African Oracles in 10 Mi Richard T. Kaser, 2010-10-12 For more than 1000 years, the Yoruba of Nigeria have planned their lives, found true love, and learned their destiny through a vibrant and poetic fortune-telling system. *African Oracles in 10 Minutes* puts the power of these ancient methods in your hands. Sensing the strong link between sexual and spiritual energy, the Yoruba have traditionally explored both male and female paths to wisdom. You can choose to follow either the White Cotton Road, which women have relied on for centuries, or the Melon Seed Road, favored by men. Each path offers more than 250 readings that are both relevant to modern life and faithful to the spirit of the original systems. All you need are 16 objects -- coins, shells, beads or dried beans -- to get instant answers to yes or no questions as well as in-depth readings on more profound considerations. *African Oracles in 10 Minutes* provides both a fascinating glimpse of Yoruban spiritualism and a time-honored method for unlocking the secrets of the past and revealing the destiny that awaits you.

THE TAROT GUIDE [From Beginners to Professionals] Pailong, 2021-12-12 First of all, I have to apologize to everyone for my incomplete English grammar. I started studying tarot card reading at 16 years old. I am fond of the Rider Waite series of cards because of the pictures that convey the full meaning. The first book that I learned was written in my native language. I am very fond of how to make predictions using tarot cards. Often, I use tarot card prediction to earn income after school. Until I worked in a travel company, I had extra income from fortune telling. Now I am currently 41 years old. Over time, I studied how to read more cards from English books. Until I had enough experience to pass it on to people in my country. I am currently a recognized tarot card reading instructor. For the various techniques I wrote in this book, I use them regularly. It is suitable for beginners up to the level of professional fortune tellers. The highlight of my book is that - Can use tarot cards in all questions. - The ability of tarot cards that ordinary people may never experience. - Use tarot cards as a consultant for everyday life. - Use tarot cards to answer suspicions about business. - Tarot card reading in various meanings. - Examples of fortune telling and card reading in various questions For this book, I will use the word instead of those who do tarot card reading with Fortune tellers and I will use the word instead of the fortune owner or the answer recipient with Predictors. Let's all get a new experience from my book. Thank you all for your support. The 10 Triangles of Life Robin Sacredfire, Our life is composed of a multitude of events that either bring us upwards or downwards. These events can be predicted by following certain very ancient laws that merge with everything else that we find in nature and within our spiritual evolution. It's for this reason, that we can, not only predict the future, while using them, but also recognize our state of awareness and improve our existence. The law of attraction, the law of cause and effect and the law of karma would not make any sense without a proper assimilation of how the law of the triangle of power operates. And it's for this reason that all secret societies study this topic and keep addressing it as one of the most important, from the individual that needs to improve his social life, to the organization that needs to acquire more power and wealth. The principles that guide us to power are the same for one person or a group. In this book, the reader is presented with ten types of triangles that lead to more success in life. Studying and applying them will certainly prove itself significantly accurate in the road that one travels towards bigger and better achievements in the fields of love and relationships, wealth and spirituality.

The American Bookseller, 1904

The Fortune Tellers Howard Kurtz, 2000-09-06 Just as spin has taken over politics in America, so too has it come to define the long bull market on Wall Street. The booming trade in stocks, which has become a national obsession, has produced an insatiable demand for financial intelligence--and plenty of new, highly paid players eager to supply it. On television and the Internet, commentators and analysts are not merely reporting the news, they are making news in ways that provide huge windfalls for some investors and crushing losses for others. And they often traffic in rumor, speculation, and misinformation that hit the market at warp speed. Howard Kurtz, widely recognized as America's best media reporter, and the man who revealed the inner workings of the Clinton administration's press operation in the national bestseller *Spin Cycle*, here turns his skeptical eye on the business-media revolution that has transformed the American economy. He uncovers the backstage pressures at television shows like CNBC's *Squawk Box* and CNN's *Moneyline*; at old-media bastions like *The Wall Street Journal* and *Business Week*, which are racing to keep up with the twenty-four-hour news cycle; and at Internet start-ups like *TheStreet.com* and *JagNotes*, real-time operations in the very arena where fortunes are made and lost with stunning swiftness. Bombarded by all this white noise, who among the fortune tellers can investors really trust? Kurtz provides an indispensable guide with this eye-opening account of an unseen world, based on eighteen months of shadowing the most influential, colorful, and egotistical people in business and journalism. Among the people we meet in its pages are: Ron Insana, Maria Bartiromo, David Faber, Lou Dobbs, and the other famous faces of cable TV. The manic king-of-all-media Jim Cramer, who juggles four different identities--Wall Street trader, television commentator, columnist, and Internet entrepreneur --with wildly varying degrees of success. Shoe-leather reporters Steve Lipin, Chris Byron, and Gene Marcial, whose exclusives drive up stocks or quickly deflate them. Superstar analysts Ralph Acampora, Abby Joseph Cohen, and Henry Blodget, whose predictions make the Dow and Nasdaq gyrate. Internet CEOs Kim Polese and Kevin O'Connor, who struggle to ride the media tiger while promoting their high-flying companies. No one has ever reported from inside the Wall Street media machine or laid bare the bitter

feuds, cozy friendships, and whispered leaks that move the markets. Kurtz exposes the disturbing conflicts of interest among the brokerage analysts and fund managers whose words can boost or bash stocks --thanks to scoop-hungry journalists who rarely question whether these gurus are right or wrong. And he chronicles the journalistic hype that helped propel Net stocks into the stratosphere until they began plummeting back to earth. In a time of head-spinning volatility, *The Fortune Tellers* is essential reading for all of us who gamble our savings in today's overheated stock market.

Advances in Social Computing Sun-Ki Chai, John Salerno, Patricia L. Mabry, 2010-04-08 Social computing is concerned with the study of social behavior and social context based on computational systems. Behavioral modeling provides a representation of the social behavior, and allows for experimenting, scenario planning, and deep understanding of behavior, patterns, and potential outcomes. The pervasive use of computer and Internet technologies by humans in everyday life provides an unprecedented environment of various social activities that, due to the platforms under which they take place, generate large amounts of stored data as a by-product, often in systematically organized form. Social computing facilitates behavioral modeling in model building, analysis, pattern mining, and prediction. Numerous interdisciplinary and interdependent systems are created and used to represent the various social and physical systems for investigating the interactions between groups, communities, or nation-states. This requires joint efforts to take advantage of the state-of-the-art research from multiple disciplines improving social computing and behavioral modeling in order to document lessons learned and develop novel theories, experiments, and methodologies to better explain the interaction between social (both informal and institutionalized), psychological, and physical mechanisms. The goal is to enable us to experiment, create, and recreate an operational environment with a better understanding of the contributions from each individual discipline, forging joint interdisciplinary efforts. This volume comprises the proceedings of the third international workshop on Social Computing, Behavioral Modeling and Prediction, which has grown tremendously.
