Sam Knee

A Scene in Between (Revised Edition) Sam Knee,2021-10

'A glorious photographic compendium of styles and street cultures from a bygone era'. -- The Guardian 'An artist's image and music is inextricably tethered and A Scene In Between draws these threads together beautifully'. -- Vice Magazine 'A visual manifestation of Knee's personal obsession and acute knowledge of the scene - in particular, the underground style - whilst mirroring the general mood of the era'. -- Dazed Magazine A revised edition of this cult classic photographic exploration of 1980s music and fashion. A Scene In Between sets out to excavate the sartorial treasures of the UK's 1980s guitar scenes. Using original archive photography from scenesters, band members and amateur photographers of the time, Sam Knee takes you on a fashion trip through the visual racket of pivotal indie bands including Primal Scream, Spacemen 3, The Smiths, My Bloody Valentine, The Jesus and Mary Chain, Tallulah Gosh, the Vaselines and countless others. Charity shop chic, anoraks, bowlcuts, leather trousers and stripy tees are all de-rigueur in this evocative photographic historical capsule. Seven years on from the release of the first edition, Sam Knee has expanded his photographic contact base, and built a loyal Instagram following of over 60,000 (including many big names in fashion and music). This revised edition features a new cover and intro, interviews with Johnny Marr, Deb Googe and Lawrence from Felt, alongside hundreds of never-seen-before photographs that will delight both fans of Sam's work and new music and fashion aficionados.

Script Effects as the Hidden Drive of the Mind, Cognition, and Culture Hye K. Pae, 2020-10-14 This open access volume reveals the hidden power of the script we read in and how it shapes and drives our minds, ways of thinking, and cultures. Expanding on the Linguistic Relativity Hypothesis (i.e., the idea that language affects the way we think), this volume proposes the “Script Relativity Hypothesis” (i.e., the idea that the script in which we read affects the way we think) by offering a unique perspective on the effect of script (alphabets, morphosyllabaries, or multi-scripts) on our attention, perception, and problem-solving. Once we become literate, fundamental changes occur in our brain circuitry to accommodate the new demand for resources. The powerful effects of literacy have been demonstrated by research on literate versus illiterate individuals, as well as cross-scriptal transfer, indicating that literate brain networks function differently, depending on the script being read. This book identifies the locus of differences between the Chinese, Japanese, and Koreans, and between the East and the West, as the neural underpinnings of literacy. To support the “Script Relativity Hypothesis”, it reviews a vast corpus of empirical studies, including anthropological accounts of human civilization, social psychology, cognitive psychology,

neuropsychology, applied linguistics, second language studies, and cross-cultural communication. It also discusses the impact of reading from screens in the digital age, as well as the impact of bi-script or multi-script use, which is a growing trend around the globe. As a result, our minds, ways of thinking, and cultures are now growing closer together, not farther apart.
