**Sociedad Digital en España 2019** Fundación Telefónica,2020-05-27 Vivimos inmersos en un proceso de transformación que nos lleva hacia una sociedad digital conectada. España está experimentando cambios trascendentales derivados de una revolución tecnológica sin precedentes que se extiende por todo el mundo. Un año más, Fundación Telefónica ha llevado a cabo un riguroso estudio sobre el avance de la transición digital en nuestro país. El informe Sociedad Digital en España, además de reflejar los indicadores que ponen en relieve el estado de desarrollo de las infraestructuras y de los servicios de telecomunicaciones, se adentra en el análisis sobre cómo esta gran ola de innovación está remodelando el tejido socioeconómico nacional. Al igual que en las ediciones precedentes, este estudio parte de tres fuentes de información: la ofrecida por los principales indicadores nacionales e internacionales sobre el ecosistema digital, aquella que surge de las encuestas a clientes de las unidades de negocio de Telefónica y, por último, la visión regional que han aportado directamente las comunidades autónomas. En la edición 2019 del informe se tratan temas como los desafíos y oportunidades que nos plantea la inteligencia artificial, la tecnología blockchain como garante de las relaciones entre distintas partes dentro de un mundo virtual, las ventajas en términos de productividad que consiguen las nuevas fábricas inteligentes de la industria 4.0, o sobre cómo cada vez más aspectos de nuestras vidas transcurren en la esfera ciberespacio. Sociedad Digital en España persigue establecer una imagen fiel sobre cómo se va convirtiendo nuestro país en una sociedad en red, señalando los logros alcanzados, pero, igualmente, poniendo en relieve los retos que enfrentamos para no dejar a nadie en el camino, garantizando una transición inclusiva que, más allá de la tecnología, esté centrada en las personas.

**Habilidades directivas** Julio García del Junco,José Manuel Brás Dos Santos,2020-02-06 La tarea de dirigir es sencilla y compleja a la vez. Dirigir un equipo, una empresa, un proyecto o cualquier organización lo hacen muchas personas. Dirigir con éxito no lo hacen tantas. Conquistar el Polo Sur lo logró Amundsen frente al fracaso de Scott, y la victoria de Blas de Lezo con un puñado de hombres y algunos barcos frente al almirante Edward Vernon con 180 navíos y 23.600 soldados, es un caso excepcional. Eran directores extraordinarios, pero todos podemos llegar a ser uno de ellos: sólo necesitamos preparación. Los tiempos actuales no son sencillos y por eso ser un buen director reporta grandes beneficios tanto a la organización representada como a la persona. Es muy importante desarrollar las cualidades innatas en casi todas las personas, y más si desean dirigir o están dirigiendo. En esta nueva edición corregida y ampliada se documentan y enseñan las habilidades imprescindibles para dirigir en cualquier tipo de organización. Enseña habilidades relacionadas con su entorno inmediato (dirigir equipos de alto rendimiento y gestión del tiempo), facilita un instrumento práctico y sencillo para conocer cómo hacerlo mejor (modelo L-J) y para saber cómo conectar con el exterior y hacerlo con éxito (hablar en público, persuasión y dinámica de reuniones). También penetra en el mundo interior del director para que se conozca mejor y pueda gestionar su propia felicidad y desarrollo profesional. Todo se trata de forma práctica, incluyendo test de autoconocimiento y amenas lecturas a modo de fábulas. El libro está orientado a toda persona encargada de dirigir o deseosa de hacerlo.

*Masculinities under Neoliberalism* Andrea Cornwall,Frank G. Karioris,Nancy Lindisfarne,2016-05-15 Neoliberalism has had a radical impact on the lived, gendered experiences of people around the world. But while the gendered dimensions of neoliberalism have already received significant scholarly attention, the existing literature has given little consideration to men's identities and experiences. Building on the work of Cornwall and Lindisfarne's landmark text *Dislocating Masculinity*, this collection provides a fresh perspective on gender dynamics under neoliberalism. Bringing together a series of short, readable case studies drawn from new ethnographic fieldwork, its subjects range from the experiences of working-class men in Putin's Russia to colonial masculinities in Southern Rhodesia, and from young British Muslim men to amateur footballers in Jamaica.

**The History of Archaeology** Paul Bahn,2014-01-10 The History of Archaeology: An Introduction provides global coverage with chapters devoted to particular regions of the world. The regional approach allows readers to understand the similarities and differences in the history of and approach to archaeology in various parts of the world. Each chapter is written by a specialist scholar with experience of the region concerned. Thus the book focuses on the earliest beginnings of archaeology in different parts of the world, and how it developed from being a pastime for antiquarians and collectors to a serious attempt to obtain information about past societies. Woven into the text are various boxes that explore key archaeologists, sites and important discoveries in the history of archaeology enriching the story of the discipline's development. With such far ranging coverage, including an exploration of the little covered development of Russian and Chinese archaeology, The

History of Archaeology is the perfect introduction to the history of archaeology for the interested reader and student alike.

**Global History and New Polycentric Approaches** Manuel Perez Garcia, Lucio De Sousa, 2017-12-06 This book is open access under a CC BY 4.0 license. Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline had evolved in various historiographies, from Anglo Saxon to southern European, and its emergence in Asia with the rapid development of the Chinese economy motivation to legitimate the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography, which have been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly mobility, diversity and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on how global history has penetrated in western and eastern historiographies, moving the pivotal axis of analysis from national perspectives to open new venues of global history.

*Human-Computer Systems Interaction* Zdzisław S. Hippe, Juliusz Lech Kulikowski, 2009-10-13 For the last decades, as the computer technology has been developing, the importance of human-computer systems interaction problems was growing. This is not only because the computer systems performance characteristics have been improved but also due to the growing number of computer users and of their expectations about general computer systems capabilities as universal tools for human work and life facilitation. The early technological problems of man-computer information exchange - which led to a progress in computer programming languages and input/output devices construction - have been step by step dominated by the more general ones of human interaction with-and-through computer systems, shortly denoted as H-CSI problems. The interest of scientists and of any sort specialists to the H-CSI problems is very high as it follows from an increasing number of scientific conferences and publications devoted to these topics. The present book contains selected papers concerning various aspects of H-CSI. They have been grouped into five Parts: I. General H-CSI problems (7 papers), II. Disabled persons helping and medical H-CSI applications (9 papers), III. Psychological and linguistic H-CSI aspects (9 papers), IV. Robots and training systems (8 papers), V. Various H-CSI applications (11 papers).
