Cancer Biomarkers Debmalya Barh, Angelo

Carpi, Mukesh Verma, Mehmet Gunduz, 2014-01-30

Gleaning information from more than 100 experts in the field of cancer diagnosis, prognosis, and therapy worldwide, *Cancer Biomarkers: Non-Invasive Early Diagnosis and Prognosis* determines the significance of clinical validation approaches for several markers. This book examines the use of noninvasive or minimally invasive molecular cancer markers that are under development or currently in use. It deals with a majority of commonly prevalent cancers and can help anyone working in the health-care industry to recommend or develop early diagnostics, at-risk tests, and prognostic biomarkers for various cancers. It explores the practice of determining biomarkers by their characteristics and relative methodologies, and presents the most recent data as well as a number of current and upcoming early diagnostic noninvasive molecular markers for many common cancers. It also considers the sensitivity and specificity of markers, biomarker market, test providers, and patent information. Approximately 30-35 Cancer Specific Noninvasive Molecular Diagnostic Markers in a Single Volume The book details the general and technical aspects of noninvasive cancer markers. It covers imaging, cutting-edge molecular technologies for biomarker development, and noninvasive or minimally invasive sources of molecular markers, as well as quality control and ethical issues in cancer biomarker discovery. It also provides a detailed account of brain, head and neck, and oral cancer markers, and

provides information on a number of gastrointestinal cancers, lung cancer, and mesothelioma markers. Emphasizes the Importance of Volatile Markers in Early Cancer Diagnosis Presents noninvasive early molecular markers in urological cancers Describes gynecological and endocrine cancer markers Details noninvasive markers of breast, ovarian, cervical, and thyroid cancers Addresses hematological malignancies Contains information on noninvasive molecular markers in myelodysplastic syndromes, acute myeloid leukemia, Hodgkin's lymphoma, and multiple myeloma Provides comprehensive information on diagnostic and prognostic biomarkers in cutaneous melanoma This text considers molecular technologies for biomarker development, noninvasive or minimally invasive sources of molecular markers, and quality control and ethical issues in cancer biomarker discovery.

Early-stage Lung Cancer Xiangpeng Zheng,Ming Li,Guozhen Zhang,2018-01-30 This book discusses major issues and advances in the diagnosis and treatment of incidentally detected early-stage lung cancer (ESLC). In Part I, pathology and radiology experts comprehensively review the state-of-the-art advances in individual research fields, and offer an update on the cross-sectional anatomy of the lung and post-processing techniques for CT imaging. Part II focuses on the imaging features, differential diagnosis and radiologic-pathologic correlations of ESLCs in the categories

pGGN, mGGN and solid nodules in compliance with the Guidelines on Lung Cancer Screening from the National Comprehensive Cancer Network (NCCN). Part III briefly introduces therapeutic management strategies for ESLCs, including surgical and non-surgical approaches, for instance stereotactic ablative radiation therapy (SABR) and radiofrequency ablation (RFA). Lastly, the authors have meticulously prepared 50 clinical cases of pathologically proven benign and malignant pulmonary nodules with in-depth discussion and experts' comments to further readers' understanding of practical imaging and management strategies of ESLCs.

Making Employee-Driven Innovation Achievable

Justina Tan,Wing On Lee,2023-07-14 This volume guides workplace trainers in teaching the significance of Employee-Driven Innovation (EDI) and recognising that each and every employee is capable of being the driver of innovation. Given that innovation has become imperative to unlock competitive advantage, and that employees are increasingly regarded as a quintessential aspect of innovation, this focus on EDI and how to enable it is both necessary and opportune. The book is split into three parts: first focusing on helping trainers to address the challenges of getting employees to engage in innovative work besides their regular job tasks. How can organisations instil this mindset in their employees who see themselves as stalwarts of status quo? The book then turns to how organisations can engage employees in innovation, with an accompanying emphasis that the enactment of EDI may not follow a prescribed or planned flow. It then closes by offering real-world examples of the unfolding of EDI in both the Finnish and Singaporean contexts. The book is aimed at educating enterprises, both employers and workplace trainers, and adult educators in the practices and approaches to engage employees in innovation. It seeks to bridge, specifically the theory-practice nexus of EDI, and nudge the enterprises and TAE (training

and adult education) practitioners that have yet to involve or engage employees systematically in innovation to seriously consider it.

Social Contagion as a Driver of Digital Product Use
Gábor Darvasi, 2019-06-28 Social contagion is ubiquitous in the day-to-day lives of consumers. Whether at home with their families, at work with colleagues, spending leisure time with friends, or even when only surrounded by strangers, consumers are always exposed to and influenced by the actions of others. The wide-scale use of digital communication technologies and online social networks has further exacerbated this influence by enabling more varied and intense ways to connect and interact. In the three essays constituting this dissertation, we ask how marketers and product designers can purposefully use social product design features to achieve superior managerial outcomes by harnessing social contagion. The first essay delineates the state-of-the-art research on social contagion by systematically mapping the moderators of social contagion. The first essay delineates the state-of-the-art research on social contagion by systematically mapping the moderators of social contagion and identifies avenues for future research. In the second essay, we identify social contagion through geographic contiguity in the repeated use of a low-involvement digital service and show that it can be nearly completely crowded

out by marketing communication. In the last essay, we demonstrate that product design features can be used to induce joint consumption which in turn leads to social contagion and ultimately an increased level of product use.
