We need to talk about waste. Shrink-wrapped vegies, disposable coffee cups, clothes and electronics designed to be upgraded every year: we are surrounded by stuff that we often use once and then throw away. Globally, many individual households produce enough rubbish to fill a three-bedroom home every year. This includes thousands of dollars worth of food and an ever-increasing amount of plastic, which takes hundreds of years to break down and often ends up in our oceans or our food chain. But what to do about such a huge problem? Is it just the price we pay for the conveniences of modern life? What if it were possible to have it both ways – to live a modern life with less waste? That's where Erin Rhoads, aka The Rogue Ginger, comes in. Erin went from eating plastic-packaged takeaway while shopping online for fast fashion, to becoming one of Australia's leading eco-bloggers. **A Cat's Tale** William R. Angus, 2017-11-22 Sometimes, all a person needs to know about life, can come from a charming, know-it-all cat especially when that cat shares the wisdom he's gleaned from his nine-plus lives and his

ability to live blissfully in the moment. This book is a purr-fect read for those seeking insights into the meaning of life. - Michele DeLuca, author of *Forever More: A Love Story from the Edge of Eternity*. *A Cats Tale: Journey of Spiritual Discovery* is a gem due to its rare quality of engaging a wide readership audience. I loved how the story wove itself through time and even my 10 year old enjoyed this special cats wisdom that the author generously dolloped throughout Frankies antics. A must read for all ages eager to tap dance alongside the meaning of life! - Rhonda Bartholomew, Licensed HYL Teacher/Soul Sanctuary Workshop/Retreat Facilitator and Life Coach. This book is a mixture of profundity, hilarity and education. I highly recommend it. Angel, a friend and fellow traveler of Frankie

*Sleeping Naked Is Green* Vanessa Farquharson, 2009-08-06 No one likes listening to smug hippies bragging about how they don't use toilet paper, or worse yet, lecturing about the evils of plastic bags and SUVs. But most of us do want to lessen our ecological footprint. With this in mind, Farquharson takes on the intense personal challenge of making one green change to her lifestyle every single day for a year to ultimately figure out what's doable and what's too hardcore. Vanessa goes to the extremes of selling her car, unplugging the fridge, and washing her hair with vinegar, but she also does easy things like switching to an all-natural lip balm. All the while, she is forced to reflect on what it truly means to be green. Whether confronting her environmental hypocrisy or figuring out the best place in her living room for a compost bin full of worms and rotting cabbage, Vanessa writes about her foray into the green world with self-deprecating, humorous, and accessible insight. This isn't a how-to book of tips, it's not about being eco-chic; it's an honest look at what happens when an average girl throws herself into the murkiest depths of the green movement. Reviews "A humorous, self-deprecating tale of the crazy things that happen to normal people when they take the green plunge. Vanessa Farquharson will have you wanting to try your own experiments, too, because she shows how easy some of these planet-saving changes can be." -Alisa Smith, co-author of *The 100-Mile Diet: A Year of Local Eating* "By spending a year putting the planet's needs as a top priority, Vanessa Farquharson's search for love and connection leads her to happiness she never thought she could know. An entertaining approach to 'greenlightenment,' *Sleeping Naked Is Green* will surely inspire other skeptics to find their inner environmentalist." -Gillian Deacon, author of *Green for Life* "One step a day doesn't seem like much, but over the course of a whole year it adds up to a world of difference. This isn't just a well-written and fun book about going green, it is about watching a personal transformation. Being inspired was never so entertaining." -Lloyd Alter, TreeHugger.com

*Watermelons* James Delingpole, 2012 The shocking story of how an unholy mix of junk science, green hype, corporate greed and political opportunism led to the biggest - and most expensive - outbreak of mass hysteria in history. *Watermelons* explains the Climategate scandal, the cast of characters involved, their motives and methods. He delves into the background of the organisations and individuals who have sought to push global warming to the top of the political agenda, showing that beneath their cloak of green lurks a heart of red. *Watermelons* shows how the scientific method has been sacrificed on the altar of climate alarmism. Delingpole mocks the green movement's record of apocalyptic predictions, reveals the fundamental

misanthropy of green ideology, and gives a refreshing voice to widespread public skepticism over global warming, emphasising that the crisis has been engineered by people seeking to control our lives by imposing new taxes and regulations. Your taxes will be raised, your liberties curtailed and your money squandered to deal with this crisis, he writes. Delingpole argues that climate change is an ideological battle, not a scientific one. Green on the outside, red on the inside, the libertyloathing, humanity-hating watermelons of the modern environmental movement do not want to save the world. They want to rule it -- Publisher description.

**Douglas Adams's Starship Titanic** Terry Jones, 2007-12-18 In this thoroughly satisfying and completely disorienting novel based on a story line by Douglas Adams (author of *The Hitchhiker's Guide to the Galaxy*), Terry Jones recounts an unforgettable tale of intergalactic travel and mishap. The saga of the ship that cannot possibly go wrong sparkles with wit, danger, and confusion that will keep readers guessing which reality they are in and how, on earth, to find their way out again. At the center of the galaxy, a vast, unknown civilization is preparing for an event of epic proportions: the launching of the greatest, most gorgeous, most technologically advanced Starship ever built--the Starship Titanic. An earthling would see it as a mixture of the Chrysler Building, the tomb of Tutankhamen, and Venice. But less provincial onlookers would recognize it as the design of Leovinus, the galaxy's most renowned architect. He is an old man now, and the creation of the Starship Titanic is the pinnacle achievement of his twenty-year career. The night before the launch, Leovinus is prowling around the ship having a last little look. With mounting alarm he begins to find things are not right: unfinished workmanship, cybersystems not working correctly, robots colliding with doors. How could this have happened? And how could this have happened without his knowing? Something somewhere is terribly wrong. On the following day, in an artificial event staged for the media, the Starship Titanic will leave its construction dock under autopilot and, a few days later, make its way to the terminal to pick up passengers for its maiden voyage. Although the ship will be deserted during its very first flight, it is nevertheless a major event, watched by all the galaxy's media. Hugely, magnificently, the fabulous ship eases its way forward from the construction dock, picks up speed, sways a bit, wobbles a bit, veers wildly, and just before it can do massive damage to everything around it, appears to undergo SMEF (Spontaneous Massive Existence Failure). In just ten seconds, the whole, stupendous enterprise is over. And our story has just begun. Somehow three earthlings, one Blerontin journalist, a semideranged parrot, and a shipful of disoriented robots must overcome their differences. It's the only way to save the Starship Titanic (*The Ship That Cannot Possibly Go Wrong*) from certain destruction and rescue the economy of an entire planet--not to mention to survive the latest threat, an attack by a swarm of hostile shipbuilders. . . .

*What's That Pig Outdoors?* Henry Kisor, 2010-10-01 Henry Kisor lost his hearing at age three to meningitis and encephalitis but went on to excel in the most verbal of professions as a literary journalist. This new and expanded edition of Kisor's engrossing memoir recounts his life as a deaf person in a hearing world and addresses heartening changes over the last two decades due to the Americans with Disabilities Act of 1990 and advancements in cochlear implants and modes of communication. Kisor tells of his parents' drive to raise him as a member of the hearing and speaking world by teaching

him effective lip-reading skills at a young age and encouraging him to communicate with his hearing peers. With humor and much candor, he narrates his time as the only deaf student at Trinity College in Connecticut and then as a graduate student at Northwestern University, as well as his successful career as the book review editor at the Chicago Sun-Times and the Chicago Daily News. Life without hearing, Kisor says, has been fine and fulfilling. Widely praised in popular media and academic journals when it was first published in 1990, *What's That Pig Outdoors?* opened new conversations about the deaf. Bringing those conversations into the twenty-first century, Kisor updates the continuing disagreements between those who advocate sign language and those who practice speech and lip-reading, discusses the increased acceptance of deaf people's abilities and idiosyncrasies, and considers technological advancements such as blogging, instant messaging, and hand-held mobile devices that have enabled deaf people to communicate with the hearing world on its own terms.

**Mending Matters** Katrina Rodabaugh, 2018-10-16 This guide explores visible mending techniques in both hands-on projects and thoughtful insight about how mending relates to mindful well-being. *Mending Matters* explores sewing on two levels: First, it includes more than twenty projects that showcase visible mending—styles that are edgy, modern, and bold, yet draw on traditional stitching. It does all this with just four simple mending techniques: exterior patches, interior patches, slow stitches, darning, and weaving. In addition, the book addresses the way mending leads to a more mindful relationship to fashion and to overall well-being. In essays that accompany each how-to chapter, Katrina Rodabaugh explores mending as a metaphor for appreciating our own naturally flawed selves. She also examines the ways in which mending teaches us new skills, self-reliance, and confidence, all gained from making things with our own hands.
