offers a valuable resource for all researchers and professionals interested in big data, smart cities, and cyber-physical systems.

My Beautiful Lady Mian Ju,2019-12-13 The Demon King Du Chunfeng, who had returned to the country to investigate his father's death, jumped off the plane and was saved by the mafia lord. He experienced a different life from the softhearted hearts of the battlefield ... Beautiful ladies, teachers, police officers, air stewardesses ... They came one after another!

12 - 12 - 12 (Book 2 of John Rachel's End-of-the-World Trilogy) John Rachel,2017-10-13 12-12-12 is the story of a great nation falling apart and one young man's quest for meaning in the midst of chaos. It takes the stuff of reality and pitches it to a high scream. Open your mind but cover your ears. Knowledge is bliss but it's loud and painful. Yet somehow still funny. 12-12-12 manages to tell it like it is by telling it like it isn't. Granted, this is not what actually happened during 2012. But what unfolds is not more implausible. Nor is it less implausible. It's dark, ironic, witty, at times surrealistic and just plain weird. One reviewer calls it laugh-out-loud brain food for hungry minds.

Why Cities Lose Jonathan A. Rodden,2019-06-04 A prizewinning political scientist traces the origins of urban-rural political conflict and shows how geography shapes elections in America and beyond Why is it so much easier for the Democratic Party to win the national popular vote than to build and maintain a majority in Congress? Why can Democrats sweep statewide offices in places like Pennsylvania and Michigan yet fail to take control of the same states' legislatures? Many place exclusive blame on partisan gerrymandering and voter suppression. But as political scientist Jonathan A. Rodden demonstrates in *Why*

Cities Lose, the left's electoral challenges have deeper roots in economic and political geography. In the late nineteenth century, support for the left began to cluster in cities among the industrial working class. Today, left-wing parties have become coalitions of diverse urban interest groups, from racial minorities to the creative class. These parties win big in urban districts but struggle to capture the suburban and rural seats necessary for legislative majorities. A bold new interpretation of today's urban-rural political conflict, *Why Cities Lose* also points to electoral reforms that could address the left's under-representation while reducing urban-rural polarization.

Dare to Speak Suzanne Nossel, 2020-07-28 A must read.—Margaret Atwood A vital, necessary playbook for navigating and defending free speech today by the CEO of PEN America, *Dare To Speak* provides a pathway for promoting free expression while also cultivating a more inclusive public culture. Online trolls and fascist chat groups. Controversies over campus lectures. Cancel culture versus censorship. The daily hazards and debates surrounding free speech dominate headlines and fuel social media storms. In an era where one tweet can launch—or end—your career, and where free speech is often invoked as a principle but rarely understood, learning to maneuver the fast-changing, treacherous landscape of public discourse has never been more urgent. In *Dare To Speak*, Suzanne Nossel, a leading voice in support of free expression, delivers a vital, necessary guide to maintaining democratic debate that is open, free-wheeling but at the same time respectful of the rich diversity of backgrounds and opinions in a changing country. Centered on practical principles, Nossel's primer equips readers with the tools needed to speak one's mind in today's diverse, digitized, and highly-divided society without resorting to curbs on free expression. At a time when free speech is often pitted against other progressive axioms—namely diversity and equality—*Dare To Speak* presents a clear-eyed argument that the drive to create a more inclusive society need not, and must not, compromise robust protections for free speech. Nossel provides concrete guidance on how to reconcile these two sets of core values within universities, on social media, and in daily life. She advises readers how to: Use language conscientiously without self-censoring ideas; Defend the right to express unpopular views; And protest without silencing speech. Nossel warns against the increasingly fashionable embrace of expanded government and corporate controls over speech, warning that such strictures can reinforce the marginalization of lesser-heard voices. She argues that creating an open market of ideas demands aggressive steps to remedy exclusion and ensure equal participation. Replete with insightful arguments, colorful examples, and salient advice, *Dare To Speak* brings much-needed clarity and guidance to this pressing—and often misunderstood—debate.

Bluets Maggie Nelson, 2009-10-01 Suppose I were to begin by saying that I had fallen in love with a color . . . A lyrical, philosophical, and often explicit exploration of personal suffering and the limitations of vision and love, as refracted through the color blue. With *Bluets*, Maggie Nelson has entered the pantheon of brilliant lyric essayists. Maggie Nelson is the author of numerous books of poetry and nonfiction, including *Something Bright, Then Holes* (Soft Skull Press, 2007) and *Women, the New York School, and Other True Abstractions* (University of Iowa Press, 2007). She lives in Los Angeles and teaches at the California Institute of the Arts.

The Socio-spatial Design of Community and Governance Sam Jacoby, Jingru (Cyan) Cheng, 2021-01-18 This book proposes a new interdisciplinary understanding of urban design in China based on a study of the transformative effects of socio-spatial design and planning on communities and their governance. This is framed by an examination of the social projects, spaces, and realities that have shaped three contexts critical to the understanding of urban design problems in China: the histories of “collective forms” and “collective spaces”, such as that of the urban danwei (work-unit), which inform current community building and

planning; socio-spatial changes in urban and rural development; and disparate practices of “spatialised governmentality”. These contexts and an attendant transformation from planning to design and from government to governance, define the current urban design challenges found in the dominant urban xiaogu (small district) and shequ (community) development model. Examining the histories, transformations, and practices that have shaped socio-spatial epistemologies and experiences in China – including a specific sense of community and place that is rather based on a concrete “collective” than abstract “public” space and underpinned by socialised governance – this book brings together a diverse range of observations, thoughts, analyses, and projects by urban researchers and practitioners. Thereby discussing emerging interdisciplinary urban design practices in China, this book offers a valuable resource for all academics, practitioners, and stakeholders with an interest in socio-spatial design and development.

Urban Design: Ornament and Decoration Taner Oc, Steve Tiesdell, 2007-06-07 'Urban Design: Ornament and Decoration' focuses on decorating the city and how ornament has been used to bring delight to the urban scene. The authors show how the pattern and distribution of street and square and other major elements in the city can be enhanced by the judicious use of decorative surface treatment and by the careful placing of hard and soft landscape features. This second edition, updated by Cliff Moughtin and now available in paperback, includes a new chapter on mud architecture. Case studies of city decoration are also outlined to bring together the ideas discussed and to show how ornament and decoration can be used to emphasize the five components of city form: the path, the node, the edge, the landmark and the district.

Reclaiming the Black Past Pero G. Dagbovie, 2018-11-13 The past and future of Black history In this information-overloaded twenty-first century, it seems impossible to fully discern or explain how we know about the past. But two things are certain. Whether we are conscious of it or not, we all think historically on a routine basis. And our perceptions of history, including African American history, have not necessarily been shaped by professional historians. In this wide-reaching and timely book, Pero Gaglo Dagbovie argues that public knowledge and understanding of black history, including its historical icons, has been shaped by institutions and individuals outside academic ivory towers. Drawing on a range of compelling examples, Dagbovie explores how, in the twenty-first century, African American history is regarded, depicted, and juggled by diverse and contesting interpreters—from museum curators to filmmakers, entertainers, politicians, journalists, and bloggers. Underscoring the ubiquitous nature of African-American history in contemporary American thought and culture, each chapter unpacks how black history has been represented and remembered primarily during the “Age of Obama,” the so-called era of “post-racial” American society. *Reclaiming the Black Past* is Dagbovie's contribution to expanding how we understand African American history during the new millennium.

Lost Utopias Richard Pare, Jennifer Minner, 2016 The pictures in this book bring the argument about reuse and preservation into focus. What is worthy of retaining and what is dispensable? What are the criteria for considering whether a structure should be retained or demolished? How do you define the parameters of taste and utility in making decisions to preserve or destroy? How will future generations regard the destruction of certain structures, will we be considered cultural vandals for not having retained more of the structures that seemed irrelevant at the time? The preservation argument is heightened in the case of the exhibitions sites, as by definition an exhibition is considered a temporary event.--Page 9.

Ghetto Mitchell Duneier, 2016-04-19 A New York Times Notable Book of 2016 Winner of the Zócalo Public Square Book Prize On March 29, 1516, the city council of Venice issued a decree forcing Jews to live in il getto—a closed quarter named for the copper foundry that once occupied the area. The term stuck. In this sweeping and original account, Mitchell Duneier traces the idea of the ghetto from its beginnings in

the sixteenth century and its revival by the Nazis to the present. As Duneier shows, we cannot comprehend the entanglements of race, poverty, and place in America today without recalling the ghettos of Europe, as well as earlier efforts to understand the problems of the American city. Ghetto is the story of the scholars and activists who tried to achieve that understanding. As Duneier shows, their efforts to wrestle with race and poverty cannot be divorced from their individual biographies, which often included direct encounters with prejudice and discrimination in the academy and elsewhere. Using new and forgotten sources, Duneier introduces us to Horace Cayton and St. Clair Drake, graduate students whose conception of the South Side of Chicago established a new paradigm for thinking about Northern racism and poverty in the 1940s. We learn how the psychologist Kenneth Clark subsequently linked Harlem's slum conditions with the persistence of black powerlessness, and we follow the controversy over Daniel Patrick Moynihan's report on the black family. We see how the sociologist William Julius Wilson redefined the debate about urban America as middle-class African Americans increasingly escaped the ghetto and the country retreated from racially specific remedies. And we trace the education reformer Geoffrey Canada's efforts to transform the lives of inner-city children with ambitious interventions, even as other reformers sought to help families escape their neighborhoods altogether. Duneier offers a clear-eyed assessment of the thinkers and doers who have shaped American ideas about urban poverty—and the ghetto. The result is a valuable new estimation of an age-old concept.

Strong Towns Charles L. Marohn, Jr., 2019-10-01 A new way forward for sustainable quality of life in cities of all sizes *Strong Towns: A Bottom-Up Revolution to Build American Prosperity* is a book of forward-thinking ideas that breaks with modern wisdom to present a new vision of urban development in the United States. Presenting the foundational ideas of the Strong Towns movement he co-founded, Charles Marohn explains why cities of all sizes continue to struggle to meet their basic needs, and reveals the new paradigm that can solve this longstanding problem. Inside, you'll learn why inducing growth and development has been the conventional response to urban financial struggles—and why it just doesn't work. New development and high-risk investing don't generate enough wealth to support itself, and cities continue to struggle. Read this book to find out how cities large and small can focus on bottom-up investments to minimize risk and maximize their ability to strengthen the community financially and improve citizens' quality of life. Develop in-depth knowledge of the underlying logic behind the "traditional" search for never-ending urban growth Learn practical solutions for ameliorating financial struggles through low-risk investment and a grassroots focus Gain insights and tools that can stop the vicious cycle of budget shortfalls and unexpected downturns Become a part of the Strong Towns revolution by shifting the focus away from top-down growth toward rebuilding American prosperity *Strong Towns* acknowledges that there is a problem with the American approach to growth and shows community leaders a new way forward. The Strong Towns response is a revolution in how we assemble the places we live.

Elementary Linear Algebra Howard Anton,2010-03-15 When it comes to learning linear algebra, engineers trust Anton. The tenth edition presents the key concepts and topics along with engaging and contemporary applications. The chapters have been reorganized to bring up some of the more abstract topics and make the material more accessible. More theoretical exercises at all levels of difficulty are integrated throughout the pages, including true/false questions that address conceptual ideas. New marginal notes provide a fuller explanation when new methods and complex logical steps are included in proofs. Small-scale applications also show how concepts are applied to help engineers develop their mathematical reasoning.

Salvage the World Dan DanXia,2020-06-06 It was said that the wind and the clouds of the world surged, and the rivers of time surged. People said that the sky and the sky were long and endless, but the stars moved like smoke, and in the end, it was just a wind and moon.
