Digital Content Creation in Schools Karen S. Ivers, Ann E. Barron, 2014-12-17 Discover how digital content creation supports 21st-century learning, providing new insights into organizing, synthesizing, and evaluating information. This practical guide will make it easy for you to engage your students through this powerful communications medium. Digital content creation supports the Common Core State Standards (CCSS) and 21st-century learning skills by helping students use their knowledge to analyze, create, solve problems, communicate, collaborate, and innovate. This update of the popular Multimedia Projects in Education, Fourth Edition emphasizes digital content creation and the use of the CCSS as benchmarks to help you create cutting-edge classroom instruction. The book begins by presenting research on student learning through multimedia and digital content creation. This introduction is followed by outlines of each stage of the practical, easy-to-use Decide, Design, Develop, and Evaluate (DDD-E) model, which is designed specifically for classroom use. Content also includes discussion of multiple intelligences, constructivist learning, and cooperative grouping; blackline masters to guide you and your students through the DDD-E process; and assessment and management strategies. In addition, you'll find sample activities using an array of development tools, information on mobile and web apps, and numerous other resources to support digital projects in your classroom. The book, which is most applicable to students in grades 4 through 12, will also serve as an ideal resource for media specialists who work with teachers and students.

The impact of art therapy on mental health and well-being Helena José, Joao Apostolo, Luciano Vitorino, Luis Manuel Mota de Sousa, Martina Giusti, 2023-12-22 In 2019 the WHO came out with a scoping review related to the evidence on the role of the arts in improving health and well-being. In the last yeast, in fact, literature has recognized the direct and indirect benefits of art in the prevention and promotion of mental and physical health and in the management and treatment of disease. Although some countries have made progress in developing policies that make use of the arts to support health and well-being, many have not yet addressed the opportunities that exist for using the arts to support health, and for others policy activities have been time limited. Nonetheless, the relationship between art and health has existed since the birth of medicine itself and has strongly influenced its history and its evolution. Art therapy is the main expression of art in health care. The integration of art in traditional health assistance paths sustains the need to have a holistic approach to health, wellness, and well-being both of patients and other stakeholders, including caregivers and healthcare professionals. Currently the main area of art therapy application is mental health with especially regards to disability, both in developmental age and in elderly and both to cognitive and physical impairment and dementia. However, it is important to remark that mental health does not only refer to mental illness, but also to people's emotional, psychological, and social well-being. These last cases have particularly worsened with the long lockdown periods due to the COVID-19 pandemic.
