Trevor Noah

Saragosa, Texas, Tornado May 22, 1987 National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Division of Natural Hazard Mitigation, Committee on Natural Disasters, 1991-02-01 The small community of Saragosa, Texas, was devastated by a violent multiple-vortex tornado on Friday, May 22, 1987. Despite the extensive warning dissemination efforts, which are documented in this book, the overall warning system in Saragosa failed to reach most of the residents in time for them to take effective safety measures. The primary purpose of this book is to combine the information provided by the respondents to a postdisaster survey with the facts surrounding the tornado in order to understand and evaluate the severe weather warning procedures used in Reeves County, Texas, where Saragosa is located. The evaluation of this survey is intended to determine ways of adjusting existing warning systems and better prepare the citizens, public officials, and news media in Reeves County, as well as in every city, county, and township where severe weather threatens lives and property.

Scanners And Secret Frequencies Henry Eisenson, 1994-01-01 This cynical and immensely entertaining book describes the scanner world, the people in it, the equipment they use, and how they acquire and tune in to the secret frequencies.

Tom and Huck Don't Live Here Anymore Ron Powers,2002-09-14 From a Pulitzer Prize-winning author, Tom and Huck Don't Live Here Anymore is a powerful, disturbing, and eye-opening dispatch from the homefront that will take its place alongside the works of Antony Lucas, Robert Coles, and Tracy Kidder. Ron Powers' hometown is Hannibal, Missouri, home of Mark Twain, and therefore birthplace of our image of boyhood itself. Powers returns to Hannibal to chronicle the horrific story of two killings, both committed by minors, and the trials that followed. Seamlessly weaving the narrative of the events in Hannibal with the national withering of the very concept of childhood, Powers exposes a fragmented adult society where children are left adrift, transforming isolation into violence. Powers's storytelling style keeps such good control over the pacing, readers will know they're not headed for a disappointment at the ending. - Publishers Weekly

Born a Crime Trevor Noah,2016-11-15 #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best

books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

Physics of Radio-Frequency Plasmas Pascal Chabert, Nicholas Braithwaite, 2011-02-24 Low-temperature radio frequency plasmas are essential in various sectors of advanced technology, from micro-engineering to spacecraft propulsion systems and efficient sources of light. The subject lies at the complex interfaces between physics, chemistry and engineering. Focusing mostly on physics, this book will interest graduate students and researchers in applied physics and electrical engineering. The book incorporates a cutting-edge perspective on RF plasmas. It also covers basic plasma physics including transport in bounded plasmas and electrical diagnostics. Its pedagogic style engages readers, helping them to develop physical arguments and mathematical analyses. Worked examples apply the theories covered to realistic scenarios, and over 100 in-text questions let readers put their newly acquired knowledge to use and gain confidence in applying physics to real laboratory situations.
