*Road to PLR Riches* Mark Silboard,1901 Since the advent of the Internet, business had been good, if not better than before. This is because the Internet provides more viable means of disseminating information about the products and the business all at the same time. Hence, most businesses know that the proliferation of the online business will definitely boost the income-generating potential of the business. However, most online entrepreneurs contend that for an online business to generate good income in the Internet, the business must have its own product. This is because everything is a sale, even the thoughts that you have in your mind could count as a product for sale when presented in the Internet for other people's use. But contrary to most popular beliefs, having your own product does not limit you to the many possibilities of earning more by using a 'license' that is attached with an 'information product' that you may acquire online. These are known as Private Label Rights. Private Label Rights is just one of the three 'basic rights' that are embodied in the concept of resell rights marketing. Among the three, Private Label Rights are considered as the most moneymaking and rewarding. Private Label Rights are represented in a certificate or authorization that is attached with an 'information item.' The basics of Private Label Rights is to permit people to transform, reorganize, change, or improve the elements of the said merchandise to go well with the buyer's personal desires and yearnings. For example, if you have a Private Label Rights, you can easily segregate the contents of an E-Book, and persuade somebody to buy the contents as sequence of pieces of writing. One of the best things about Private Label Rights is that you can actually do the same thing inversely. For instance, if you were able to buy a set of information products like a collection of articles embodied with Private Label Rights, you can easily bring them together without the risk of some law-related predicaments. Hence, you can collect different articles from different owners. With a common thought, you can come up with a creative masterpiece. In addition, with Private Label Rights, you can simply append some information on the said product to make it more meaningful and creative, thus, creating an impression of having a product of your own. Best of all, you can even put your name as the author of the said work. This is the most gainful aspect of having Private Label Rights. In this way, you do not have to acknowledge the primary author of the work.

**Internet Wealth Secrets** Anthony Ekanem,2016-06-30 The very first question you may ask is why the Internet? Well, let me explain to you why this is the most profitable and hassle-free business in this date and age. First, let me show you several facts and figures to elaborate on the great earning potential of Internet business. Let's look at the advantages of Internet business. Potential Growth in Volume. The Internet has been growing so rapidly that it becomes a primary tool for people to look for information! Simple as it might appear! Some categories of information, such as overweight, male impotence, debt, getting rich, MLM etc., are considered to be so sensitive that people would not discuss with their folks offline. They'd rather go online and search because they know the virtual world will protect their identity and save them from shame. In other words, the Internet is the place for people to look for solutions to their problems. If you know how to target certain groups of people who are willing to spend on those solutions, you've made it! Potential Growth in Value. I want to emphasize that more and more people are spending their money on the Internet. Nielsen reveals that 875 million consumers shop online in 2008 and the trend is increasing rapidly. Now, with the popularity of Internet-connected mobile devices, people can spend money with just a click of a button. According to a study by the University of Oxford, there are more mobile subscribers than toothbrushes. So you can imagine how huge the market is and why you should tap onto this business as soon as possible, before another millions of people come in and make it more difficult to monetize. Flexibility. The Internet business gives you the flexibility in working. You can choose to work anytime of the day, any day of the year, anywhere you prefer, as long as you have a computer and Internet connection. Your online store is your own 24-hour salesman that continuously works for you even when you sleep.
