Pink Ribbon Stories Tammy A. Miller, 2011-09-14 A collection of stories from 123 women and men whose lives have been affected by breast cancer.

Pink Ribbon Blues Gayle A. Sulik, 2010-10-28 Medical sociologist Gayle A. Sulik reveals the hidden costs of the pink ribbon as an industry, one in which breast cancer functions as a brand name with a pink ribbon logo. Based on historical and ethnographic research, analysis of awareness campaigns and advertisements, and hundreds of interviews, *Pink Ribbon Blues* shows that while millions walk, run, and purchase products for a cure, cancer rates continue to rise, industry thrives, and breast cancer is stigmatized anew for those who reject the pink ribbon model. Even as Sulik points out the flaws of pink ribbon culture, she outlines the positives and offers alternatives. The paperback includes a new Introduction investigating Susan G. Komen for the Cure and a color insert with images of, and reactions to, the pinking of breast cancer.

Out of the Shadow World Colleen Chao, 2023-05-02 Ten-year-old Pax Jackson doesn't know if he'll make it to his next birthday. He has cancer. And he's about to embark upon an unforgettable adventure. At their favorite climbing tree, Pax and his best friend, Jayni, meet Wilmer—a comical bellbird who introduces them to a magical realm of delightful and bewitching creatures. The children sail a vast sea, navigate a frightening forest, and summit a perilous mountain in search of a mysterious man who might be able to heal Pax. Will they be thwarted by a malevolent weeping willow, a horde of Bumfuzzles, or the dragon snake? The kids face their fears and the lurking evil that threatens to destroy them. And they also contend with their own inner struggles: Pax, wounded by Jayni's ignorance of suffering, and Jayni, resentful of how Pax's illness has changed him. Will the mysterious healer meet their dreams and expectations? Pax and Jayni return to their world with

newfound joy and hope—and a keen awareness of the very real magical world that lies within their shadow world. In *Out of the Shadow World*, Colleen Chao masterfully weaves a tale of suffering and joy. Children will be captivated. Readers develop empathy and a theology of suffering that equips them to both face difficult circumstances and love others who are experiencing hardship.

Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice MiKaela M. Olsen, Kristine B. LeFebvre, Suzanne L. Walker, Elizabeth Prechtel Dunphy, 2022 Oncology nursing is a unique specialty that requires continuous learning to stay up to date on cancer pathophysiology, cutting-edge drugs, and the evidence-based management of cancer and cancer treatment-related toxicities. The Oncology Nursing Society's (ONS's) second edition of *Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice* provides nurses with the tools to understand how medications are used in cancer treatment, the effect of medication-related toxicities, and evidence-based recommendations to manage and treat these toxicities. This edition features many new cancer therapies approved since the 2019 publication. Each drug is categorized as chemotherapy, hormone, targeted, or immunotherapy agents. Extensive drug tables in the book provide nurses with tips for managing patients receiving these drugs. The expansion of oral antineoplastic therapies, alone or in combination with infusion therapy, requires that nurses review a patient's complete cancer treatment plan and consider the side effects, toxicities, and adherence to oral drugs to ensure patient tolerance and efficacy. This second edition has seen content expanded on the topic of genomics as we move forward in the world of personalized oncology. Health equity is approached with information discussing financial distress, cultural disparities, and health literacy. The latest guidelines and recommendations for treatment, symptom management, and survivorship have

been integrated into this new text. This edition features a QR code, provided with the purchase of this book, to download quarterly drug updates. You will see new evidence related to many aspects of cancer nursing care incorporated into this edition, such as hypersensitivity response, safe handling of hazardous drugs, and more. The editors want to thank all of the contributors to this edition who worked tirelessly, despite a pandemic, to make this new edition a reality. This work builds on the knowledge of many generations of oncology nurses and has been used nationally and internationally to guide oncology nursing practice. We are proud to continue to serve oncology nurses worldwide with an essential resource to guide their practice--

The Last Republicans Mark K. Updegrave, 2017-11-21 A groundbreaking look at the lives of George H. W. Bush and George W. Bush, the most consequential father-son pair in American history, often in their own words. In this endearing, illuminating work, presidential historian Mark K. Updegrave tracks the two Bush presidents from their formative years through their post-presidencies and the failed presidential candidacy of Jeb Bush, derailing the Bush presidential dynasty. Drawing extensively on exclusive access and interviews with both Bush presidents, Updegrave reveals for the first time their influences and perspectives on each other's presidencies; their views on family, public service, and America's role in the world; and their unvarnished thoughts on Donald Trump, and the radical transformation of the Republican Party he now leads. In 2016 George W. Bush lamented privately that he might be "the last Republican president." Donald Trump's election marked the end not only to the Bushes' hold on the White House, but of a rejection of the Republican principles of civility and international engagement and leadership that the Bushes have long championed. *The Last Republicans* offers revealing and often moving portraits of the forty-first and forty-third presidents, as well as an elegy for the Republican "establishment," which once stood for putting the interests of the

nation over those of any single man.

The Best Care Possible Ira Byock, 2013-03-05 A doctor on the front lines of hospital care illuminates one of the most important and controversial social issues of our time. It is harder to die in this country than ever before. Though the vast majority of Americans would prefer to die at home—which hospice care provides—many of us spend our last days fearful and in pain in a healthcare system ruled by high-tech procedures and a philosophy to “fight disease and illness at all cost.” Dr. Ira Byock, one of the foremost palliative-care physicians in the country, argues that how we die represents a national crisis today. To ensure the best possible elder care, Dr. Byock explains we must not only remake our healthcare system but also move beyond our cultural aversion to thinking about death. *The Best Care Possible* is a compelling meditation on medicine and ethics told through page-turning life-or-death medical drama. It has the power to lead a new national conversation.

The History of Medical Informatics in the United States Morris F. Collen, Marion J. Ball, 2015-10-08 This is a meticulously detailed chronological record of significant events in the history of medical informatics and their impact on direct patient care and clinical research, offering a representative sampling of published contributions to the field. The History of Medical Informatics in the United States has been restructured within this new edition, reflecting the transformation medical informatics has undergone in the years since 1990. The systems that were once exclusively institutionally driven – hospital, multihospital, and outpatient information systems – are today joined by systems that are driven by clinical subspecialties, nursing, pathology, clinical laboratory, pharmacy, imaging, and more. At the core is the person – not the clinician, not the institution – whose health all these systems are designed to serve. A group of world-renowned authors have joined forces with Dr Marion Ball to bring Dr Collen’s incredible work to press. These recognized leaders in medical informatics, many of whom are recipients of the Morris F. Collen Award in Medical Informatics and were friends of or mentored by Dr Collen, carefully reviewed, editing and updating his draft chapters. This has resulted in the most thorough history of the subject imaginable, and also provides readers with a roadmap for the subject well into later in the century.

The Stop & Go Fast Food Nutrition Guide Steven G. Aldana, 2007 The Stop & Go Fast Food Nutrition Guide shows you how to navigate the fast food maze and choose foods that are actually good for you. The guide uses the colors of the stop light (red, yellow, and green) to help individuals choose foods that lead toward or away from good health. The Stop & Go Fast Food Nutrition Guide is the only guide that shows you how to navigate the fast food maze and identify fast foods that are actually good for you. With the help of a nationally recognized panel of nutrition experts, Dr. Aldana

has color coded almost 3,500 fast foods from 68 different restaurants. Now you can sort through the fast food maze and select the healthy foods and avoid the unhealthy ones. Keep the guide in your glove box for easy access.

Love, Death and Photosynthesis Bela Koe-Krompecher, 2020-02-07 During the heyday of the late '80s indie underground, high school sweethearts Bela Koe-Krompecher and Jenny Mae Leffel moved together from small-town Ohio to the big city of Columbus to pursue education and a dream of something more. When they arrived, the two met Jerry Wick, a prickly malcontent and lead singer of the punk rock band Gaunt, and the trio quickly forged a contentious friendship that would be challenged for the next 20 years by addiction, mental illness, homelessness, divergent whims and tragic paths. They bonded over their obsessive love of music, especially the scrappy, welcoming world of independent labels and bands, where heroes could be a neighbor, a bartender or even a know-it-all behind the counter of a record store. Through the label Koe-Krompecher and Wick launched, and the music Leffel made, these three friends gained fans nationwide and garnered unexpected critical acclaim from The New York Times, Entertainment Weekly, SPIN and more while sharing the stage with bands like Superchunk, Mudhoney and Guided by Voices. At its heart, Love, Death & Photosynthesis is a story of the love between friends and the power of music to pull people together--often in spite of themselves--in the universal search for connection.
