**Encyclopedia of Animals** Jules Howard,2024-04-04 Meet the tiny-but-tough tardigrade and the awe-inspiring blue whale in this illustrated introduction to invertebrates, fish, amphibians, reptiles, birds and mammals. Learn everything about more than 275 species, specially selected by natural historian Jules Howard and brought to life by the detailed artwork of Jarom Vogel. With fact panels breaking down each animal's most unique traits, as well as its habitat, size and diet, every page in *Encyclopedia of Animals* is sure to introduce young readers to their new favourite critter. Beloved species like the African elephant, great white shark and western gorilla get their own dedicated feature page, while more unusual species include the hellbender, Chan's megastick and pink fairy armadillo. Discover the shrimp that punches its prey with superheated water, marvel at the frog whose beating heart can be seen through its skin, and learn about the rarest turtle on the planet. If it bites, crawls, hops, flies, swings from the treetops or dives to the bottom of the ocean, there's a good chance you'll find it in this encyclopedia! And be sure to check out *Encyclopedia of Insects*, a go-to guide crawling with incredible facts about this huge and diverse class of animal.

**The Geography of Bliss** Eric Weiner,2008-01-03 Now a new

series on Peacock with Rainn Wilson, *THE GEOGRAPHY OF BLISS* is part travel memoir, part humor, and part twisted self-help guide that takes the viewer across the globe to investigate not what happiness is, but WHERE it is. Are people in Switzerland happier because it is the most democratic country in the world? Do citizens of Qatar, awash in petrodollars, find joy in all that cash? Is the King of Bhutan a visionary for his initiative to calculate Gross National Happiness? Why is Asheville, North Carolina so damn happy? In a unique mix of travel, psychology, science and humor, Eric Weiner answers those questions and many others, offering travelers of all moods some interesting new ideas for sunnier destinations and dispositions.

### **Geographic Citizen Science Design** Artemis

Skarlatidou, Muki Haklay, 2021-02-04 Little did Isaac Newton, Charles Darwin and other 'gentlemen scientists' know, when they were making their scientific discoveries, that some centuries later they would inspire a new field of scientific practice and innovation, called citizen science. The current growth and availability of citizen science projects and relevant applications to support citizen involvement is massive; every citizen has an opportunity to become a scientist and contribute to a scientific discipline, without having any professional qualifications. With geographic interfaces being the common approach to support collection, analysis and dissemination of data contributed by participants, 'geographic citizen science' is being approached from different angles. Geographic Citizen Science Design takes an anthropological and Human-Computer Interaction (HCI) stance to provide the theoretical and methodological foundations to support the design, development and evaluation of citizen science projects and their user-friendly applications. Through a careful selection of case studies in the urban and non-urban contexts of the Global North and South, the chapters provide insights into the design and interaction barriers, as well as on the lessons learned from the engagement of a diverse set of participants; for example, literate

and non-literate people with a range of technical skills, and with different cultural backgrounds. Looking at the field through the lenses of specific case studies, the book captures the current state of the art in research and development of geographic citizen science and provides critical insight to inform technological innovation and future research in this area.

**How to Ace the National Geographic Bee, Official Study Guide, Fifth Edition** National Geographic, Kids, 2017-08-15 The National Geographic Bee is a local, state, and national academic contest for students in grades four through eight. The competition culminates in a finals face-off, broadcast live on National Geographic Television. This is the ultimate guide for gearing up for the events. Like the Bee, the guide has expanded its range of material to include social studies, earth and space science, the environment, and culture. Of course, geography is at its core, and the guide features the latest country and geographic statistics; selected new question rounds; updated resources; new tips from past winners; and a brand new country index full of vital stats. It's the perfect resource to help millions of school kids prepare to compete in the Bee. It's also a fun and helpful resource for trivia buffs, challenge seekers, and college-bound test-takers.

**Little Kids First Big Book of the World** Elizabeth Carney, 2015 This charming reference introduces young readers to the wider world by exploring languages, landscapes, weather, animals, capital cities, mountains, deserts, and other landscapes and landforms, and more. It encourages kids to get play with activities such as creating a mini-rainforest in a bottle and singing a simple song in Spanish. More than 100 colorful photos are paired with kid-friendly and age-appropriate maps along with basic facts about each continent. This book will quickly become a favorite at storytime, bedtime, or any other time.

*Learning to Think Spatially* National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on

Support for Thinking Spatially: The Incorporation of Geographic Information Science Across the K-12 Curriculum,2005-02-03

Learning to Think Spatially examines how spatial thinking might be incorporated into existing standards-based instruction across the school curriculum. Spatial thinking must be recognized as a fundamental part of K-12 education and as an integrator and a facilitator for problem solving across the curriculum. With advances in computing technologies and the increasing availability of geospatial data, spatial thinking will play a significant role in the information-based economy of the twenty-first century. Using appropriately designed support systems tailored to the K-12 context, spatial thinking can be taught formally to all students. A geographic information system (GIS) offers one example of a high-technology support system that can enable students and teachers to practice and apply spatial thinking in many areas of the curriculum.

*One Square Inch of Silence* Gordon Hempton,John

Grossmann,2009-03-31 In the visionary tradition of Rachel Carson's *Silent Spring*, *One Square Inch of Silence* alerts us to beauty that we take for granted and sounds an urgent environmental alarm. Natural silence is our nation's fastest-disappearing resource, warns Emmy-winning acoustic ecologist Gordon Hempton, who has made it his mission to record and preserve it in all its variety—before these soul-soothing terrestrial soundscapes vanish completely in the ever-rising din of man-made noise. Recalling the great works on nature written by John Muir, John McPhee, and Peter Matthiessen, this beautifully written narrative, co-authored with John Grossmann, is also a quintessentially American story—a road trip across the continent from west to east in a 1964 VW bus. But no one has crossed America like this. Armed with his recording equipment and a decibel-measuring sound-level meter, Hempton bends an inquisitive and loving ear to the varied natural voices of the American landscape—bugling elk, trilling thrushes, and drumming, endangered prairie chickens. He is an equally patient and perceptive listener when talking with people he meets on his journey about the importance of quiet in their lives. By the time he reaches his destination, Washington, D.C., where he meets with federal officials to press his case for natural silence preservation, Hempton has produced a historic and unforgettable sonic record of America. With the incisiveness of Jack Kerouac's observations on the road and the stirring wisdom of Robert Pirsig repairing an aging vehicle and his life, *One Square Inch of Silence* provides a moving call to action. More than simply a book, it is an actual place, too, located in one of America's last naturally quiet places, in Olympic National Park in Washington State.
