Oxford Handbook of Internet Psychology Adam Joinson,Katelyn McKenna,Tom Postmes,Ulf-Dietrich Reips,2009-02-12 Over one billion people use the Internet globally. Psychologists are beginning to understand what people do online, and the impact being online has on behaviour. It's making us re-think many of our existing assumptions about what it means to be a social being. For instance, if we can talk, flirt, meet people and fall in love online, this challenges many of psychology's theories that intimacy or understanding requires physical co-presence. The Oxford Handbook of Internet Psychology brings together many of the leading researchers in what can be termed 'Internet Psychology'. Though a very new area of research, it is growing at a phenomenal pace. In addition to well-studied areas of investigation, such as social identity theory, computer-mediated communication and virtual communities, the volume also includes chapters on topics as diverse as deception and misrepresentation, attitude change and persuasion online, Internet addiction, online relationships, privacy and trust, health and leisure use of the Internet, and the nature of interactivity. With over 30 chapters written by experts in the field, the range and depth of coverage is unequalled, and serves to define this emerging area of research. Uniquely, this content is supported by an entire section covering the use of the Internet as a research tool, including qualitative and quantitative methods, online survey design, personality testing, ethics, and technological and design issues. While it is likely to be a popular research resource to be 'dipped into', as a whole volume it is coherent and compelling enough to act as a single text book. The Oxford Handbook of Internet Psychology is the definitive text on this burgeoning field. It will be an essential resource for anyone interested in the psychological aspects of Internet use, or planning to conduct research using the 'net'.

Politics: Last Act of Defiance Scott Bolinger,2021-10-14 Introduction This book was started based on my fight against a corrupt government. I served on a community board and ran for several public offices. The local city government and city council did not like my campaigns so I became a political target. I took a lot of heat from the local government for several years with them interfering with my business and my everyday life. I had to put up with their misinformation and defamatory campaigns. After a couple of years of being attacked regularly, I decided that I should start recording every encounter. A couple of encounters is not a big deal. 50 encounters start to become a big deal. So I started collecting all documents to prepare for a possible suit against the city. After several years of taking heat and the government's refusal to let up, I figure they were not going to go away. The local government made me a political target which destroyed both my reputation and business. I had put up with the city creating misinformation about me and my business. I was harassed, segregated, and ostracized and they put me in a position that forced me to consider packing up and moving out of town or to fight back. This book goes through many of the battles I went through. It also goes through many of the policies that I have sent to local, state, and federal lawmakers to help promote change. I also go through several research analyses that I had conducted. I hope that this book will help serve as inspiration for people to keep fighting and if that doesn't work, then fight smart.
