How to Get Anything on Anybody Lee Lapin, 2003-01-15 The world's only hands-on guide to electronic, surveillance, people tracking and asset discovery. How to do it, how to protect yourself from those who would. Used by all major intelligence agencies, now available to the public. People tracking to computer violating. The best of the worst. Or, perhaps the worst of the best. How to track, trace, and investigate anyone, anywhere, anytime. Uncover hidden assets and agendas, build a dossier, put together anyone's background. Used by the FBI as a training manual, How To, Book 3, teaches you the inside secrets of surveillance, people tracking, asset discovery, electronic and physical surveillance. Let the world's top experts, including the FBI and the KGB teach you hands-on surveillance, people tracking, asset location and rock turning. Nothing else like it on the planet.

Tracking People Anthea Hucklesby, Raymond Holt, 2023-08-30 Tracking technologies are now ubiquitous and are part of many people's everyday lives. Large sections of the population voluntarily use devices and apps to track fitness, medical conditions, sleep, vital signs or their own or others' whereabouts. Governments, health services, immigration and criminal justice agencies increasingly rely upon tracking technologies to monitor individuals' whereabouts, behaviour, medical conditions and interventions. Despite the human rights concerns of some organisations and individuals, most wearers and their significant others tend to welcome the technologies. This paradox is only one of the many fascinating challenges raised by the widespread use of tracking technologies which are explored in this book. This book critically explores the ethical, legal, social, and technical issues arising from the current and future use of tracking technologies. It provides a unique and wide-ranging discussion, via a cross-disciplinary collection of essays, on issues relating to technological devices and apps whose use is imposed upon wearers or suggested by others, whether agencies or individuals, including in the domains of criminal justice, terrorism, and health and social care. Contributions from leading academics from across social sciences, engineering, computer and data science, philosophy, and health and social care address the diverse uses of tracking technologies including with individuals with dementia, defendants and offenders, individuals with mental health conditions and drug users alongside legal, ethical and normative questions about the appropriate use of these technologies. Cross-disciplinary themes emerge focusing on both the benefits of the technologies – freedom, improved safety, security, well-being and autonomy, and increased capacity of and efficiencies for public services – and the challenges – implementation and operational costs, mission creep, privacy concerns, stigmatisation, whether the technologies work as expected, and useability and wearability for all wearers. This

book is essential reading for academics and students engaged in criminology, criminal justice, socio-legal studies, science and technology studies, medicine, health and social care, psychology, engineering, computer and data science, philosophy, social policy and social work and security studies. It will also be of great interest to policy-makers, regulators, practitioners already deploying or considering using tracking technologies, and to current and potential wearers.

Tracking Humans David Diaz, V. L. McCann, 2013-06-04 Tracker. The very word evokes images of buckskin-clad braves crouching over the ground, carefully studying the signs before them—a part of history. But the modern world has not put behind it the need for the earthy business of tracking. Such skills are still routinely used by the military, rescue personnel, and law enforcement, as well as by hunters and people living at subsistence level throughout the world. *Tracking Humans* is the ultimate authoritative guide to this most complex pursuit. A great resource for military, law enforcement,

and rescue professionals, *Tracking Humans* is also useful for outdoor enthusiasts. Users will find it invaluable as an on-site manual to assist in any ongoing search. Unlike many tracking manuals, this guide focuses on tracking humans, whether they're enemy combatants or lost children. Author David Diaz explains what it takes to be an expert tracker, from the physical stamina to the focus and perception necessary to do the job correctly. He explains the tools of the tracker and presents essential safety tips every tracker should know. *Tracking Humans* is an important tool for anyone dealing with missing persons—it could be an essential lifesaver.

Priests of Our Democracy Marjorie Heins, 2013-02-04 In the early 1950s, New York City's teachers and professors became the targets of massive investigations into their political beliefs and associations. Those who refused to cooperate in the questioning were fired. Some had undoubtedly been communists, and the Communist Party-USA certainly made its share of mistakes, but there was never evidence that the accused teachers had abused their trust. Some were among the most brilliant, popular, and dedicated educators in the city. *Priests of Our Democracy* tells of the teachers and professors who resisted the witch hunt, those who collaborated, and those whose battles led to landmark Supreme Court decisions. It traces the political fortunes of academic freedom beginning in the late 19th century, both on campus and in the courts. Combining political and legal history with wrenching personal stories, the book details how the anti-communist excesses of the 1950s inspired the Supreme Court to recognize the vital role of teachers and professors in American democracy. The crushing of dissent in the 1950s impoverished political discourse in ways that are still being felt, and First Amendment academic freedom, a product of that period, is in peril today. In compelling terms, this book shows why the issue should matter to every American.

Local Positioning Systems Krzysztof W. Kolodziej, Johan Hjelm, 2017-12-19 *Local Positioning Systems: LBS Applications and Services* explores the possible approaches and technologies to location problems including people and asset tracking, mobile resource management, public safety, and handset location-based services. The book examines several indoor positioning systems, providing detailed case studies of existing applications and

their requirements, and shows how to set them up. Other chapters are dedicated to position computation algorithms using different signal metrics and determination methods, 2D/3D indoor map data and location models, indoor navigation, system components and how they work, privacy, deployment issues, and standards. In detail, the book explains the steps for deploying a location-enabled network, including doing a site-survey, creating a positioning model and floor maps, and access point placement and configuration. Also presented is a classification for network-based and ad-hoc positioning systems, and a framework for developing indoor LBS services. This comprehensive guide will be invaluable to students and lecturers in the area of wireless computing. It will also be an enabling resource to developers and researchers seeking to expand their knowledge in this field.

In addition to presenting state-of-the-art research, the book reviews the historical origins of the different existing methods, and predicts future trends and challenges. Features: with a Foreword by Professor Larry Davis; contains contributions from an international selection of leading authorities in the field; includes an extensive glossary; discusses the problems associated with detecting and tracking people through camera networks; examines topics related to determining the time-varying 3D pose of a person from video; investigates the representation and recognition of human and vehicular actions; reviews the most important applications of activity recognition, from biometrics and surveillance, to sports and driver assistance.

IMDC-IST 2021 Abd-Alhameed Raed,A. Al-Hussaibi Walid,Rana Zubo,2022-01-26 This book contains the proceedings of the Second International Conference on Integrated Sciences and Technologies (IMDC-IST-2021). Where held on 7th–9th Sep 2021 in Sakarya, Turkey. This conference was organized by University of Bradford, UK and Southern Technical University, Iraq. The papers in this conference were collected in a proceedings book entitled: Proceedings of the second edition of the International Multi-Disciplinary Conference Theme: “Integrated Sciences and Technologies” (IMDC-IST-2021). The presentation of such a multi-discipline conference provides a lot of exciting insights and new understanding on recent issues in terms of

Green Energy, Digital Health, Blended Learning, Big Data, Meta-material, Artificial-Intelligence powered applications, Cognitive Communications, Image Processing, Health Technologies, 5G Communications. Referring to the argument, this conference would serve as a valuable reference for future relevant research activities. The committee acknowledges that the success of this conference are closely intertwined by the contributions from various stakeholders. As being such, we would like to express our heartfelt appreciation to the keynote speakers, invited speakers, paper presenters, and participants for their enthusiastic support in joining the second edition of the International Multi-Disciplinary Conference Theme: “Integrated Sciences and Technologies” (IMDC-IST-2021). We are convinced that the contents of the study from various papers are not only encouraged productive discussion among presenters and participants but also motivate further research in the relevant subject. We appreciate for your enthusiasm to attend our conference and share your knowledge and experience. Your input was important in ensuring the success of our conference. Finally, we hope that this conference serves as a forum for learning in building togetherness and academic networks. Therefore, we expect to see you all at the next IMDC-IST.

Proceedings of the 8th International Conference on Computational Science and Technology Rayner Alfred,Yuto Lim,2022-03-25 This book gathers the proceedings of the Seventh International Conference on Computational Science and Technology (ICCST 2021), held in Labuan, Malaysia, on 28–29 August 2021. The respective contributions offer practitioners and researchers a range of new computational techniques and solutions, identify emerging issues, and outline future research directions, while also showing them how to apply the latest large-scale, high-performance computational methods.

Studies of Welfare Populations National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on Data and Methods for Measuring the Effects of Changes in Social Welfare Programs,2002-01-20 This volume, a companion to *Evaluating Welfare Reform in an Era of Transition*, is a collection of papers on data collection issues for welfare and low-income populations. The papers on survey issues cover methods for designing surveys taking into account nonresponse in advance, obtaining high response rates in telephone surveys, obtaining high response rates in in-person surveys, the effects of incentive payments, methods for adjusting for missing data in surveys of low-income populations, and measurement error issues in surveys, with a special focus on recall error. The papers on administrative data cover the issues of matching and cleaning, access and confidentiality, problems in measuring employment and income, and the availability of data on children. The papers on welfare leavers and welfare dynamics cover a comparison of existing welfare leaver studies, data from the state of Wisconsin on welfare leavers, and

data from the National Longitudinal Survey of Youth used to construct measures of heterogeneity in the welfare population based on the recipient's own welfare experience. A final paper discusses qualitative data.

Atomic Habits James Clear, 2018-10-16 The #1 New York Times bestseller. Over 10 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

Arctic Menace Kenneth Andrus, 2021-09-30 A Chinese sub in American waters. Rare elements every nation wants. Can Parkos prevent an environmental apocalypse--and a world war? National Security Analyst Nick Parkos, still recovering from the Amber Dawn incident, uncovers a plot to control the US supply of rare earth elements vital to its military-defense systems. Teaming with former Navy SEAL Geoffrey Lange, he travels to Cape Lisberne, just off the coast of Alaska, to investigate. What he doesn't know is that a foreign mastermind is actively working behind the scenes to

discredit Parkos and hide the truth. The situation soon escalates, and Parkos unearths evidence that a foreign power plans to explode a radioactive radiation dispersal device in Alaska, killing thousands and making the rare elements unobtainable. With time quickly running out, Parkos puts his life on the line to stop them from detonating the bomb. With the world watching and peace hanging in the balance, Parkos stares into the face of his greatest challenge. Kenneth Andrus' third Defenders novel is a thrilling roller-coaster ride based on his expert knowledge of the current military-political world. If you like breathtaking action based on real-world scenarios, you won't want to miss Arctic Menace.

Innovations in Applied Artificial Intelligence Floriana Esposito, 2005-06-28 "Intelligent systems are those which produce intelligent outputs." AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real-life problems. The 18th International Conference on Industrial & Engineering Applications of Artificial Intelligence & Expert Systems (IEA/AIE 2005) held in Bari, Italy presented such work performed by many scientists worldwide. The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research. The Committee enforced the rule that only original and unpublished work could be considered for inclusion in these proceedings. The Program Committee selected 116 contributions from the 271 submitted papers which cover the following topics: artificial systems, search engines, intelligent interfaces, knowledge discovery, knowledge-based technologies, natural language processing, machine learning applications, reasoning technologies, uncertainty management, applied data mining, and technologies for knowledge management. The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a research activity clearly aimed at consolidating the theoretical results that have already been achieved. The conference program also included two invited lectures, by Katharina Morik and Roberto Pieraccini. Many people contributed in different ways to the success of the conference and to this volume. The authors who continue to show their enthusiastic interest in applied intelligence research are a very important part of our success. We highly appreciate the contribution of the members of the Program Committee, as well as others who reviewed all the submitted papers with efficiency and dedication.

The Future of Identity in the Information Society Simone Fischer-Hübner, Penny Duquenoy, Albin Zuccato, Leonardo Martucci, 2010-08-25 The increasing diversity of Information Communication Technologies and their equally diverse range of uses in personal, professional and official capacities raise challenging questions of identity in a variety of contexts. Each communication exchange contains an identifier which may, or may not, be intended by the parties involved. What constitutes an identity, how do new technologies affect identity, how do we manage identities in a globally networked information society? From the 6 to the 10 August 2007, IFIP (International Federation for Information Processing) working groups 9.2 (Social Accountability), 9.6/11.7 (IT Misuse and the Law) and 11.6 (Identity Management) hold their 3rd International Summer School on The Future of Identity in the Information Society in cooperation with the EU Network of Excellence FIDIS at Karlstad University. The Summer School addressed the theme of Identity Management in relation to current and future technologies in a variety of contexts. The aim of the IFIP summer schools has been to introduce participants to the social implications of Information Technology through the process of informed discussion. Following the holistic approach advocated by the involved IFIP working groups, a diverse group of participants ranging from young doctoral students to leading researchers in the field were encouraged to engage in discussion, dialogue and debate in an informal and supportive setting. The interdisciplinary, and international, emphasis of the Summer School allowed for a broader understanding of the issues in the technical and social spheres.
