Should the USAF Be Involved in Planetary Defense U. S. Air U.S. Air Force Air Command and Staff College,U.s. Air Force Air Command,2014-06-05 Should the United States Air Force take in the nation's stance on planetary defense? Planetary defense in this paper means protecting the planet and therefore our nation from the impact of large Near Earth Objects (NEOs). This topic is usually relegated to the realm of science fiction movies and books but the consequences of such an impact are too great to ignore and simply dismissing it as impossible. Before addressing the role of the United States Air Force in such project, the problem of a NEO impact is analyzed. First, the paper analyzes the problem itself and discusses the probability that a NEO large enough to cause damage will impact the earth. There is discussion of past NEO impacts during the earth's history and the craters that leave us tell tale signs of these impacts that we can gather data from. Secondly, the effects and consequences of a NEO impact are discussed. This shows the reader how even though the probability may be low, the consequences are so high that we must take a possible NEO impact as a serious matter. The paper then discusses how to predict and prevent an impact. In this chapter there is discussion on what the U.S. and other governments are currently doing to prepare for such an impact. We look at how many objects are cataloged that could possibly strike the earth in the near future and what we're currently doing to give the earth advance warning. Also discussed are possible options to prevent an impact once a NEO is discovered to be on a collision course with the earth. Finally the problem solution method is used to analyze what U.S. government agencies should have a role in planetary defense, including those that are already contributing or those that do not have a role. The conclusion reached is that the United States Air Force should play an increasing role in planetary defense. The Air Force possesses unique tracking, weapon and space launch capabilities that could greatly aid in the development of a formalized planetary defense system fielded by the U.S. government.

Russian Planetary Exploration Brian Harvey,2007-01-24 Illustrated with photographs from Soviet Venus and Mars probes, images of spacecraft, diagrams of flight paths and maps of landing sites, this book draws on published scientific papers, archives, memoirs and other material. The text reviews Soviet engineering techniques and science packages, as well the difficulties which ruined several missions. The program's scientific and engineering legacy is also addressed, within the Soviet space effort as a whole.

Re-entry and Planetary Entry Physics and Technology W.H.T. Basic Calculus of Planetary Orbits and Interplanetary Flight Alexander J. Hahn,2020-03-14 Intended for a one- or two-semester course, this text applies basic, one-variable calculus to analyze the motion both of planets in their orbits as well as interplanetary spacecraft in their trajectories. The remarkable spacecraft missions to the inner and outermost reaches of our solar system have been one of the greatest success stories of modern human history. Much of the underlying mathematical story is presented alongside the astonishing images and extensive data that NASA's Voyager, NEAR-Shoemaker, Cassini, and Juno missions have sent back to us. First and second year college students in mathematics, engineering, or science, and those seeking an enriching independent study, will experience the mathematical language and methods of single variable calculus within their application to relevant conceptual and strategic aspects of the navigation of a spacecraft. The reader is expected to have taken one or two semesters of the basic calculus of derivatives, integrals, and the role that limits play. Additional prerequisites include knowledge of coordinate plane geometry, basic trigonometry, functions and graphs, including trig, inverse, exponential, and log functions. The discussions begin with the rich history of humanity's efforts to understand the universe from the Greeks, to Newton and the Scientific Revolution, to Hubble and galaxies, to NASA and the space missions. The calculus of polar functions that plays a central mathematical role is presented in a self-contained way in complete detail. Each of the six chapters is followed by an extensive problem set that deals with and also expands on the concerns of the chapter. The instructor has the flexibility to engage them with greater or lesser intensity. "I have been an aerospace engineer for 39 years and honestly, it would be hard for me to overstate how valuable I believe this book will be to numerous scientific and engineering disciplines and in particular to the future of aerospace engineering ... This book is perfectly crafted to motivate, educate, and prepare the scientists and engineers who wish to reach for the sky and beyond." -Dr. Mario Zoccoli, Aerospace Engineer, NASA and Lockheed Martin

Planetary Intervention Ted Heidk, Fabio Santos, 2019-07-30 Based on a true story, Planetary Intervention tells Daniel's story: a military veteran who joins a world military command, which officially should not exist, and embarks on various missions around the world. Daniel goes through the best elite training there is and uses technology far ahead of his time, traveling all over the planet without knowing what his next mission will be. In Planetary Intervention you will learn how this multinational elite troop, obeying a hidden command and unknown by the combatants, interferes in wars all over the globe, attends underground bases and participates in encounters between humans and extraterrestrials, sometimes even in combat. Learn more about the backstage of terrestrial reality, the manipulation of several conflicts and the confrontations and details of human and non-human interaction, including the recovery of ancient technological artifacts. Catastrophic Health Insurance for Planet Earth Air Command Air Command and Staff College, Air Command, 2014-06-05 Concern exists among an increasing number of scientists throughout the world regarding the possibility of a catastrophic event caused by an impact of a large earth-crossing object (ECO) on the Earth-Moon System (EMS), be it an asteroid or comet. Such events, although rare for large objects (greater than 1 kilometer diameter), are not unprecedented. Indeed, the great upheaval and resulting ice age that marked the extinction of the dinosaurs is thought to have been caused by the impact of a 10 km diameter asteroid. In 1908 a stony asteroid of approximately 50 meters diameter exploded in the air above the Tunguska River in Siberia, producing an equivalent yield of 15-30 megatons of TNT, and leveling over 2,000 square miles of dense forest. Such an event is thought to occur approximately every century. It is only a matter of time before the world finds itself in a crisis situation—a crisis involving the detection of a large ECO, leaving little time to react and resulting in global panic, chaos, and possible catastrophe. Collectively as a global community, no current viable capability exists to defend the EMS against a large ECO, leaving its inhabitants vulnerable to possible death and destruction of untold proportion and even possible extinction of the human race. In this regard, a planetary defense system (PDS) capability should be resourced, developed, and deployed. At this time Planetary Defense is not an assigned or approved mission of the Department of Defense or the Air Force. Such a system would consist of a detection subsystem, command, control, communications, computer, and intelligence (C4I) subsystem and a mitigation subsystem. There are many potential variations of these subsystems which, with advances in novel technologies, will be available by 2025 to develop a credible PDS. We propose a three-tier system developed sequentially in time and space. Such a system would serve not only as a means to preserve life on earth, but also help to unite the global community in a common effort that would promote peaceful cooperation and economic prosperity as related spin-offs and dual uses of novel technologies evolve.

Ashtar's The Space Brothers Speak Sean Casteel, Tuella, Hercules Invictus, 2019-08-06 WELCOME ON BOARD THE MOTHERSHIP THE ASHTAR COMMAND WANTS YOU! SHOULD THERE BE A GLOBAL DISASTER - SUCH AS A NUCLEAR WAR OR POLE SHIFT - THE CHOSEN' WILL BE TAKEN TO A SAFE HARBOR IN SPACE At this very moment, thousands of friendly space beings, sometimes referred to as the Cosmic Brotherhood, or the Federation of Planets, are patrolling our atmosphere on a mission of salvation as they seek to expand the consciousness of humanity and to lessen global tensions. Led by the gallant Ashtar, it is believed by his followers that that these highly advanced beings could at a moment's notice remove from the planet a sizable portion of humanity identified as the Chosen Ones - those attuned with the cosmos and its universal laws - who would be taken to a safe port in a distant solar system. Although he is an Etherian, a nonphysical being, Ashtar and his comrades take on the appearance of royal-looking humans. So say those who have had face-to-face contact, including New York City contactee Marc Brinkerhoff, who describes Ashtar's appearance thusly: His presence is trustful, commanding, confident and calming when I have met him during out-of-body visits to the teaching spaceships around the Earth, and on August 10, 2015 when I physically met him in person. Ashtar also has a sense of humor when I have seen him speaking at some of the Galactic meetings. Ashtar projects himself as an Adamic High Etherian Universal space being and he resembles a form he had on Venus many thousands of Earth years ago. He is known in space in the same way that his Oversoul appears, or looks, on the Higher Dimensions. He has kind, intense, beautiful blue eyes with flecks of turquoise in them. Ashtar usually has golden blonde hair to dark golden blonde smooth to wavy hair that falls from 4 to 8 inches past his shoulders. Though Ashtar is Aryan-looking, his massive star fleet membership consists of a multitude of forms, shapes, sizes

and colors, presenting themselves as a united, rainbow coalition of benign entities, many of whom take on physical form upon contacting their Space Channelers in every earthly land. The history of channeling is presented from the days of ancient Greece and the seer known as the Oracle of Delphi, to the works of Oahspe and a Dweller On Two Planets, (which was responsible for bringing the actress Shirley MacLaine into the New Age fold). More recently, the first appearance of Ashtar upon the scene was in the late 1940s, when contact was established with an associate of billionaire Howard Hughes. The manager of an isolated airport in the Mojave Desert, George Van Tassel, witnessed the landing of a spaceship and shortly thereafter began going into a light trance, allowing Ashtar to take control of his vocal chords, after which Tassel began coming forth with messages that were to be presented to a wide audience. It was an audience who believed in the Space Brothers' cause and were willing to heed the warnings and spiritual advice disseminated through their representatives, which were soon to grow in number. This volume is more than unique. It presents a grand overview of Ashtar and his Commanders as well as messages from his special spokespersons, including Tuella, his primary representative. This work also includes transmissions from many of the individual planets in this solar system, the inhabitants of which operate on a higher vibrational level, making them normally invisible to the human eye, except the most closely connected. There is also fabulous artwork by Carol Ann Rodriguez of a number of these enlightened souls, as well as overviews by Hercules Invictus, Tim Beckley and Sean Casteel.

A Real Twilight Zone , There are zones and regions upon earth and the oceans of our Earth which have baffled mankind for ages..... The most recent such region in man's known history and written documentation is the 'Bermuda Triangle'. Pertaining to this category though offering no known, plausible explanations to hundreds of recorded disappearances of ocean ships and airplanes.....Nay! Perhaps thousands of such disappearances; may prompt us humans to wonder what actually happened. However, all that happened during the last century and till date, there have been no recoveries of even a single ship or plane which disappeared inside the Bermuda Triangle. Here, within the pages of this book the author is making no reference to the bermuda triangle. That is or was, a different oceanic zone. ***** There have been plenty of hypothesis and explanations about the twilight zone. As the name suggests twilight means the time between darkness and light; the false dawn..... A time in very brief accountability when it seems that morning has dawned but in reality, night shadows start yet again. Morning dawn occurs much later after false dawn! It is also classified as the time between evening sunset and before night takes over. Twilight! Have you ever wondered if this zone called the real twilight zone could be factually true? What if it were so? Where does it exist and what is it all about? Why is such a habitable region eluding mankind's knowledge base? What sort of a place is this 'real twilight zone'? Read on and comprehend the friendly extraterrestrials explanation about this zone in science fiction methodology. Could it be true that the real twilight zone exists upon earth and we humans are capable of determining its coordinates? If yes, then what are the immense advantages which we can successfully derive from this yet unknown twilight zone? The original price of this book is estimated at 10 trillion dollars in United States American currency. Visit the real Twilight Zone with a team of inter planetary deep space personnel. Comprehend the term in its totality. A science fiction book. * Take a tour of the real Twilight Zone with a team of inter planetary deep space personnel. What's the real meaning of the Twilight Zone? Does it factually exist? Find out what this zone offers to us humans in the bargain, the sci fi method. Science fiction. Book Two: Beyond Time

Introduction to PCM Telemetry Systems Stephen Horan, 2018-10-03 Telemetry systems and applications have moved far beyond the space flight telemetry most people have heard of to cutting-edge uses across a broad range of disciplines, including industry, medicine, and meteorology. To fully understand and participate in the acquisition of data this technology makes possible, scientists in these fields along with engineers new to telemetry require some background in the concepts, hardware, and software that makes the technology so valuable. Introduction to PCM Telemetry Systems, Second Edition summarizes the techniques and terminology used in sending data and control information between users and the instruments that collect and process the data. It gives an overall systems introduction to the relevant topics in three primary areas: system interfaces; data transport, timing, and synchronization; and data transmission techniques. The topics addressed include sensor characteristics, user interface design, data filtering, data framing, statistical analysis, telemetry standards, time code standards, modulation techniques, and radio propagation. To reinforce understanding, each chapter includes exercises. Rather than focusing on design specifics, which can change so rapidly with evolving technologies, the author centers his discussions on concepts and standards. This edition incorporates the latest standards, LabVIEW-based examples of telemetry and command processing, and simulations using multiSim and Commsim.
