Ecologies of Creative Music Practice Matthew Lovett,2023-12-13 Ecologies of Creative Music Practice: Mattering Music explores music as a dynamic practice embedded in contemporary ecological contexts, one that both responds to, and creates change within, the ecologies in which it is created and consumed. This highly interdisciplinary analysis includes theoretical and practical considerations – from blockchain technology and digital platform commerce to artificial intelligence and the future of work, to sustainability and political ecology – as well as contemporary philosophical paradigms, guiding its investigation through three main lenses: How can music work as a conceptual tool to interrogate and respond to our changing global environment? How have transformations in our digital environment affected how we produce, distribute and consume music? How does music relate to matters of political ecology and environmental change? Within this framework, music is positioned as a starting point from which to examine a range of contexts and environments, offering new perspectives on contemporary technological and ecological discourse. Ecologies of Creative Music Practice: Mattering Music is a valuable text for advanced undergraduates, postgraduates, researchers and practitioners concerned with producing, performing, sharing and listening to music.

The Music Lesson Victor L. Wooten, 2008-04-01 From Grammy-winning musical icon and legendary bassist Victor L. Wooten comes an inspiring parable of music, life, and the difference between playing all the right notes...and feeling them. The Music Lesson is the story of a struggling young musician who wanted music to be his life, and who wanted his life to be great. Then, from nowhere it seemed, a teacher arrived. Part musical genius, part philosopher, part eccentric wise man, the teacher would guide the young musician on a spiritual journey, and teach him that the gifts we get from music mirror those from life, and every movement, phrase, and chord has its own meaning...All you have to do is find the song inside. "The best book on music (and its connection to the mystic laws of life) that I've ever read. I learned so much on every level."—Multiple Grammy Award-winning saxophonist Michael Brecker

Affect and Emotion in Human-Computer Interaction Christian Peter, Russell Beale, 2008-08-25 Affect and emotion play an important role in our everyday lives: They are present whatever we do, wherever we are, and wherever we go, without us being aware of them for much of the time. When it comes to interaction, be it with humans, technology, or humans via technology, we suddenly become more aware of emotion, either by seeing the other's emotional expression, or by not getting an emotional response while anticipating one. Given this, it seems only sensible to explore affect and emotion in human-computer interaction, to investigate the underlying principles, to study the role they play, to develop methods to quantify them, and to finally build applications that make use of them. This is the research field for which, over ten years ago, Rosalind Picard coined the phrase affective computing. The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human-technology interaction. It covers theoretical issues, user experience and design aspects as well as sensing issues, and reports on a number of affective applications that have been developed in recent years.

Music Recommendation and Discovery òscar Celma, 2010-09-02 In the last 15 years we have seen a major transformation in the world of music. - sicians use inexpensive personal computers instead of expensive recording studios to record, mix and engineer music. Musicians use the Internet to distribute their - sic for free instead of spending large amounts of money creating CDs, hiring trucks and shipping them to hundreds of record stores. As the cost to create and distribute recorded music has dropped, the amount of available music has grown dramatically. Twenty years ago a typical record store would have music by less than ten thousand artists, while today online music stores have music catalogs by nearly a million artists. While the amount of new music has grown, some of the traditional ways of ?nding music have diminished. Thirty years ago, the local radio DJ was a music tastemaker, ?nding new and interesting music for the local radio audience. Now - dioshowers are programmed by large corporations that create playlists drawn from a limited pool of tracks. Similarly, record stores have been replaced by big box reta- ers that have ever-shrinking music departments. In the past, you could always ask the owner of the record store for music recommendations. You would learn what was new, what was good and what was selling. Now, however, you can no longer expect that the teenager behind the cash register will be an expert in new music, or even be someone who listens to music at all.
