Electronic Monuments Gregory L. Ulmer,2005 While corporations, governmental groups, and public relations firms debated the best way to memorialize the event of 9/11, sites of commemoration could be seen across the country and especially on the Internet. Greg Ulmer suggests that this reality points us to a new sense of monumentality, one that is collaborative in nature rather than iconic. From a do-it-yourself Mount Rushmore to an automated tribute to the devastating annual toll of traffic deaths in the United States, *Electronic Monuments* describes commemoration as a fundamental experience, joining individual and collective identity, and adapting both to the emerging apparatus of "electracy," or digital literacy. Concerns about the destruction of civic life caused by the society of the spectacle are refocused on the question of how a collectivity remembers who or what it is. Ulmer proposes that the Internet makes it possible for monumentality to become a primary site of self-knowledge, one that supports a new politics, ethics, and dimension of education. The Internet thus holds the promise of bringing citizens back into the political equation as witnesses and monitors. Gregory L. Ulmer is professor of English and media studies at the University of Florida, Gainesville.

Writing History in the Digital Age Jack Dougherty,Kristen

Nawrotzki,2013-10-28 *Writing History in the Digital Age* began as a one-month experiment in October 2010, featuring chapter-length essays by a wide array of scholars with the goal of rethinking traditional practices of researching, writing, and publishing, and the broader implications of digital technology for the historical profession. The essays and discussion topics were posted on a WordPress platform with a special plug-in that allowed readers to add paragraph-level comments in the margins, transforming the work into socially networked texts. This first installment drew an enthusiastic audience, over 50 comments on the texts, and over 1,000 unique visitors to the site from across the globe, with many who stayed on the site for a significant period of time to read the work. To facilitate this new volume, Jack Dougherty and Kristen Nawrotzki designed a born-digital, open-access platform to capture reader comments on drafts and shape the book as it developed. Following a period of open peer review and discussion, the finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) how digital and emergent technologies have changed the ways that historians think, teach, author, and publish--

Robert Browning's Language Donald S. Hair,1999-12-15 What are the influences that shaped the language used by one of the nineteenth century's greatest writers? How did his religious beliefs, the books he owned, the paintings and music he loved, affect almost sixty years' output of poems, plays, essays, and letters? This book attempts to define Browning's understanding of the nature and use of words and syntax by considering not only a full range of texts from the 1833 *Pauline* to the 1889 *Asolando*, but also the ideas important to Browning, the historical context in which he lived, and the other artistic passions that played a part in his life. In this companion volume to Tennyson's *Language*, Donald Hair establishes Browning's place at the crossroads between empirical and idealist traditions and explains his double view of language, arguing that both Locke and the Congregationalists found language to be at the same time empty and a God-given essential. The Victorian age's anti-theatrical bias, which Browning came to share, and his reading of predecessors, principally Quarles, Bunyan, Donne, and Smart, also shaped his understanding of the diction of poetry. Hair conceives of Browning's language as a theoretical whole, encompassing words, genres, rhyme, syntax, and phonetics. He also links Browning's interest in music with his rhyming, the most essential and characteristic

feature of his prosody, and relates his interest in painting to the interpretation of the visual image in the emblem and in typology.

Image Control Patrick Nathan,2022-08-09 Susan Sontag meets Hanif Abdurraqib in this fascinating exploration of the unexpected connections between how we consume images and the insidious nature of Fascism. Images come at us quickly, often without context. A photograph of Syrian children suffering in the wake of a chemical attack segues into a stranger's pristine Instagram selfie. Before we can react to either, a new meme induces a laugh and a share. While such constant give and take might seem innocent, even entertaining, this barrage of content numbs our ability to examine critically how the world, broken down into images, affects us. Images without context isolate us, turning everything we experience into mere transactions. It is exactly this alienation that leaves us vulnerable to fascism—a reactionary politics that is destroying not only our lives and our nations, but also the planet's very ability to sustain human civilization. Who gets to control the media we consume? Can we intervene, or at least mitigate the influence of constant content? Mixing personal anecdotes with historical and political criticism, *Image Control* explores art, social media, photography, and other visual mediums to understand how our culture and our actions are manipulated, all the while building toward the idea that if fascism emerges as aesthetics, then so too can anti-fascism. Learning how to ethically engage with the world around us is the first line of defense we have against the forces threatening to tear that world apart.
