The Pocket Idiot's Guide to Piano Chords Karen Berger,2006-02 The piano can be one of the most challenging instruments to play. Many people give up shortly after Mary had a Little Lamb, when they see just how complex piano notation can be to read and how difficult it is to get their hands to do two different things at once (like scratch their head with one and rip the pages of their song book with the other). The Pocket Idiot's Guide to Piano Chordstakes the intimidation out of learning to play the piano and gives readers a quick and easy method to playing the songs they love. Readers are taught the non-classical method of playing piano and introduced to the basics of keyboard geography, chords, scales, pattern progressions, and reading lead sheets. Readers won t necessarily be able to play Rachmaninov's 3rd Concerto when they re finished, but they ll be well on their way to playing some of the popular songs that got them interested in learning how to play the piano in the first place.

Makers of the Piano: 1820-1860 Martha Novak Clinkscale,1993 This book continues the overview of early pianos begun in Clinkscale's Makers of the Piano 1700-1820 (OUP, 1993). Although a few of the biographies overlap, the majority of the makers are completely new. Approximately 2,400 makers and manufacturers and about 2,200 pianos are listed. Of this total, about 645 are English, the majority of whom were active in London; more than 200 of the London makers have not been discussed in previous publications.

This definitive volume celebrates the history of the world's most popular musical device, its impact on various forms of music, folk, country, blues, rock, jazz and classical music. The author traces the development of the harmonica from the ancient Chinese sheng to futuristic harmonica sythesizers. Nearly seventy harmonica masters are profiled including Stevie Wonder, Little Walter, Bob Dylan, Jimmy Reed, Charlie McCoy, Sonny Terry, and John Popper. This updated edition includes an extensive new afterword, an expanded discography of the finest harmonica recordings, and a listing of the best harmonica resources on the internet.

Naptown Memories Raymond M. Featherstone,2006-10 Even in those days, kids in grade school were slaves to fashion and creatures of habit. One of those creatures of our habit was the infamous raccoon skin cap, a must head covering for a ten-year-old boy. No doubt the clothing fad originated with the popular 1936 movie, Daniel Boone, starring George O'Brien. Author Raymond M. Featherstone Jr. details the experiences of his middle class Indianapolis family during the Great Depression and World War II, offering a lighthearted and humorous look at the 1930s and 1940s through the eyes of a young boy. Journey to the heart of Featherstone's neighborhood as he describes his childhood antics, eccentric neighbors, and family escapades. Featherstone recalls the fads, fashions, and expressions of the era, and includes several thumbnail sketches of people, places, and things in the public eye. Ranging from a brief look at the 1933-34 Chicago World's Fair to the history of the yo-yo and to Featherstone's daily trips to the drugstore for Old Lady Schenzel's bottle of Virginia Dare port wine, Naptown Memories: One Boy's Life Growing Up In Indianapolis-1930s & 1940s paints a charming yet realistic portrait of this significant era in America's history.

The House of Novello VictoriaL. Cooper,2017-07-05 By the mid-nineteenth century music publishing was no longer the provenance of shopkeepers, instrument makers or individual scholars, but a business enterprise undertaken by a new breed of Victorian entrepreneur. Two such were Vincent Novello and his son Alfred, whose music publishing house enjoyed significant growth between 1829 and 1866. Victoria Cooper builds up a picture of Novello during this period and the socio-economic and cultural climate that influenced the company's business decisions. Looking in detail at some of the editions Novello published, she analyzes the editing style of the firm and how this was dictated by Novello's main audience of amateur musicians and choral societies. Scrutiny of Novello's stockbook indicates the financial fortunes of these editions, while correspondence between the firm and composers such as Mendelssohn reveals how Vincent and Alfred went about acquiring new compositions. With its focus on the development of a music publishing business, this study brings a fresh dimension to musicological research. Novello was able to combine business practice with a commitment to disseminate music of educational and artistic value, and the history of the company provides illuminating evidence of the commodification of music in nineteenth-century Britain.

Big Disconnect Giles Slade,2012-08-07 Smart phones and social media sites may be contemporary fixations, but using technology to replace face-to-face interactions is not a new cultural phenomenon. Throughout our history, intimacy with machines has often supplanted mutual human connection. This book reveals how consumer technologies changed from analgesic devices that soothed the loneliness of a newly urban generation to prosthetic interfaces that act as substitutes for companionship in modern America. The history of this transformation helps explain why we use technology to mediate our connections with other human beings instead of seeking out face-to-face contact. Do electronic interfaces receive most of our attention to the detriment of real interpersonal communication? Why do sixty million Americans report that isolation and loneliness are major sources of unhappiness? The author provides many insights into our increasingly artificial relationships and a vision for how we can rediscover genuine community and human empathy.
