Active Learning Through Drama, Podcasting, and Puppetry Kristin Fontichiaro,2007-03-30 Contrary to the trend to do away with arts education as an unnecessary expense in schools trying to boost student test scores, this book promotes and explains the value of integrated arts instruction in furthering the accomplishment of curricular objectives and fostering student achievement. Accomplished library media specialist and arts instructor Kristin Fontichiaro discusses how drama, shadow puppetry, and podcasting can be used as tools to meet curriculum objectives in the K-8 media center. By concentrating on the process of creating a piece of drama or puppetry or a podcast, as opposed to the goal of performance, and by infusing the arts with curriculum objectives in story or research, these techniques can intensify a child's learning and provide context for classroom curriculum objectives. A discussion of the affective and academic benefits of this process-based work as well as sample lessons are included. Photographs and examples of student work illustrate the oechniques. Grades K-8.

Subject To Change: Creating Great Products & Services for an Uncertain World Peter Merholz,Todd Wilkens,Brandon Schauer,David Verba,2008-04-15 To achieve success in today's ever-changing and unpredictable markets, competitive businesses need to rethink and reframe their strategies across the board. Instead of approaching new product development from the inside out, companies have to begin by looking at the process from the outside in, beginning with the customer experience. It's a new way of thinking-and working-that can transform companies struggling to adapt to today's environment into innovative, agile, and commercially successful organizations. Companies must develop a new set of organizational competencies: qualitative customer research to better understand customer behaviors and motivations; an open design process to reframe possibilities and translate new ideas into great customer experiences; and agile technological implementation to quickly prototype ideas, getting them from the whiteboard out into the world where people can respond to them. In Subject to Change: Creating Great Products and Services for an Uncertain World, Adaptive Path, a leading experience strategy and design company, demonstrates how successful businesses can-and should-use customer experiences to inform and shape the product development process, from start to finish.
