The 170 page study gives detailed spending data on capital spending plans, and plans for redevelopment of children and teen areas, patron access areas, special purpose rooms, technology centers, overall patron seating and access to workstations and broadband, as well as data on plans for parking, landscaping, roof and floor development, staff only areas and many other considerations in public library space use and redesign.

Defending Professionalism Bill Crowley, 2012-05-15 This book provides overdue guidance for demonstrating and preserving library, information, knowledge, and archival professionalism in American, British, and Canadian communities and organizations. There is no longer any way to deny or to escape the responsibility of marketing services and being an advocate for one's profession. Practitioners also need effective arguments and approaches for combating library and information deprofessionalization. This book offers the antidote for ineptitude in the fight to preserve professionalism in all major library and information environments. Composed of 14 chapters written by contemporary practitioners and practitioners-turned-theorists, *Defending Professionalism: A Resource for Librarians, Information Specialists, Knowledge Managers, and Archivists* clearly justifies the employment of the professional librarian, information specialist, knowledge manager, and archivist. The contributors offer both short-term and long-term political, cultural, and other approaches for the ongoing effort to retain and expand professionalism. The book provides managers, funding authorities, educators, and practitioners with practical, political, and theoretical reasons why it is in their self-interest to employ professionally educated personnel for positions within

libraries, information or knowledge management centers, and archives.
