*A Pig in the Rumble Seat* Edward J. Hujsak, Sr.,2008-10-01 *A Pig in the Rumble Seat* is a collection of short stories covering memoirs and tales of the New England area during the 1930's depression era, memoirs of the author's experiences developing space rockets, science fiction, contemporary tales and a selection of poems from the author's writings. Edward Hujsak is a career rocket engineer who worked on the development of rockets since the 1950's, including the Atlas rocket on which John Glenn orbited Earth.

*You Can Run* Jesse Archer,2013-10-18 From Machu Picchu to a cocaine purchase in a Bolivian jail—and beyond! How do you rough it in extreme South American travels and still dare to be different? *You Can Run: Gay, Glam, and Gritty Travels in South America* follows the intrepid and fantastic—and totally true—adventures of flamboyant gay men through the gritty rough and tough of South America. Author Jesse Archer and his American boyfriend Zane spent nearly two years traveling the continent in search of adventure. And find it they did. Discover incredible individuals like Patricia the pink lady, the Wolfman of Borneo, and Santusa the fanged Chola of a different color. Thrill to the astounding experiences of dodging crocodiles, doing a striptease for a Colombian bathroom bitch, admiring exultant transsexuals caught in a rainstorm, and navigating the most dangerous road in the world. This wild travel chronicle takes you through the real South America with wit, wisdom—and a hot pink wig! An excerpt from *You Can Run*: Gerardo runs off to buy the meat for baiting piranha and then we're in his tin boat out on the choppy Amazon. The humidity and heat on the earth's surface here seems to bounce back into the sky and burst, returning a downpour of rain. Luckily Gerardo's tin can has a roof. Yet for some reason we aren't headed to the jungle, but downriver to a shantytown along the bank. I ask where we are going and Gerardo feebly utters something in Portuguese. I can't make it out. Zane is now convinced I've employed a waterfront gangster. We pull up to a shoddy pier of three planks supported by timbers that rot in the lapping water. “We should have gone with the other one!” Zane decries my flagrant frugality. “See? There's his accomplice.” When Gerardo reappears outside the shack with another man Zane announces he hates to be killed with a cheapskate like me. “I'm gonna

die, washed up over there with all that trash, my body all white and fat and . . . bloated!” zane has exercised too much in his life to die bloated. Dying bloated has just become the worst of all fates. Zane gasps earnestly to his active imagination. “Oh God, please not bloated!” *You Can Run* is a funny, piercing, and poignant examination of memorable outcasts in the third world. Follow some of travel's most different adventure seekers—extreme travelers with a lot of sparkle!

**The Wheezers & Dodgers** Gerald Pawle, 2009-01-15 A rare look inside the Department of Miscellaneous Weapon Development, “a fascinating report on the trials—and some tribulations—of a clandestine world” (Kirkus Reviews). Previously published under the title *The Secret War 1939-1945*, this is a firsthand account of the Admiralty’s Department of Miscellaneous Weapon Development, the so-called “Wheezers and Dodgers,” and the many ingenious weapons and devices it invented, improved or perfected. Gerald Pawle was one of a group of officers with engineering or scientific backgrounds who were charged with the task of winning the struggle for scientific mastery between the Allies and the Germans in what Churchill enthusiastically called “the wizard war.” Their work ranged from early stop-gap weapons like the steam-powered Holman projector, via great success stories like the Hedgehog anti-submarine mortar, to futuristic experiments with rockets, a minefield that could be sown in the sky, and the spectacularly dangerous Great Panjandrum, a giant explosive Catherine-wheel intended to storm enemy beaches. The development of these and many other extraordinary inventions, their triumphs and disasters, is told with panache and humor by Pawle, and a diverse group of highly imaginative and eccentric figures emerge from the pages.

**Piggy Wig and the Great Big Rocket Adventure** Libby Gregg, 2022-11-30 This third book by Libby T. Gregg continues the adventures of Piggy Wig and his friends as they build and blast off into outer space only to encounter trouble. Find out how Piggy Wig and his friends are saved! Libby T. Gregg's granddaughter, Nicolette, captures the beautiful winter scenes and the outer space adventure with delightful color and flare. A great picture book for the imaginative child!

*Knee-Deep in the Dead* Dafydd ab Hugh, Brad Linaweaver, 2016-08-08 From two Nebula nominees—the first novel in a terrifying space epic based on the classic game featuring Marine Corporal Flynn Taggart . . . The Gates were there on Phobos when mankind first arrived. Inert, unyielding, impossibly alien constructs, for twenty years they sat lifeless, mute testaments to their long-vanished creators, their secrets hidden. Then one day, they sprang to life . . . Meet Corporal Flynn

Taggart, United States Marine Corps; serial number 888-23-9912. He's the best warrior the twenty-first century has to offer, which is a damn good thing. Because Flynn Taggart is all that's standing between the hell that just dropped in on Mars and an unsuspecting planet Earth . . .

**Rocket's Puppy Friends** Tad Hills,2021-03-16 Rocket, the star of Tad Hills's New York Times-bestselling picture books, meets some new puppy friends in this brand-new, original board book! Don't miss the animated movie based on the bestselling Rocket books--now airing on PBS! Rocket and his friends, Bella and Owl, go to the farm and meet five puppies. Clover is brown, Snowball is white with a pink nose, Winnie is black, Marigold is golden, and Razzy, the smallest, has gray spots. The puppies show Rocket and his friends around the farm and introduce them to various animals, such as a cow, a pig and some chickens. Once they're done meeting the chickens, Rocket notices that Razzy isn't with them. Where can he be? The friends retrace their steps and ask the various animals if they've seen Razzy, but none of them have. Rocket and his friends finally find the missing puppy, curled in a ball, sound asleep on a bale of hay.

**Corsair** Clive Cussler,Jack Du Brul,2009-03-10 Ex-CIA ship captain Juan Cabrillo leads the crew of the Oregon on a quest to save a kidnapped politician in this adventure in the #1 New York Times-bestselling series. Corsairs are pirates, and pirates come in many different varieties. There are the pirates who fought off the Barbary Coast in the late eighteenth and early nineteenth centuries, the contemporary pirates who infest the waters of Africa and Asia, and the pirates...who look like something else. When the U.S. secretary of state's plane crashes while bringing her to a summit meeting in Libya, the CIA, distrusting the Libyans, hire Juan Cabrillo to search for her, and their misgivings are well founded. The crew locates the plane, but the secretary of state has vanished. It turns out Libya's new foreign minister has other plans for the conference, plans that Cabrillo cannot let happen. But what does it all have to do with a two- hundred- year-old naval battle and the centuries-old Islamic scrolls that the Libyans seem so determined to find? The answers will lead him full circle into history, and into another pitched battle on the sea, this time against Islamic terrorists, and with the fate of nations resting on its outcome.

**50 Animals That Have Been to Space** Jennifer Read,2020-03-06 Since the early days of flight, animals have helped researchers learn how to survive in the sky, and their role continues as humanity voyages into outer space. In 1783, a rooster, a duck and a sheep were placed in a basket attached to the first hot-air balloon. In the age of rockets and space travel, many more animals have travelled into orbit, and most have returned safely to earth. This book tells the stories of 50 trips into space, with details about the animals and the scientists involved. The experiments, often designed by students, originate from many countries. The book offers an appealing introduction to the purposes of space exploration and the possibilities of safe space travel. It encourages young readers to engage in real science like the young people they will read about in this book.

**The Fourth Service** John Slader,2010-06-04 Here at last is the true story of the merchant fleet during World War II, the non-fighting service in which 32,000 men died yet whose essential role has never been fully appreciated. The author, himself a member of the service from 1941-47, relates the stories of merchantmen and their crews with unique insight. From the early days of the war to the day of victory on the Rhine, through combined operations in the Mediterranean and at Normandy, the complete operation of the fleet is examined, with vivid accounts of the horrific losses undergone, the heroism of the crews and the sacrifices endured to ensure that Britain received its essential supplies of food, oil, and raw materials. Highly illustrated, this book will be absorbing for the war historian, maritime enthusiast and general reader alike.
