Plutopia Kate Brown,2013-03-15 While many transnational histories of the nuclear arms race have been written, Kate Brown provides the first definitive account of the great plutonium disasters of the United States and the Soviet Union. In Plutopia, Brown draws on official records and dozens of interviews to tell the extraordinary stories of Richland, Washington and Ozersk, Russia-the first two cities in the world to produce plutonium. To contain secrets, American and Soviet leaders created plutopias--communities of nuclear families living in highly-subsidized, limited-access atomic cities. Fully employed and medically monitored, the residents of Richland and Ozersk enjoyed all the pleasures of consumer society, while nearby, migrants, prisoners, and soldiers were banned from plutopia--they lived in temporary staging grounds and often performed the most dangerous work at the plant. Brown shows that the plants' segregation of permanent and temporary workers and of nuclear and non-nuclear zones created a bubble of immunity, where dumps and accidents were glossed over and plant managers freely embezzled and polluted. In four decades, the Hanford plant near Richland and the Maiak plant near Ozersk each issued at least 200 million curies of radioactive isotopes into the surrounding environment--equaling four Chernobyls--laying waste to hundreds of square miles and

contaminating rivers, fields, forests, and food
supplies. Because of the decades of secrecy,
downwind and downriver neighbors of the plutonium
plants had difficulty proving what they suspected,
that the rash of illnesses, cancers, and birth
defects in their communities were caused by the
plants' radioactive emissions. Plutopia was
successful because in its zoned-off isolation it
appeared to deliver the promises of the American
dream and Soviet communism; in reality, it
concealed disasters that remain highly unstable
and threatening today. An untold and profoundly
important piece of Cold War history, Plutopia
invites readers to consider the nuclear footprint
left by the arms race and the enormous price of
paying for it.

   The Plutonium Files Eileen Welsome,2010-10-20
When the vast wartime factories of the Manhattan
Project began producing plutonium in quantities
never before seen on earth, scientists working on
the top-secret bomb-building program grew
apprehensive. Fearful that plutonium might cause a
cancer epidemic among workers and desperate to
learn more about what it could do to the human
body, the Manhattan Project's medical doctors
embarked upon an experiment in which eighteen
unsuspecting patients in hospital wards throughout
the country were secretly injected with the
cancer-causing substance. Most of these patients
would go to their graves without ever knowing what
had been done to them. Now, in The Plutonium
Files, Pulitzer Prize-winning reporter Eileen
Welsome reveals for the first time the breadth of
the extraordinary fifty-year cover-up surrounding

the plutonium injections, as well as the deceitful
nature of thousands of other experiments conducted
on American citizens in the postwar years.
Welsome's remarkable investigation spans the 1930s
to the 1990s and draws upon hundreds of newly
declassified documents and other primary sources
to disclose this shadowy chapter in American
history. She gives a voice to such innocents as
Helen Hutchison, a young woman who entered a
prenatal clinic in Nashville for a routine checkup
and was instead given a radioactive cocktail to
drink; Gordon Shattuck, one of several boys at a
state school for the developmentally disabled in
Massachusetts who was fed radioactive oatmeal for
breakfast; and Maude Jacobs, a Cincinnati woman
suffering from cancer and subjected to an
experimental radiation treatment designed to help
military planners learn how to win a nuclear war.
Welsome also tells the stories of the scientists
themselves, many of whom learned the ways of
secrecy on the Manhattan Project. Among them are
Stafford Warren, a grand figure whose bravado
masked a cunning intelligence; Joseph Hamilton,
who felt he was immune to the dangers of radiation
only to suffer later from a fatal leukemia; and
physician Louis Hempelmann, one of the most
enthusiastic supporters of the plan to inject
humans with potentially carcinogenic doses of
plutonium. Hidden discussions of fifty years past
are reconstructed here, wherein trusted government
officials debated the ethical and legal
implications of the experiments, demolishing
forever the argument that these studies took place
in a less enlightened era. Powered by her

groundbreaking reportage and singular narrative gifts, Eileen Welsome has created a work of profound humanity as well as major historical significance. From the Hardcover edition.
