The calcitonin gene-related peptide family Deborah L. Hay,Ian M. Dickerson,2009-10-03 In 1925, J. B. Collip (1925) reported that extracts of parathyroid gland contained an activity that raised calcium levels in the blood of parathyroidectomized animals, and suggested that this was due to a hormone produced in the parathyroid gland. The story of parathyroid hormone discovery was indicative of ever-increasing sophistication in sample preparation and protein isolation techniques. This paper resolved earlier controversies over the function of the parathyroid glands and c- trol of blood calcium. The year 1961 was a banner year for parathyroid research, in which the peptides parathyroid hormone and calcitonin were purified, and in which it was suggested that calcitonin could lower blood calcium (Copp and Cameron 1961). In 1982 it was discovered that in neurons the primary RNA transcript for calcitonin could be alternatively-spliced to give calcitonin gene-related peptide (CGRP), and shortly thereafter amylin (previously named islet amyloid polyp- tide, IAPP) was identified and shown to have homology to CGRP. Since then a and b CGRP have been delineated and adrenomedullin and intermedin discovered, and this family of homologous peptides has emerged. This family of peptide hormones has a diverse and constantly expanding range of important physiologic functions, including regulation of blood calcium, vascular tension, feeding behavior and pain recognition.

Race and the Greening of Atlanta Christopher C. Sellers,2023-08-15 *Race and the Greening of Atlanta* turns an environmental lens on Atlanta's ascent to thriving capital of the Sunbelt over the twentieth century. Uniquely wide ranging in scale, from the city's variegated neighborhoods up to its place in regional and national political economies, this book reinterprets the fall of Jim Crow as a democratization born of two metropolitan movements: a well-known one for civil rights and a lesser known one on behalf of "the environment." Arising out of Atlanta's Black and white middle classes respectively, both movements owed much to New Deal capitalism's undermining of concentrated wealth and power, if not racial segregation, in the Jim Crow South. Placing these two movements on the same historical page, Christopher C. Sellers spotlights those environmental inequities, ideals, and provocations that catalyzed their divergent political projects. He then follows the intermittent, sometimes vital alliances they struck as civil rights activists tackled poverty, as a new environmental state arose, and as Black politicians began winning elections. Into the 1980s, as a wealth-concentrating style of capitalism returned to the city and Atlanta became a national "poster child" for sprawl, the seedbeds spread both for a national environmental justice movement and for an influential new style of antistatism. Sellers contends that this new conservatism, sweeping the South with an antienvironmentalism and budding white nationalism that echoed the region's Jim Crow past, once again challenged the democracy Atlantans had achieved.
