Charles Van Riper, Mark K. Sogge

Colorado Plateau 3 Charles Van Riper, Mark K. Sogge, 2008 Roughly centered on the Four Corners region of the southwestern United States, the Colorado Plateau covers an area of 130,000 square miles. The relatively high semi-arid province boasts nine national parks, sixteen national monuments, many state parks, and dozens of wilderness areas. With the highest concentration of parklands in North America and unique geological and ecological features, the area is of particular interest to researchers. Derived from the Eighth Biennial Conference of Research on the Colorado Plateau, this third volume in a series of research on the Colorado Plateau expands upon the previous two books. This volume focuses on the integration of science into resource management issues, summarizes what criteria make a successful collaborative effort, outlines land management concerns about drought, provides summaries of current biological, sociological, and archaeological research, and highlights current environmental issues in the Four Corner States of Arizona, New Mexico, Colorado, and Utah. With broad coverage that touches on topics as diverse as historical aspects of pronghorn antelope movement patterns through calculating watershed prescriptions to the role of wind-blown sand in preserving archaeological sites on the Colorado River, this volume stands as a compendium of cutting-edge management-oriented research on the Colorado Plateau. The book also introduces, for the first time, tools that can be used to assist with collaboration efforts among landowners and managers who wish to work together toward preserving resources on the Colorado Plateau and offers a wealth of insights into land management questions for many readers, especially people interested in the natural history, biology, anthropology, wildlife, and cultural management issues of the region.

Archie #062 Archie Superstars, By Shnook or Crook: Archie can't seem to keep other people's things out of his pockets! Could be a kleptomaniac, stealing things compulsively? Or is he just a forgetful goofball? **DISCLAIMER:** The stories, characters, and incidents in this publication are entirely fictional. This publication contains material that was originally created in a less racially and socially sensitive time in our society and reflects attitudes that may be represented as offensive today. The stories are represented here without alteration for historical reference.

Los Paseos Marítimos españoles Juan Jesús Trapero, 1998-02-12 La extensa muestra de paseos que se han realizado en España en los últimos quince años ha permitido realizar esta investigación que estudia al paseo marítimo como espacio público en el que concurre la doble realidad de ser elemento urbano relevante y elemento básico en la protección del litoral. El estudio de las características compositivas y de diseño de los diferentes paseos marítimos españoles sirve para ilustrar los criterios e ideas que conviene tener en cuenta en la ordenación, diseño y construcción de los paseos marítimos. A lo largo del estudio se van analizando los conceptos de composición, trazado y diseño que son básicos en el proyecto de un paseo marítimo y ello se hace destacando las características más relevantes de los paseos españoles, ofreciendo, finalmente, una síntesis gráfica de las características compositivas de los 230 paseos marítimos analizados.

Stone Vessels and Values in the Bronze Age Mediterranean Andrew Bevan, 2007-08-13 The societies that developed in the eastern Mediterranean during the Bronze Age produced the most prolific and diverse range of stone vessel traditions known at any time or anywhere in the world. Stone vessels are therefore a key class of artefact in the early history of this region. As a form of archaeological evidence, they offer important analytical advantages over other artefact types - virtual indestructibility, a wide range of functions and values, huge variety in manufacturing traditions, as well as the subtractive character of stone and its rich potential for geological provenancing. In this 2007 book, Andrew Bevan considers individual stone vessel industries in great detail. He also offers a highly comparative and value-led perspective on production, consumption and exchange logics throughout the eastern Mediterranean over a period of two millennia during the Bronze Age (ca.3000–1200 BC).

Uranium Ore Deposits Franz J. Dählkamp, 2013-03-09 An important prerequisite to the long-term use of nuclear energy is information on uranium ore deposits from which uranium can be economically exploited. Hence the basic purpose of this book is to present an overview of uranium geology, data characteristic for uranium deposits, and a synthesis of these data in the form of a typological classification of uranium deposits supported by more detailed descriptions of selected uranium districts and deposits. An additional goal is to provide access for the interested reader to the voluminous literature on uranium geology. Therefore a register of bibliography as global as possible, extending beyond the immediate need for this book, is provided. The volume presented here was not originally designed as a product for its own sake. It evolved as a by-product during decades of active uranium exploration and was compiled thanks to a request by the Springer Publishing Company. Routine research work on identifying characteristic features and recognition criteria of uranium deposits, combined with associated modeling of types of deposits for reapplication in exploration, provided the data bank. The publisher originally asked for a book on uranium deposits structured as a combined text- and reference book. The efforts to condense all the text into a single publication were soon doomed. The material grew out of all feasible proportions for a book of acceptable size and price, a wealth of data on uranium geology and related geosciences having become available during the past decade, too vast for one volume.

A revision of the spider genus Selenops Latreille, 1819 (Arachnida, Araneae, Selenopidae) in North America, Central America and the Caribbean Sarah C. Crews, 2011-06-14 The spider genus Selenops occurs in both the Old World and New World subtropics and tropics and contains nearly half of the species in the family Selenopidae. These spiders are extremely flattened dorsoventrally and are amongst the fastest animals in the world. Despite the large size of some species, these aforementioned characteristics can make them difficult to detect. In this monograph the species from North America, Central America and Caribbean Islands (excluding Cuban endemics) are revised. In total, 21 new species are described and 6 species are synonymized. The males of *S. bani* and *S. marcanoi*, and the females of *S. phaselus* and *S. geraldinae* are described for the first time. Almost all species are redescribed, with new illustrations, including

the internal female copulatory organs, most of which are illustrated for the first time. New distributional records and a key to species are also provided.

From Lake to Sand. The Archaeology of Farafra Oasis Western desert, Egypt Barbara E. Barich,Giulio Lucarini,Mohamed A. Hamdan,Fekri A. Hassan,2014-12-11 The volume presents all the data collected during the cycle of research conducted by the Italian Archaeological Mission in the Farafra Oasis between 1990 and 2005. The 29 multidisciplinary essays contained in this book provide a detailed picture of the population of the Farafra Oasis, hitherto one of the least well known within the Western Desert. Farafra became particularly important during the middle Holocene, the period when climate conditions were most favourable, with later brief humid episodes even in the historic periods. The results of the long-term research cycle presented here, combined with data from the survey of the whole Wadi el Obeiyid still in progress, allow the authors to identify changes in the peopling of the oasis and to define various occupation phases. The new chronology for the Wadi el Obeiyid is one of the main achievements of the book and, as demonstrated in the final chapter, is in complete agreement with the main cultural units of other territories in the Western Desert. On this chronological basis, the contacts between the latter and the populations established on the Nile are brought into sharper focus. The importance of the archaeological documents discovered at Farafra and, at the same time their fragility due to the deterioration of the physical environment and the uncontrolled human activities, make us fear for their conservation. We hope that this book, with its complete documentation of the precious nature of the Farafra Oasis landscape and its archaeological heritage, may help to promote more effective policies for its safeguard.

Slang Michael Adams,2012-09-01 Slang, writes Michael Adams, is poetry on the down low, and sometimes lowdown poetry on the down low, but rarely, if ever, merely lowdown. It is the poetry of everyday speech, the people's poetry, and it deserves attention as language playing on the cusp of art. In Slang: The People's Poetry, Adams covers this perennially interesting subject in a serious but highly engaging way, illuminating the fundamental question What is Slang and defending slang--and all forms of nonstandard English--as integral parts of the American language. Why is an expression like bed head lost in a lexical limbo, found neither in slang nor standard dictionaries? Why are snow-boarding terms such as fakie, goofy foot, ollie and nollie not considered slang? As he addresses these and other lexical curiosities, Adams reveals that slang is used in part to define groups, distinguishing those who are down with it from those who are out of it. Slang is also a rebellion against the mainstream. It often irritates those who color within the lines--indeed, slang is meant to irritate, sometimes even to shock. But slang is also inventive language, both fun to make and fun to use. Rather than complain about slang as bad language, Adams urges us to celebrate slang's playful resistance to the commonplace and to see it as the expression of an innate human capacity, not only for language, but for poetry.
