Design, User Experience, and Usability: Users and Interactions Aaron Marcus,2015-07-20 The three-volume set LNCS 9186, 9187, and 9188 constitutes the proceedings of the 4th International Conference on Design, User Experience, and Usability, DUXU 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCII 2015, in Los Angeles, CA, USA, in August 2015, jointly with 13 other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 132 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. The 67 papers included in this volume are organized in topical sections on users in DUXU, women in DUXU, information design, touch and gesture DUXU, mobile DUXU, and wearable DUXU.

Technology for Transition and Postsecondary Success Gillian R. Hayes ,Stephen W. Hosaflook,2014-11-01 This six-page (tri-fold) laminated reference guide by Gillian Hayes and Stephen Hosaflook focuses on readily available tools for augmenting and supporting the development of executive function skills, such as time and task management, organization, and self-regulation. These skills are crucial for accomplishing a variety of transition-related goals, including carrying out the daily routines that enable people to function autonomously, enroll in and be successful in postsecondary school, and obtain and excel at a job. Technology for Transition and Postsecondary Success identifies and describes how to use a spectrum of helpful technological tools in creative ways to support the transition to postsecondary education or employment. The guide also provides tips for using technology appropriately--including mobile device and email etiquette-- and staying safe online.

The Mobility Revolution Lukas Neckermann,2015-04-28 We stand at the cusp of a mobility revolution unlike anything we have seen since the days of Gottlieb Daimler and

Henry Ford, 130 years ago. Three massively significant and converging automotive trends – electrification, self-driving technology and car-sharing – will together transform the way we live, work, and move about in our increasingly urban environment. This book coins the term 'Mobility Revolution' and is a summary of the 'three zeroes' that are already defining the future for the automobile industry: Zero Emissions, Zero Accidents and Zero Ownership. The impact will go beyond the automotive industry and its suppliers – urban infrastructure, construction, logistics – and even local cafés will need to think and operate differently. Based on countless interviews, the book is highly current and thoroughly researched, whilst also fun to read. It is an eye-opener to the new world that awaits us as the Mobility Revolution unfolds. The Mobility Revolution is a must-read for anyone interested in the future of the automobile industry, our cities, and the way we live.

Enhancing Teaching and Learning Jean Donham,Chelsea Sims,2019-03-30 Rapid change calls for informed leadership. The goal of Donham's text has always been to help school library professionals make a difference in the educational experience and academic attainment of students in their schools. With the addition of new co-author Sims, a junior high school librarian, this newly revised fourth edition rises to the challenge with updates and enhancements that confirm its value as an important resource for both LIS students and current school librarians. Covering all aspects of the school system, including students, curriculum and instruction, principals, district administration, and the community, it demonstrates how to interact and collaborate in order to integrate the school library program throughout these environments. Inside, readers will find myriad real-world examples of issues in school librarianship and evidence-based practice; discussion of such urgent topics as the educational needs of the iGen (those born between 1995 and 2012), changing reading habits, the influence of the media, and news literacy and other issues related to the proliferation of fake news; updates which touch upon the new AASL Standards, inquiry-based learning, assessment, and library program evaluation; specific tactics for establishing the library program as an active player in teaching and learning; an overview of education-related technology such as course management systems, the virtual library, makerspaces, information presentation and data representation tools like ScreenCast and Google Maps, online home-school communication, and online student safety and privacy; and end-of-chapter discussion scenarios that explore opportunities for the practical application of concepts. Reflecting changes—professional, theoretical, legal, and political—in both the library field and education, this new edition of a groundbreaking school library text will equip readers to be leaders at their schools and in their communities.

50+ Tech Tools for School Counselors Angela Cleveland,Stephen Sharp,2019-05-08 Digital tools that can transform your practice Educating students in the 21st century is about more than preparing them for work in the digital age; it's also about connecting with the whole student and transcending barriers. 50+ Tech Tools for the 21st Century School Counselors provides insightful descriptions of tools that can be used to not only enrich intervention and instruction but also guide decision making, streamline work, enhance communication, and promote happier students. How and Why to Read and Create Children's Digital Books Natalia Kucirkova,2018-12-03 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova

combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

    Contemporary Foundations for Teaching English as an Additional Language Polina Vinogradova,Joan Kang Shin,2020-10-29 This engaging volume on English as an Additional Language (EAL), argues persuasively for the importance of critical participatory pedagogies that embrace multilingualism and multimodality in the field of TESOL. It highlights the role of the TESOL profession in teaching for social justice and advocacy and explores how critical participatory pedagogies translate into English language teaching and teacher education around the world. Bringing together diverse scholars in the field and practicing English language teachers, editors Polina Vinogradova and Joan Kang Shin present 10 thematically organized units that demonstrate that language teaching pedagogy must be embedded in the larger sociocultural contexts of teaching and learning to be successful. Each unit covers one pedagogical approach and includes three case studies to illustrate how English language teachers across the world implement these approaches in their classrooms. The chapters are supplemented by discussion questions and a range of practical sources for further exploration. Addressing established and emerging areas of TESOL, topics covered include: Critical and postmethod pedagogies Translingualism Digital literacy and multiliteracies Culturally responsive pedagogy Advocacy Featuring educators implementing innovative approaches in primary, secondary, and tertiary contexts across borders, Contemporary Foundations for Teaching English as an Additional Language is an ideal text for methods and foundational courses in TESOL and will appeal to in-service and preservice English language teachers as well as students and teacher educators in TESOL and applied linguistics.

When I Fell for You Emma Keene,2016-12-08 Alexandra Dwyer is about to start her senior year of high school. Her dad recently moved out and got an apartment. Her mom is struggling to pay the bills and can't afford to buy new clothes for either of her two children. Blair, her best friend, suggests Alex should sing in the talent show. The prize is a gift card to the mall and it would give Alex the chance to get some new clothes. Alex knows from the start it's a terrible idea… one that will only lead to her embarrassing herself in front of the entire school. Alex, with some unwelcome help from Blair, ends up in the talent show. She knows it's not going to end well, but she decides to give it a shot and risk the possible humiliation of failure.
