Phytoplankton María Teresa Sebastiá, 2014 Phytoplankton plays a key role in aquatic ecosystems where it is the major biomass producer. Phytoplankton is characterised by a high time-space variability which is determined by abiotic and biotic factors. In this book, the role of abiotic factors (light, temperature, nutrients, wind, hydrodynamics, CO₂ and UV radiation) and biotic factors (bacteria, zooplankton, macrophytes and fish) is discussed. Anthropogenic pressure can alter those environmental factors, causing undesired changes in the composition and biomass of phytoplankton. This book emphasises the effects on water quality, but bottom sediment is also analysed. The effectiveness of management measures to restore impacted ecosystems is reviewed and ecological modelling is used as a prediction tool. In this book, the authors describe case studies in different systems such as natural lakes, reservoirs, marine systems and aquatic microcosm systems, covering a wide range of geographic areas from African tropical lakes and Brazilian subtropical lakes to peri-Alpine European lakes.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Customer Relationship Management Francis Buttle, 2009 This title presents an holistic view of CRM, arguing that its essence concerns basic business strategy - developing and maintaining long-term, mutually beneficial relationships with strategically significant customers - rather than the

operational tools which achieve these aims.

The Theory of Lexical Phonology K.P. Mohanan, 2012-12-06 This book contains some of the material which originally appeared in my Ph. D. thesis Lexical Phonology, submitted at the Massachusetts Institute of Technology, but it can hardly be called a revised version of the thesis. The theory that I propose here is in many ways radically different from the one that I proposed in the thesis, and there is a great deal of new data and analyses from English and Malayalam. Chapter VI is so new that I haven't even had the time to try it out on my friends. As everyone knows, research is a collective enterprise, even though an individual's name appears on the first page of the book or article. I would think of this book as a joint project involving dozens of people, in which I acted as the project coordinator, collecting suggestions from a wide variety of sources. Four major influences on what the book contains were Morris Halle, Paul Kiparsky, Mark Liberman, and Joan Bresnan. I learned the ropes of doing research on phonology, phonetics, and morphology from them, and almost everything that I discuss in this book owes its shape ultimately to one of them. Among the others who contributed generously to this book are: Jay Keyser, James Harris, Douglas Pulleyblank, Diana Archangeli, Donca Steriade, Elizabeth Selkirk, Francois Dell, Noam Chomsky, Philip Lesourd, Mohammed Guerssel, Michel Kenstovicz, Raj Singh, Will Leben, Joe Perkell, Victor Zue, Paroo Nihalani. P. Madhavan, and Stephanie Shattuck-Hafnagel.

Green Approaches in Medicinal Chemistry for Sustainable Drug Design Bimal Krishna Banik, 2020-03-27 Extensive experimentation and high failure rates are a well-recognised downside to the drug discovery process, with the resultant high levels of inefficiency and waste producing a negative environmental impact. Sustainable and Green Approaches in Medicinal Chemistry reveals how medicinal and green chemistry can work together to directly address this issue. After providing essential context to the growth of green chemistry in relation to drug discovery in Part 1, the book goes on to identify a broad range of practical methods and synthesis techniques in Part 2. Part 3 reveals how medicinal chemistry techniques can be used to improve efficiency, mitigate failure and increase the environmental benignity of the entire drug discovery process, whilst Parts 4 and 5 discuss natural products and microwave-induced chemistry. Finally, the role of computers in drug discovery is explored in Part 6. Identifies novel and cost effective green medicinal chemistry approaches for improved efficiency and sustainability Reflects on techniques for a broad range of compounds and materials Highlights sustainable and green chemistry pathways for molecular synthesis

Tailoring Multiphase and Composite Ceramics Richard E. Tressler, Gary L. Messing, Carlo G. Pantano, Robert E. Newnham, 2012-12-06 The proceedings of the Twenty-First University Conference on Ceramic Science held at The Pennsylvania State University, University Park, PA on July 17, 18 and 19, 1985 are compiled in this volume Tailoring Multiphase and Composite Ceramics. This Conference emphasized the discussion and analysis of the properties of multiphase ceramic materials in which the microstructure is deliberately tailored for specific applications or properties. Internationally recognized authorities presented keynote and invited lectures on topics dealing with processing and fabrication of multiphase and composite electroceramics, fiber reinforced composites and high temperature multiphase ceramics. Results of recent research were presented in oral and poster sessions by leading researchers from several countries. This collection of papers represents the state of the art in our understanding of the processing-structure-property interrelationships for these materials which possess unique and useful electrical, magnetic, optical, mechanical and thermal properties as a result of their multiphase nature. We are grateful for the financial support of the National Science Foundation, the Office of Naval Research, the Air Force Office of Scientific Research, and the Defense Advanced Research Projects Agency for this conference. We gratefully acknowledge Prof. Robert Davis' leadership role in steering and expanding this university conference series on ceramic science. We thank Ron Avillion and Linda Rose for their expert assistance in planning and coordinating the meeting. Thanks are due to Ms. Marian Reed, Ms. Judy Bell and Ms.
