Leo Laporte's Technology Almanac Leo Laporte, Michael Miller, 2005 Leo Laporte is TV and radio's most recognized and prolific technology personality, best known for his humor, wit and ability to teach both newcomers and grizzled PC veterans. In Leo Laporte's 2006 Technology Almanac, Leo provides a year's worth of anecdotes, tips, factoids, and musings about the machines at the center of your life. A page is devoted to each day of the year, and each page includes several elements: typically a single-topic essay that takes up most of the page (on subjects as varied as ergonomics, Easter eggs in popular programs, processor overclocking, and discount-travel Web sites), and hints, tips, references to worthwhile software, and goofy trivia.

The Google Story (2018 Updated Edition) David A. Vise, Mark Malseed, 2005-11-15 The definitive, bestselling account of the company that changed the way we work and live, updated for the twentieth anniversary of Google's founding with analysis of its most recent bold moves to redefine the world—and its even more ambitious plans for the future. Moscow-born Sergey Brin and Midwest-born Larry Page dropped out of graduate school at Stanford University to, as they said, “change the world” through a powerful search engine that would organize every bit of information on the Web for free. The Google Story takes you deep inside the company's wild ride from an idea that struggled for funding in 1998 to a firm that today rakes in billions in profits. Based on scrupulous research and extraordinary access to Google, this fast-moving narrative reveals how an unorthodox management style and a culture of innovation enabled a search-engine giant to shake up Madison Avenue, clash with governments that accuse it of being a monopoly, deploy self-driving cars to forever change how we travel, and launch high-flying Internet balloons. Unafraid of controversy, Google is surging ahead with artificial intelligence that could cure diseases but also displace millions of people from their jobs, testing the founders' guiding mantra: DON'T BE EVIL. Praise for The Google Story “[The authors] do a fine job of recounting Google's rapid rise and explaining its search business.”—The New York Times “An intriguing insider view of the Google culture.”—Harvard Business Review “An interesting read on a powerhouse company . . . If you haven't read anything about one of today's most influential companies, you should. If you don't read The Google Story, you're missing a few extra treats.”—USA Today “Fascinating . . . meticulous . . . never bogs down.”—Houston Chronicle

**Photography Is** Mishka Henner,2015 Photography Is presents more than 3,000 phrases that define one of the most democratic and ubiquitous of all art forms. Lost and Living (In) Archives: Collectively Shaping New Memories Annet Dekker,2017-11-21 An archive is a collection of documents and records that is preserved for historical purposes. As such, an archive is considered a site of the past, a place that contains traces of a collective memory of a nation, a people or a group. Digital archives have changed from stable entities into flexible systems, referred to with the term 'Living Archives'. But in which ways has this change affected our relationship to the past, present and future? Will the erased, forgotten and neglected be redeemed, and new memories be allowed? Will the fictional versus factual mode of archiving offer the democracy that the public domain implies, or is it another way for public instruments of power to operate? 'Lost and Living (in) Archives' shows that an archive is not simply a recording, a reflection, or an image of an event, but that it shapes the event itself and thus influences both present and past.

**Googled** Ken Auletta, 2009-11-03 A revealing, forward-looking examination of the outsize influence Google has had on the changing media Landscape. There are companies that create waves and those that ride or are drowned by them. As only he can, bestselling author Ken Auletta takes readers for a ride on the Google wave, telling the story of how it formed and crashed into traditional media businesses?from newspapers to books, to television, to movies, to telephones, to advertising, to Microsoft. With unprecedented access to Google?s founders and executives, as well as to those in media who are struggling to keep their heads above water, Auletta reveals how the industry is being disrupted and redefined. Using Google as a stand-in for the digital revolution, Auletta takes readers inside Google?s closed-door meetings and paints portraits of Google?s notoriously private founders, Larry Page and Sergey Brin, as well as those who work with?and against?them. In his narrative, Auletta provides the fullest account ever told of Google?s rise, shares the ?secret sauce? of Google?s success, and shows why the worlds of ?new? and ?old? media often communicate as if residents of different planets. Google engineers start from an assumption that the old ways of doing things can be improved and made more efficient, an approach that has yielded remarkable results? Google will generate about \$20 billion in advertising revenues this year, or more than the combined prime-time ad revenues of CBS, NBC, ABC, and FOX. And with its ownership of YouTube and its mobile phone and other initiatives, Google CEO Eric Schmidt tells Auletta his company is poised to become the world?s first \$100 billion media company. Yet there are many obstacles that threaten Google?s future, and opposition from media companies and government regulators may be the least of these. Google faces internal threats, from its burgeoning size to losing focus to hubris. In coming years, Google?s faith in mathematical formulas and in slide rule logic will be tested, just as it has been on Wall Street. Distilling the knowledge accrued from a career of covering the media, Auletta will offer insights into what we know, and don?t know, about what the future holds for the imperiled industry.
