The Statistics of Poker Steve Selbrede,2013-06-01 This 3rd Edition analyzes six million hand histories to identify the most profitable online No Limit Hold'em poker strategies, (an increase from 2 million in the 2nd edition). The new edition also includes additional new content. These optimal strategies are verified for stakes between NL10 (\$0.05/\$0.10) and NL200 (\$1.00/\$2.00) full ring online games. Despite the title, this book is not really a mathematics book, though it is certainly statistical behind the curtain. It assumes that the reader is already familiar with No Limit Hold'em and much of the poker jargon that goes with it. It does not teach you how to play basic NLH. The hope is that you will recognize the basic truths revealed by the analysis and be inspired to incorporate them into your own game.

Omaha High-Low for Low-Limit Players Bill Boston, If you already have experience playing low-limit Omaha high-low – \$2/\$4, \$3/\$6, \$4/\$8 and \$5/\$10 limit games – but have not yet become a consistent winner, this book is for you! Bill Boston ran millions of simulation hands, and combined these results with advice from practical play so that you can master hand selection and improve your game. Using the statistical charts Boston has painstakingly tabulated and his seasoned playing advice, you'll be able to more accurately predict the results of playing great, good, marginal and bad cards, which will give you a great advantage over your opponents.

The expert advice offered in this unique reference manual will help any poker player gain the extra advantage to come out ahead in their next game of Texas Hold'Em!

The Routledge Companion to Copyright and Creativity in the 21st Century Michelle Bogre,Nancy Wolff,2020-11-25 These collected chapters and interviews explore the current issues and debates about how copyright will or should adapt to meet the practices of 21st-century creators and internet users. The book begins with an overview of copyright law basics. It is organized by parts that correspond to creative genres: Literary Works, Visual Arts, Fine Art, Music, Video Games and Virtual Worlds, Fashion, and Technology. The chapters and interviews address issues such as copyright ownership in work created by Artificial Intelligence (AI), the musical remix market, whether appropriation is ever a fair use of a copyrighted work or if it is always theft, and whether internet- based platforms should do more to deter piracy of creators' works. Each part ends with an essay explaining the significance of one or two landmark or trendsetting cases to help the reader understand the practical implications of the law. Written to be accessible to both lay and legal audiences, this unique collection addresses contemporary legal issues that all creators need to understand and will be essential reading for artists, designers, and musicians as well as the lawyers who represent them.

How to Stay Smart in a Smart World Gerd Gigerenzer,2022-08-02 How to stay in charge in a world populated by algorithms that beat us in chess, find us romantic partners, and tell us to “turn right in 500 yards.” Doomsday prophets of technology predict that robots will take over the world, leaving humans behind in the dust. Tech industry boosters think replacing people with software might make the world a better place-while tech industry critics warn darkly about surveillance capitalism. Despite their differing views of the future, they all agree: machines will soon do everything better than humans. In *How to Stay Smart in a Smart World*, Gerd Gigerenzer shows why that’s not true, and tells us how we can stay in charge in a world populated by algorithms. Machines powered by artificial intelligence are good at some things (playing chess), but not others (life-and-death decisions, or anything involving uncertainty). Gigerenzer explains why algorithms often fail at finding us romantic partners (love is not chess), why self-driving cars fall prey to the Russian Tank Fallacy, and how judges and police rely increasingly on nontransparent “black box” algorithms to predict whether a criminal defendant will reoffend or show up in court. He invokes Black Mirror, considers the privacy paradox (people want privacy, but give their data away), and explains that social media get us hooked by programming intermittent reinforcement in the form of the “like” button. We shouldn’t trust smart technology unconditionally, Gigerenzer tells us, but we shouldn’t fear it unthinkingly, either.

My Life as a Night Elf Priest Bonnie Nardi,2010-05-25 Ever since the creators of the animated television show South Park turned their lovingly sardonic gaze on the massively multiplayer online game World of Warcraft for an entire episode, WoW's status as an icon of digital culture has been secure. My Life as a Night Elf Priest digs deep beneath the surface of that icon to explore the rich particulars of the World of Warcraft player's experience. —Julian Dibbell, Wired World of Warcraft is the best representative of a significant new technology, art form, and sector of society: the theme-oriented virtual world. Bonnie Nardi's pioneering transnational ethnography explores this game both sensitively and systematically using the methods of cultural anthropology and aesthetics with intensive personal experience as a guild member, media teacher, and magical quest Elf. —William Sims Bainbridge, author of The Warcraft Civilization and editor of Online Worlds “Nardi skillfully covers all of the hot button issues that come to mind when people think of video games like World of Warcraft such as game addiction, sexism, and violence. What gives this book its value are its unexpected gems of rare and beautifully detailed research on less sensationalized topics of interest such as the World of Warcraft player community in China, game modding, the increasingly blurred line between play and work, and the rich and fascinating lives of players and player cultures. Nardi brings World of Warcraft down to earth for non-players and ties it to social and cultural theory for scholars. . . . the best ethnography of a single virtual world produced so far.” —Lisa Nakamura, University of Illinois World of Warcraft rapidly became one of the most popular online world games on the planet, amassing 11.5 million subscribers—officially making it an online community of gamers that had more inhabitants than the state of Ohio and was almost twice as populous as Scotland. It's a massively multiplayer online game, or MMO in gamer jargon, where each person controls a single character inside a virtual world, interacting with other people's characters and computer-controlled monsters, quest-givers, and merchants. In My Life as a Night Elf Priest, Bonnie Nardi, a well-known ethnographer who has published extensively on how theories of what we do intersect with how we adopt and use technology, compiles more than three years of participatory research in Warcraft play and culture in the United States and China into this field study of player behavior and activity. She introduces us to her research strategy and the history, structure, and culture of Warcraft; argues for applying activity theory and theories of aesthetic experience to the study of gaming and play; and educates us on issues of gender, culture, and addiction as part of the play experience. Nardi paints a compelling portrait of what drives online gamers both in this country and in China, where she spent a month studying players in Internet cafes. Bonnie Nardi has given us a fresh look not only at World of Warcraft but at the field of game studies as a whole. One of the first in-depth studies of a game that has become an icon of digital culture, My Life as a Night Elf Priest will capture the interest of both the gamer and the ethnographer. Bonnie A. Nardi is an anthropologist by training and a professor in the Department of Informatics in the Donald Bren School of Information and Computer Sciences at the University of California, Irvine. Her research focus is the social implications of digital technologies. She is the author of A Small Matter of Programming: Perspectives on End User Computing and the coauthor of Information Ecologies: Using Technology with Heart and Acting with Technology: Activity Theory and Interaction Design.
