Digital Culture & Society (DCS) Ramón Reichert,Annika Richterich,Pablo Abend,Mathias Fuchs,Karin Wenz,2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

Place Branding Pantea Foroudi,Chiara Mauri,Charles Dennis,T C Melewar,2020-02-06 Place branding as a field of research is still in a state of infancy. This book seeks to address this, offering a theory of place branding based on the tourist experience, keeping in mind the roles of stakeholders, both public and private organisations and DMOs in managing the place brand. Place Branding: Connecting Tourist Experiences to Places seeks to build a customer-based view of place branding through focusing on the individual as a tourist who travels to undertake a memorable experience. The place is the key creator of this experience, which begins well before the travel-to and ends well after the travel-back. Individuals choose the places where to go, collect information on them, ask for advice and suggestions from fellow travellers, give feedback when they come back and talk a lot about their experience, spreading word-of-mouth. The book enables readers to understand how the tourist experience can be managed as a brand. Readers are exposed to a variety of problems, methodological approaches, and geographical areas, which allows them to adapt frames to different contexts and situations. This book is recommended reading for students and scholars of business, marketing, tourism, urban studies and public diplomacy, as well as practitioners, business consultants and people working in public administration and politics.

Using Images to Teach Critical Thinking Skills Diane M. Cordell,2015-11-10 Learn how to teach visual literacy through photography—an easy way for you to combine student interest with resources at hand to enhance a key learning skill. Research indicates that 75 to 90 percent of classroom learning occurs through the visual system, making visual literacy a key component of information literacy and of critical thinking—a requirement throughout the Common Core standards. It's no surprise then that visual literacy is increasingly recognized as a competency that should be part of every student's skill set. Fortunately, this critical skill can be incorporated into existing curriculum, and this book shows you how to do just that. Written for K-12 classroom teachers and librarians, this all-you-need-to-know volume discusses the importance of visual literacy in education and examines how it helps address current learning standards. The book shows you how to use photography and digital images to cultivate critical thinking, inquiry, and information literacy; provides examples of the use of photographic images in the classroom and in real life; and addresses how students can be ethical practitioners in a digital world. In addition, the book includes sample lessons you can easily implement, regardless of your level of technical and photographic expertise. A resource list of photo editing, curation, and museum sites is included.

Library Information Systems Joseph R. Matthews,Carson Block,2019-11-11 Information systems are central to libraries, and managing information systems is critical to serving library communities. Both a textbook for LIS courses and a handbook for practitioners, this volume thoroughly addresses modern libraries' challenges of integrating information technology. Written by Joseph R. Matthews and Carson Block, both experts on library information systems, this book describes the evolution of library information systems, their enabling technologies, and today's dynamic IT marketplace. It explains specific technologies and related topics, including standards and standards organizations, telecommunications and networks, integrated library systems, electronic resource management systems, repositories, authentication and link verification, electronic resources, and nextgen library systems. Readers will also learn the latest about information systems management, covering technology planning, basic technology axioms, the impact of technology on library services, system selection and implementation, system usability, and general technology management. The final section considers current trends and future developments in LIS, including those related to mobile devices and apps as well as the growth of digital libraries.

"[Women, Workers, and Race in LIFE Magazine](#) " Dolores Flamiano,2017-07-05 The tension between social reform photography and photojournalism is examined through this study of the life and work of German ?gr?ansel Mieth (1909-1998), who made an unlikely journey from migrant farm worker to Life photographer. She was the second woman in that role, after Margaret Bourke-White. Unlike her colleagues, Mieth was a working-class reformer with a deep disdain for Life's conservatism and commercialism. In fact, her work often subverted Life's typical representations of women, workers, and minorities. Some of her most compelling photo essays used skillful visual storytelling to offer fresh views on controversial topics: birth control, vivisection, labor unions, and Japanese American internment during the Second World War. Her dual role as reformer and photojournalist made her a desirable commodity at Life in the late 1930s and early 40s, but this role became untenable in Cold War America, when her career was cut short. Today Mieth's life and photographs stand as compelling reminders of the vital yet overlooked role of immigrant women in twentieth-century photojournalism. *Women, Workers, and Race in LIFE Magazine* draws upon a rich array of primary sources, including Mieth's unpublished memoir, oral histories, and labor archives. The book seeks to unravel and understand the multi-layered, often contested stories of the photographer's life and work. It will be of interest to scholars of photography history, women's studies, visual culture, and media history.

The Warhol Economy Elizabeth Currid-Halkett,2020-05-05 Which is more important to New York City's economy, the gleaming corporate office--or the grungy rock club that launches the best new bands? If you said office, think again. In *The Warhol Economy*, Elizabeth Currid argues that creative industries like fashion, art, and music drive the economy of New York as much as--if not more than--finance, real estate, and law. And these creative industries are fueled by the social life that whirls around the clubs, galleries, music venues, and fashion shows where creative people meet, network, exchange ideas, pass judgments, and set the trends that shape popular culture. The implications of Currid's argument are far-reaching, and not just for New York. Urban policymakers, she suggests, have not only seriously underestimated the importance of the cultural economy, but they have failed to recognize that it depends on a vibrant creative social scene. They haven't understood, in other words, the social, cultural, and economic mix that Currid calls the Warhol economy. With vivid first-person reporting about New York's creative scene, Currid takes the reader into the city spaces where the social and economic lives of creativity merge. The book has fascinating original interviews with many of New York's important creative figures, including fashion designers Zac Posen and Diane von Furstenberg, artists Ryan McGinness and Futura, and members of the band Clap Your Hands Say Yeah. The economics of art and culture in New York and other cities has been greatly misunderstood and underrated. The Warhol Economy explains how the cultural economy works--and why it is vital to all great cities.
