Hands-on Project Management Avraham Shtub,Moshe Rosenwein,2017-12-28

Teaching project management is not an easy task. Part of the difficulty is the one-of-a-kind nature of projects. This book and the software that comes with it (Project Team Builder) present a unique approach to the teaching and training of project management — an approach based on a software tool that combines an interactive, dynamic case study and a simple yet effective Project Management System. The book focuses on problems that the

project manager faces in planning, monitoring and controlling projects. Together with the software, the book provides the user with the opportunity to experience complex Project Management situations, understand the situation, develop alternative ways to cope with it and select the best alternative based on rigorous analysis. Project Team Builder (PTB), the software that accompanies this book, is web-based, please visit <http://www.sandboxmodel.com>.

Project Management Simulation with PTB Project Team Builder Avraham Shtub, 2012-08-20 "The Project Team Builder (PTB) meets the need for an effective teaching and training tool of project management. The software introduces the user to the full dynamics of project planning, monitoring and control, moving scenario-wise from the easy, fundamental issues to the more involved, complex ones. Based on a sound conceptual foundation, it provides the ideal individual and team training support for bringing projects to completion effectively and efficiently in a dynamic stochastic environment. Highly recommended" Willy Herroelen, Emeritus Professor of Operations Management, Katholieke Universiteit Leuven "The Engineering Project Management School of the Israeli Electric Company (IEC) used the Project Team Builder simulator developed at the Technion. Using PTB, it was possible to practice risk management when uncertainty is presented in resources availability, duration of activities and cash flow. The challenges presented to the students increased motivation. The quality of the learning process, as well as the end results, was excellent." Sergio Klik, Director, Engineering Project Management School, The Israeli Electric Company "PTB takes an important step in the right direction. It employs simulation in order to put the student in the real situation

where he has to plan and execute projects by handling all issues at once. In particular, it puts the student in a situation where his project is exposed to risk. By this, the student has to combine the isolated and simplified views on projects, and he learns that risk can materialize and that he has to plan and execute the project accordingly. This is a very important aspect of project management which is learnt by doing (and failing) and which has not been delivered this way before.” Rainer Kolisch, Professor of Operations Management, TUM School of Management, Technische Universität München A video tutorial of the Project Team Builder (PTB) simulator is available at the following link: <http://www.sandboxmodel.com/videos-1> The tutorial presents the PTB version that comes with the book and demonstrates the use of PTB for training and for teaching.
