Plant Physiology 10 F.C. Steward,2012-12-02 Plant Physiology: A Treatise, Volume X: Growth and Development explores the physiology of plant growth and development, considering the morphogenesis and morphogenetic systems, dormancy, environmental cues in plant growth and development, plant senescence, the role of hormones in growth regulation, cell division, and growth and development in space. This volume is organized into eight chapters and begins with an introduction to morphogenesis as a developmental phenotype, emphasizing the cell and the shoot. The next chapters cover events in the life of the plant, reflecting the importance of the whole plant concept to the subject, and the ways in which these events are controlled and integrated into environmental signals and events. An experimental approach to a model system for dormancy is described, and then the discussion shifts to senescence and death of plants as aspects of plant development. This volume also presents a clear and illuminating overview of the major plant growth regulators and their modes of action. This book also introduces the reader to cell division and its effect on most major developmental events after fertilization, along with the genetic analysis of development and its control by genes. The final chapter focuses on the integration of plant growth studies with the technology of space travel, which permits analysis of plant behavior in the complete absence of gravity. This book is intended for researchers, students, and specialists in related fields who wish to gain insight on the concepts and research trends in plant growth and development.

Advances in Plant Breeding Strategies: Vegetable Crops Jameel M. Al-Khayri,S. Mohan Jain,Dennis V. Johnson,2021-08-25 Plant breeders and geneticists are under constant pressure to sustain and expand food production by using innovative breeding strategies and introducing minor crops, which are well adapted to marginal lands, provide a source of nutrition, and have abiotic and biotic stress tolerance, to feed an ever-increasing human population. The basic concept of this book is to examine the use of innovative methods, augmenting traditional plant breeding, towards the improvement and development of new crop varieties, under the increasingly limiting environmental and cultivation factors, to achieve sustainable agricultural production and enhanced food security. Three volumes of the book series *Advances in Plant Breeding Strategies* were published in 2015, 2016 and 2018, respectively: Volume 1. Breeding, Biotechnology and Molecular Tools; Volume 2. Agronomic, Abiotic and Biotic Stress Traits and Volume 3. Fruits. In 2019, the following four volumes were published: Volume 4. Nut and Beverage Crops, Volume 5. Cereals, Volume 6. Industrial and Food Crops and Volume 7. Legumes. In 2021, three volumes are being concurrently published: Volume 8. Vegetable Crops: Bulbs, Roots and Tubers, Volume 9. Vegetable Crops: Fruits and Young Shoots and Volume 10. Vegetable Crops: Leaves, Flowerheads, Green Pods, Mushrooms and Truffles. This Volume 10, subtitled *Vegetable Crops: Leaves, Flowerheads, Green Pods, Mushrooms and Truffles*, consists of 14 chapters focusing on advances in breeding strategies using both traditional and modern approaches for the improvement of individual vegetable crops. Chapters are arranged in 4 parts according to the edible vegetable parts. Part I: Leaves - Chicory (*Cichorium intybus* L.), Chinese cabbage (*Brassica rapa* L. var. *pekinensis*), Rocket salad (*Eruca vesicaria* ssp. *sativa* Mill.), Spring onion (*Allium fistulosum* L.),Water spinach (*Ipomoea aquatica* Forsk.) and Watercress (*Nasturtium officinale* R. Br.); Part II: Flowerheads and Green Pods - Cauliflower (*Brassica oleracea* var. *botrytis* L.), Globe artichoke (*Cynara cardunculus* var. *scolymus* L.), Garden pea (*Pisum sativum* L.) and Yardlong bean (*Vigna unguiculata* (L.) Walp. ssp. *sesquipedalis* (L.) Verdc.); Part III: Mushrooms - Enoki mushroom (*Flammulina velutipes* (Curtis) Singer) and Shiitake mushroom (*Lentinula edodes* (Berk.) Sing.); Part IV: Truffles - Desert truffles (*Terfezia* spp.) and White truffle (*Tuber magnatum* Picco and T. *borchii* Vittad.). Each chapter comprehensively reviews the contemporary literature on the subject and reflects the experiences of the authors. Chapters are written by internationally-reputable scientists and subjected to a

review process to assure quality presentation and scientific accuracy. Each chapter begins with an introduction covering related backgrounds and provides in-depth discussion of the subject supported with high-quality color photos, illustrations and relevant data. The chapter concludes with recommendations for future research directions, a comprehensive list of pertinent references to facilitate further reading, and appendixes of genetic resources and concerned research institutes. This book series is a valuable resource for advanced students, researchers, scientists, commercial producers and seed companies as well as consultants and policymakers interested in agriculture, particularly in modern breeding technologies.
