What Stays in Vegas Adam Tanner,2014-09-02 The greatest threat to privacy today is not the NSA, but good-old American companies. Internet giants, leading retailers, and other firms are voraciously gathering data with little oversight from anyone. In Las Vegas, no company knows the value of data better than Caesars Entertainment. Many thousands of enthusiastic clients pour through the ever-open doors of their casinos. The secret to the company's success lies in their one unrivaled asset: they know their clients intimately by tracking the activities of the overwhelming majority of gamblers. They know exactly what games they like to play, what foods they enjoy for breakfast, when they prefer to visit, who their favorite hostess might be, and exactly how to keep them coming back for more. Caesars'

dogged data-gathering methods have been so successful that they have grown to become the world's largest casino operator, and have inspired companies of all kinds to ramp up their own data mining in the hopes of boosting their targeted marketing efforts. Some do this themselves. Some rely on data brokers. Others clearly enter a moral gray zone that should make American consumers deeply uncomfortable. We live in an age when our personal information is harvested and aggregated whether we like it or not. And it is growing ever more difficult for those businesses that choose not to engage in more intrusive data gathering to compete with those that do. Tanner's timely warning resounds: Yes, there are many benefits to the free flow of all this data, but there is a dark, unregulated, and destructive netherworld as well.

Arachnid 2.0 Lee Gabel,2019-09-23 Spiders. Over 35,000 species. Every person on Earth eaten in one year. Now there's one more... a ravenous eight-legged hybrid thousands of years in the making and bigger than a dozen burritos. After a summer of exterminator training in New York, Bradley returns home ready to face his senior year with renewed confidence. But fate gets in the way of his grand teenage plans – especially when eight legs attack instead of four. And these aren't your typical, everyday spiders. Their newly acquired taste for raw meat has them casting a wide net over Bradley's sleepy San Fernando suburb. It doesn't take them long to scramble up the food chain. Add a vengeful ex-girlfriend casting a web of lies into the mix, and things get downright sticky. But Detest-A-Pest can't resist a challenge. Sam and O'Connor rejoin Bradley and his inventive friends as they wage war on an infestation of spiders poised to swallow not only the high school, but the neighborhood and everyone within... Arachnid 2.0 is a fast-paced creature feature horror novel, book two of the popular Detest-A-Pest series. Praise for Arachnid 2.0 I am no longer young and usually cannot identify with younger points of view in books. I instantly was catapulted into this world and I loved it. This book had the right amount of realism, gruesomeness and horror.

it is a winner. I did not read the first book and I now regret that. I will buy the third though. Another great one! First there were rats and now spiders. I am so glad the story continues! Not only are the spiders trying to kill everyone, but they have to watch out for one vengeful ex girlfriend. I love all the characters in this series and I love the way new characters have been introduced. If you love creature horror books, definitely read this. The spiders are not your ordinary spiders and they have one objective...kill. With lots of action and some humor thrown in, it will keep you reading on way past your bedtime. The good news...another book is coming in 2020. Got the Ebook yesterday, read it in two days, loved it. The next Stephen King, Can't wait for the next one. I like the subject matter of this series. The creep factor is great! I'm having a great time getting to know this cast of characters, O'Connor is my fav! Everyone should have a pal like her, she cracks me up :) I'm a fan of series books, so I'm looking forward to the next story. folks who are fans of movies like Willard, arachnophobia would dig this series. Although, Books are so much cooler than movies..... I live in the redwoods, and after reading this book, I am paying way more attention to what's in the shadows! This second book in the series takes another step forward from good to great. The characters and the story is something Stephen King would be proud of, don't miss this one!!! Fast-paced horror. Colorful and memorable characters and a great story. Warmly recommended. I loved it!
