Underground Philadelphia Harry Kyriakodis, Joel Spivak, 2019-02-11 Explore Philadelphia's relationship with the underground, as old as the city itself, dating back to when Quaker settlers resided in caves alongside the Delaware River more than three hundred years ago. Explore the city under the The City of Brotherly Love, which became a national and world leader in the delivery of water, gas, steam, and electricity during the industrial age. The construction of multiple subway lines within Center City took place during the early twentieth century. An intricate subsurface pedestrian concourse was also developed throughout the downtown area for the city's inhabitants. From Thirtieth Street Station and Reading Terminal to the Commuter Rail Tunnel and transit lines that were never built, Philadelphia's infrastructure history is buried under the earth as much as above. Join authors Harry Kyriakodis and Joel Spivak as they reveal the curious aspects of the Quaker City's underground experience.

Running the Rails James Wolfinger, 2016-06-07 Philadelphia exploded in violence in 1910. The general strike that year was a notable point, but not a unique one, in a generations-long history of conflict between the workers and management at one of the nation's largest privately owned transit systems. In *Running the Rails*, James Wolfinger uses the history of Philadelphia's sprawling public transportation system to explore how labor relations shifted from the 1880s to the 1960s. As transit workers adapted to fast-paced technological innovation to keep the city's people and commerce on the move, management sought to limit its employees' rights. Raw violence, welfare capitalism, race-baiting, and smear campaigns against unions were among the strategies managers used to control the company's labor force and enhance corporate profits, often at the expense of the workers' and the city's well-being. Public service workers and their unions come under frequent attack for being a special interest or a hindrance to the smooth functioning of society. This book offers readers a different, historically grounded way of thinking about the people who keep their cities running. Working in public transit is a difficult job now, as it was a century ago. The benefits and decent wages Philadelphia public transit workers secured—advances that were hard-won and well deserved—came as a result of fighting for decades against their exploitation. Given capital's great power in American society and management's enduring quest to control its workforce, it is remarkable to see how much Philadelphia's transit workers achieved.

Philadelphia's Rapid Transit Arnold & Dyer, Philadelphia, 1908

Moving the Masses Charles W. Cheape, 1980 The development of public transit is an integral part of both business and urban history in late nineteenth-century America. The author begins this study in 1880, when public transportation in large American cities was provided by numerous, competing horse-car companies with little or no public control of operation. By 1912, when the study concludes, a monopoly in each city operated a coordinated

network of electric-powered streetcars and, in the largest cities, subways, which were regulated by city and state agencies. The history of transit development reflects two dominant themes: the constant pressure of rapid growth in city population and area and the requirements of the technology developed to service that growth. The case studies here include three of the four cities that had rapid transit during this period. Each case study examines, first, the mechanization of surface lines and, second, the implementation of rapid transit. New York requires an additional chapter on steam-powered, elevated railroads, for early population growth there required rapid transit before the invention of electric technology. Urban transit enterprise is viewed within a clear and familiar pattern of evolution--the pattern of the last half of the nineteenth century, when industries with expanding markets and complex, costly processes of production and distribution adopted new strategy and structure, administered by a new class of professional managers.

Philadelphia Trolleys Roger DuPuis II, 2017-01-23 Using evocative photographs from private collections, *Philadelphia Trolleys: From Survival to Revival* carries readers on a nostalgic trip through nearly 50 years of transportation history, starting with the takeover of local transit service from the private sector by Southeastern Pennsylvania Transportation Authority (SEPTA). Sporting a rainbow of paint schemes in the 1970s, Philadelphia's fleet of streamlined 1940s trolley cars brought a welcome splash of color to gritty city streets. But more than a coat of paint was needed for America's largest surviving streetcar network, and SEPTA faced tough choices about how much to keep as aging vehicles and infrastructure desperately required renewal or replacement. Long-lived Presidents' Conference Committee (PCC) streamliners were retired, and SEPTA invested in Kawasaki light-rail vehicles, which are still serving Philadelphia commuters 35 years later. Many SEPTA PCC cars found new homes, from Maine to San Francisco--and, more recently, on SEPTA's own revived Girard Avenue line. The story comes full circle as SEPTA officials once again gear up to select a new generation of Philadelphia trolleys.

Philadelphia's Rapid Transit Arnold Dyer, 2015-08-05 Excerpt from Philadelphia's Rapid Transit: Being an Account of the Construction and Equipment of the Market Street Subway-Elevated and Its Place in the Great System and Service of the Philadelphia Rapid Transit Company The work is now completed; it is a monument to the unselfish public spirit of the financial interests which attempted it, to the skill of the engineers who designed it and the contractors who built it, under difficulties never before encountered in similar work. Whether it will pay directly is a question yet to be determined. If, however, it should bring to the management of the present operating Company, the Philadelphia Rapid Transit Company, some recognition from the public that their interests are first considered, it will at once prove a profitable investment. Philadelphia Trolleys Allen Meyers, Joel Spivak, 2003 Streetcar service arrived in Philadelphia in the 1850s, shortly after the consolidation of the city. After the Civil War, the horse-drawn omnibus gave way to a comprehensive network of streetcar lines with some routes measuring nineteen miles in length. By 1915, the electrification of the streetcar increased the number of routes in Philadelphia to a total of eighty-six. During the trolley's heyday, the city provided a vast test track for such companies as J.G. Brill, Kimball and Gorton Car Manufacturers, and the Budd Wheel Company. The Wharton Railroad Switch Company revolutionized the manufacture of switches and tracks. Of the lines that once operated in Philadelphia, five are still running today. Philadelphia Trolleys contains a variety of rare images, including a postcard of the Point Breeze Amusement Park, photographs of motormen's uniform badges and buttons, architectural drawings, early stock certificates, and a photograph of the Toonerville Trolley used in the silent movies produced by Lubin Studios in the 1920s.

Suburban Philadelphia Trolleys Kenneth C. Springirth, 2007-08-08 The Philadelphia Suburban Transportation Company prospered through the hard times of the 1930s and was the last privately-owned trolley system in the United States. Aerodynamically designed Bullet cars of the Philadelphia and Western Railway dramatically reduced travel time on the Sixty-ninth Street to Norristown line. The Presidents' Conference Committee trolley cars of the Philadelphia Transportation Company linked the boroughs of Darby, Colwyn, and Yeadon with Philadelphia. Photographs of Media's 1977 town fair feature

vintage trolleys in the only suburban community in the United States with a trolley line ending in its main street. Suburban Philadelphia Trolleys covers the history of the trolleys that served Philadelphia's western suburbs.

Southeastern Pennsylvania Trolleys Kenneth C. Springirth, 2008 An extensive number of trolley car lines linked the city of Philadelphia to the rich farmland and picturesque towns of southeastern Pennsylvania. These trolley lines traversed miles of narrow streets lined with row houses whose residents were proud working-class Americans. These historic photographs trace the trolley cars' routes, including Route 23, the region's longest urban trolley route, from the expanses of Northwest Philadelphia's Chestnut Hill through the crowded commercial Center City to South Philadelphia with a variety of neighborhood stops at everything in between. Southeastern Pennsylvania Trolleys follows the history of the trolley cars that have served this diverse and historic region.

Philadelphia's Suburban Red Arrow Trolley Heritage Kenneth C. Springirth, 2019 Philadelphia's Suburban Red Arrow Trolley Heritage is a photographic essay of suburban Philadelphia's Red Arrow system and operation by the Southeastern Pennsylvania Transportation Authority (SEPTA). By 1899, the Philadelphia & West Chester Traction Company operated trolley service to West Chester. In 1902, the Ardmore & Llanerch Street Railway Company began service to Ardmore. Philadelphia & Garrettford Street Railway Company reached Media in 1913 and Sharon Hill in 1917. These companies consolidated into the Philadelphia Suburban Transportation Company (PSTC) in 1936, becoming known as Red Arrow Lines. Philadelphia & Western Railway Company (P&W) merged into PSTC in 1953. Pennsylvania State Highway Department plans to widen a portion of West Chester Pike resulted in buses replacing trolleys between West Chester and West Gate Hills in 1954. Rush hour trolley service continued between 69th Street Terminal and West Gate Hills until bus replacement in 1958. Buses took over Strafford Line in 1956 and Ardmore Line in 1966. SEPTA acquired PSTC in 1970 and purchased new rail cars for Media, Sharon Hill, and Norristown Lines. Philadelphia's Suburban Red Arrow Trolley Heritage documents Philadelphia's western suburbs trolley history.
