Ann Brooks,Lionel Wee

Consumption, Cities and States Ann Brooks, Lionel Wee, 2015-03-01 'Consumption, Cities and States' examines the fascinating intersection of consumption, citizenship and the state in a cross-section of global cities in Asia and the West. It focuses on a number of theoretical and empirical analyses: developing and amplifying the intersection of consumption, citizenship and the state in late modernity in relation to a range of cities; examining the concept of the global city as an 'aspirational' category for cities in Asia and the West; and considering case studies which highlight the intersection of consumption and the state. As Ann Brooks and Lionel Wee demonstrate, the interface between citizen status and consumer activity proves a crucial point of analysis in the light of the neoliberal assertion that individuals and institutions perform at their best within a free market economy.

**The Voice from China** An CHEN, 2014-07-08 In short, the 24 selected and representative articles written in English by the author over the past 30-odd years, mainly published in international leading journals and now collected and compiled in this monograph, could be deemed the products of international academic debates. They record, reflect and embody the author's personal views on a number of contemporary basic issues in international economic law & the international economic order. These personal views with Chinese characteristics are deeply rooted in China's specific national situation and the common position of the world-wide weak groups, and are significantly and substantially different and independent from some existing voices from strong western powers, which is why the book bears the title "The Voice from China". On the basis of their specific themes and content, the 24 representative articles are divided into six parts: 1) Jurisprudence of Contemporary International Economic Law; 2) Great Debates on Contemporary Economic Sovereignty; 3) China's Strategic Position on Contemporary International Economic Order Issues; 4) Divergences on Contemporary Bilateral Investment Treaty; 5) Contemporary China's Legislation on Sino-Foreign Economic Issues; and 6) Contemporary Chinese Practices on International Economic Disputes (Case Analysis).

*Climatological Data for the United States by Sections*, 1966 Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries.

World Investment Report 2019 United Nations Conference on Trade and Development, 2019-08-09 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of

many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

Foreign Direct Investments in Emerging Asia Paul CHEUNG,Ammu GEORGE,Xuyao ZHANG,2023-05-31 Foreign direct investments (FDI) play an integral role in the growth story of Emerging Asian economies. As an essential source of foreign capital, FDI bolsters the path to economic recovery from recessions, including the one caused by the COVID-19 pandemic. This book is a collection of essays investigating the reconfiguration of FDI flows to the Emerging Asian economies of ASEAN, China and India following the pandemic and FDI policy reforms. This book broadly covers the trends in greenfield FDI flows to Emerging Asia in the context of three pertinent themes. Part I explores the rebalancing effects in global FDI flows after the COVID-19 pandemic, focusing on the experience of Emerging Asian economies. We also evaluate the nature of the pandemic's impact on existing FDI linkages between China and ASEAN. Part II delves into the implications of a cross-border policy framework such as the Belt and Road Initiative (BRI). In particular,

we examine ASEAN trade activity after China's investments through BRI. We further discuss the future of BRI in ASEAN economies amid the emergence of global competitors. Part III of the book zooms in on the effectiveness of domestic FDI policy reforms. We discuss the cases of Indonesia Special Economic Zones and the Make in India initiative. This book is written for scholars, policymakers and industrial practitioners who wish to gain more knowledge on the recent FDI dynamics of Emerging Asia.

**Encyclopedia of Geography Terms, Themes, and Concepts** Reuel R. Hanks, 2011-10-17 This text provides an essential reference handbook for students of geography and related social sciences. How did the Greek geographer Eratosthenes make an accurate calculation of the earth's circumference more than 1,500 years before the first voyage of Columbus to the New World? What are the green belts of England that dominate its rural landscape? And what is regarded as the driest continent on the planet? This handbook offers a broad coverage of terminology and concepts, serving as both an encyclopedic dictionary of geography terms and an approachable overview to the human and physical aspects of world geography. Approximately 150 geographic terms and concepts are defined and discussed, providing an accessible reference for anyone who requires a deeper knowledge of the language and ideas that are important to geography as a discipline. Helpful sidebars are provided to shed light on unusual or controversial theories and concepts. All major geographic concepts and terms are addressed and comprehensively explained using examples.

**Special Economic Zones in Africa** Thomas Farole, 2011-01-01 This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the

factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world.
