Studies on China's Special Economic Zones 4 Yiming Yuan,2021-11-30 This book collects articles on the achievements and experience of special economic zones during the China's Reform and Opening-up in the past 40 years. The topics ranges from a historical summary of the development in special economic zones to its future prospect. Most of the articles analyze the policies applied for special economic zones and how they contributed to the economic growth, which provides the readers with an overview about how public policies helped cities develop. Some of the articles shift their focus to the role of special economic zones in larger area, i.e., Asia. These works exemplify the impact of China's economic policies in long term. Moreover, the book includes the contribution of special economic zones to the economic development world-wide, such as places in Africa and areas of "One Belt One road". Reader can benefit a thorough understanding of China's special economic zones' past and future through reading the book.

The Voice from China An CHEN,2014-07-08 In short, the 24 selected and representative articles written in English by the author over the past 30-odd years, mainly published in international leading journals and now collected and compiled in this monograph, could be deemed the products of international academic debates. They record, reflect and embody the author's personal views on a number of contemporary basic issues in international economic law & the international economic order. These personal views with Chinese characteristics are deeply rooted in China's specific national situation and the common position of the world-wide weak groups, and are significantly and substantially different and independent from some existing voices from strong western powers, which is why the book bears the title "The Voice from China". On the basis of their specific themes and content, the 24 representative articles are divided into six parts: 1) Jurisprudence of Contemporary International Economic Law; 2) Great Debates on Contemporary Economic Sovereignty; 3) China's Strategic Position on Contemporary International Economic Order Issues; 4) Divergences on Contemporary Bilateral Investment Treaty; 5) Contemporary China's Legislation on Sino-Foreign Economic Issues; and 6) Contemporary Chinese Practices on International Economic Disputes (Case Analysis).

Nuclear North Korea Victor D. Cha,David C. Kang,2005-04-26 The regime of Kim Jong-Il has been called mad, rogue, even, by the Wall Street Journal, the equivalent of an unreformed serial killer. Yet, despite the avalanche of television and print coverage of the Pyongyang government's violation of nuclear nonproliferation agreements and existing scholarly literature on North Korean policy and security, this critical issue remains mired in political punditry and often misleading sound bites. Victor Cha and David Kang step back from the daily newspaper coverage and cable news commentary and offer a reasoned, rational, and logical debate on the nature of the North Korean regime. Coming to the issues from different perspectives—Kang believes the threat posed by Pyongyang has been inflated and endorses a more open approach, while Cha is more skeptical and advocates harsher measures—the authors together have written an essential work of clear-eyed reflection and authoritative analysis. They refute a number of misconceptions and challenge much faulty thinking that surrounds the discussion of North Korea, particularly the idea that North Korea is an irrational nation. Cha and Kang contend that however provocative, even deplorable, the Pyongyang government's behavior may at times be, it is not incomprehensible or incoherent. Neither is it suicidal, they argue, although crisis conditions could escalate to a degree that provokes the North Korean regime to lash out as the best and only policy, the unintended consequence of which are suicide and/or collapse. Further, the authors seek to fill the current scholarly and policy gap with a vision for a U.S.-South Korea alliance that is not simply premised on a North Korean threat, not simply derivative of Japan, and not eternally based on an older, Korean War generation of supporters. This book uncovers the inherent logic of the politics of the Korean peninsula, presenting an indispensable context for a new policy of engagement. In an intelligent and trenchant debate, the authors look at the implications of a nuclear North Korea for East Asia and U.S. homeland security, rigorously assessing historical and current U.S. policy, and provide a workable framework for constructive policy that should be followed by the United States, Japan, and South Korea if engagement fails to stop North Korean nuclear proliferation.

Development and Sustainable Growth of Mauritius Vanessa T. Tang,Timothy M. Shaw,Merle G. Holden,2018-11-27 This edited volume analyzes the Mauritius economy and highlights what conditions and policies have contributed to the development of the country. The project gives a historical and economic analysis of Mauritius and provides comparative approaches looking at other developing states in Africa and Asia. This book is intended for a broad audience, consisting of not only economists with quantitative expertise but also other social scientists, policymakers and scholars interested in the intellectually fascinating exploration of Mauritius's rapid rise and sustained growth performance.

Re-globalisation Dong Wang,Dejun Cao,2020-12-29 Since the end of the Cold War, globalisation has been the dominant political and economic trend. But what is China's role in globalisation? What is China's vision of the world? This title offers a fresh and stimulating account of how China's involvement in globalisation has changed over time, and how its role in leading the "re-globalisation" process is profoundly reshaping the world. Introducing an innovative theoretical framework in the shape of "re-globalisation", this book discusses China's strategies and challenges while interacting with the international community. The book provides several illuminating case studies, such as the Belt and Road Initiative (BRI), the Asian Infrastructure Investment Bank (AIIB), and the strategies of the Chinese technology firm Alibaba. Rich in data and bold in argument, the book provides an extraordinarily dynamic depiction of how China's encounter with the outside world has not only transformed itself, but also reshaped the global order. As the first systemic and book-length study of "re-globalisation", this volume will appeal to researchers and students of politics and Chinese studies, and contemporary Chinese politics in particular.

China's Financial System Dominique De Rambures,Felipe Escobar Duenas,2017-02-27 This book examines the volatile landscape of the Chinese economy and the barriers to its continuing development. The author argues that underlying inefficiencies in China's financial system currently prevent the further growth of its institutions and inhibit reform of monetary and fiscal policy. Rambures shows that, despite efforts to avoid a "middle income trap", such long-overdue structural reforms are still faced with strong resistance from both economic and political circles. Chapters discuss approaches in tackling the Chinese national debt, the recent stock exchange collapse and subsequent currency devaluation, declining trade surplus, the wariness of foreign investors and its negative impact on foreign exchange reserves, and the heavy burden of state-owned "zombie companies". The discussion positions current economic events within the context of China's transition from a foreign trade and investment-led economy to one that is propelled by domestic consumption, service industries and innovation. Crucially, Rambures also addresses financial trends with reference to pervasive long-term influencing factors such as an ageing population, increasing inequality, corruption, pollution and migration.

Seeking Truth and Hiding Facts Jeremy L. Wallace,2022-11-08 A few numbers came to define Chinese politics, until they did not count what mattered and what they counted did not measure up. Seeking Truth

argues that the Chinese government adopted a system of limited, quantified vision in order to survive the disasters unleashed by Mao Zedong's ideological leadership, explains how that system worked, and analyzes how problems accumulated in its blind spots leading Xi Jinping to take the regime into a neopolitical turn. Xi's new normal is an attempt fix the problems of the prior system, as well as a hedge against an inability to do so. The book argues that while of course dictators stay in power through coercion and cooptation, they also do so by convincing their populations and themselves of their right to rule. Quantification is one tool in this persuasive arsenal, but it comes with its own perils--

Annual Report on the Development of China's Special Economic Zones (2020) Yitao Tao,Yiming Yuan,2023-05-02 This book is an overview of the development status of China's special economic zones in 2020, including the reform pilot zones and some new special zones over the past year. It analyzes the challenges during the transformation faced by special zones, the use of resources and sustainable development, economic and social development, social security, science and technology innovation, financial system reform, and cultural industry. Also it includes a record and review of the development status of the five traditional special economic zones and Shanghai Pudong New Area and Tianjin Binhai New Area over the past year, with emphasis on case studies of different special zones.

Hong Kong in Transition R. Ash,P. Ferdinand,B. Hook,R. Porter,2000-06-05 This book presents an overview of critical developments surrounding the handover of Hong Kong to Chinese rule. Well-known commentators from a variety of disciplines examine the issues and events in the years leading up to the transfer of sovereignty, and in the eighteen months that followed. Major dilemmas are addressed in the economic, political, legal, social and diplomatic life of the territory, which remain in many cases unresolved and pressing as Hong Kong enters the new century.

The Creation of Modern China, 18942008 Iain Robertson Scott,2016-06-30 No country has undergone a greater period of sustained and convulsive change than China in the twentieth century. This is its story, tracing the emergence of a modern China.
