A Curious Friendship Anna Thomasson,2015-03-26 I loved A Curious Friendship. Anna Thomasson, in her first book, has brilliantly captured this strange coterie.' Sir Roy Strong The winter of 1924: Edith Olivier, alone for the first time at the age of 51, thought her life had come to an end. For Rex Whistler, a 19-year-old art student, life was just beginning. They were to start an intimate and unlikely friendship that would transform their lives. Gradually Edith's world opened up and she became a writer. Her home, the Daye House, in a wooded corner of the Wilton estate, became a sanctuary for Whistler and the other brilliant and beautiful younger men of her circle: among them Siegfried Sassoon, Stephen Tennant, William Walton, John Betjeman, the Sitwells and Cecil Beaton - for whom she was 'all the muses'. The story is set against the backdrop of a period that spanned the madcap parties of the 1920s, the sophistication of the 1930s and the drama and austerity of the Second World War. With an extraordinary cast of friends and acquaintances, from the Royal Family to Tallulah Bankhead, Anna Thomasson's A Curious Friendship brings to life, for the first time, the curious, unlikely and fascinating friendship of a bluestocking and a bright young thing.

Everyday Information William Aspray,Barbara M. Hayes,2011 This book examines the evolution of information seeking in nine areas of everyday American life. --from publisher description.

Maritime Security and Indonesia Senia Febrica,2017-03-27 Indonesia is the largest archipelago state in the world comprising 17,480 islands, with a maritime territory measuring close to 6 million square kilometres. It is located between the two key shipping routes of the Pacific and Indian Ocean. Indonesia's cooperation in maritime security initiatives is vitally important because half of the world's trading goods and oil pass through Indonesian waters, including the Straits of Malacca, the Strait of Sunda and the Strait of Lombok. This book analyses Indonesia's participation in international maritime security cooperation. Using Indonesia as a case study, the book adopts mixed methods to assess emerging power cooperation and non-cooperation drawing from various International Relations theories and the bureaucratic politics approach. It addresses not only the topic of Indonesia's cooperation but also engages in debates across the International Relations, political science and policy studies disciplines regarding state cooperation. Based on extensive primary Indonesian language sources and original interviews, the author offers a conceptual discussion on the reasons underlying emerging middle power participation or non-participation in cooperation agreements. The analysis offers a fresh perspective on the growing problems of maritime terrorism and sea robbery and how an emerging power deals with these threats at unilateral, bilateral, regional and multilateral levels. The book fills a significant gap in literature on Indonesian foreign policy making in the post-1998 era. It provides the first in-depth study of Indonesia's decision making process in the area of maritime security and will thus be of interest to researchers in the field of comparative politics, international relations, security policy, maritime cooperation, port and shipping businesses and Southeast Asian politics and society.

What Ever Happened to the Faculty? Mary Burgan,2006-11-24 In this provocative work, Mary Burgan surveys the deterioration of faculty influence in higher education. From campus planning, curriculum, and instructional technology to governance, pedagogy, and academic freedom, she urges far greater consideration for the perspective of the faculty. Burgan evokes the pervasive atmosphere of charge and counter-charge on U.S. campuses, where competition trumps reason not only in athletics but also in research, faculty recruitment, and fund-raising. Relating this winner-take-all mentality to the overspecialization of faculty and to overreliance on non-tenure track instructors, Burgan suggests that improving life on campus depends on faculty members' successful engagement with their administrative colleagues as well as their students. Informed by experience, fueled by conviction, and full of practical, strategic advice for the future, What Ever Happened to the Faculty? is an excellent resource for administrators and faculty who are eager to change the tone and trajectory of contemporary higher education.

Transboundary Water Resources in Afghanistan John F. Shroder,Sher Jan Ahmadzai,2016-06-13 Transboundary Water from Afghanistan: Climate Change, and Land-Use Implications brings together diverse factual material on the physical geography and political, cultural, and economic implications of Southwest Asian transboundary water resources. It is the outgrowth of long-term deep knowledge and experience gained by the authors, as well as the material developed from a series of new workshops funded by the Lounsbery Foundation and other granting agencies. Afghanistan and Pakistan have high altitude mountains providing vital water supplies that are highly contentious necessities much threatened by climate change, human land-use variation, and political manipulation, which can be managed in new ways that are in need of comprehensive discussions and negotiations between all the riparian nations of the Indus watershed (Afghanistan, China, India, and Pakistan). This book provides a description of the basic topographic configuration of the Kabul River tributary to the Indus river, together will all its tributaries that flow back and forth across the border between Afghanistan and Pakistan, and the basic elements that are involved with the hydrological cycle and its derivatives in the high mountains of the Hindu Kush and Himalaya. Synthesizes information on the physical geography and political, cultural, and economic implications of Southwest Asian transboundary water resources Offers a basic topographic description of the Indus River watershed Provides local water management information not easily available for remote and contentious border areas Delivers access to the newest thinking from chief personnel on both sides of the contentious border Features material developed from a series of new workshops funded by the Lounsbery Foundation and other granting agencies

Regulating Cannabis DR Todd Subritzky,2021-07-23 A 5-year investigation of the implementation of the world's first fully regulated cannabis market for pleasure in Colorado Kind words for Regulating Cannabis This book clearly demonstrates authority in the field of international drug policy and draws predominantly on the latest evidence in doing so. It is a substantial contribution to an emerging policy issue with a plethora of new knowledge displayed throughout. Overall, I found this to be a vital addition to the canon of knowledge regarding cannabis policy change Dr Mark Monaghan Head of the Department of Social Policy, Sociology and Criminology University of Birmingham

“The author has broadened the understanding of cannabis regulation when it comes to conflicts between consumer protection, private profit, and public health. He has successfully applied and enriched several theoretical concepts in the context of cannabis legalization, especially when it comes to ‘the elephant in the room’ - the wellness potential of cannabis on legal markets” Vendula Belackova, PhD Drug Policy Researcher & Adjunct Senior Lecturer at the Social Policy Research Centre, University of New South Wales

Contents at a glance

At a time when cannabis legalisation is spreading across an increasing number of jurisdictions globally, this book cuts across the noise and presents a factual account of issues faced by regulators in the real-world context of Colorado. It can be read as an evidence-based handbook for regulators and should be a first port of call for anyone interested in the legalisation of cannabis. In January 2014, Colorado implemented a commercial cannabis market for pleasure - the first jurisdiction globally to implement a regulated, adult-use cannabis supply chain from seed-to-sale. It was reported as an historic occasion that presaged a grand social and economic experiment in drug legalisation. Including analysis of hundreds of pages of government documents, almost 1000 media articles, and interviews in the field with over 30 senior government officials, industry executives, and front-line public health representatives, this book is the definitive account of real-world cannabis policy implementation. The cannabis academic public health literature is examined prodigiously including its potential for harm and benefit together with alternative regulatory approaches. The book also features a number of papers published in academic journals based on the PhD research of the author. The commodification of cannabis vs the craft approach together with the entanglement of the medical and recreational markets are two of many topical themes discussed in detail. Multiple recommendations relevant for other jurisdictions considering the legalisation of cannabis are presented. Recognising the limitations of harm reduction approaches that cannot conceptually conceive beneficial aspects of cannabis consumption, a new framework, the spectrum of wellness is proposed as an alternative in Appendix 1 of the book.

Calling the Shots Daniel P. Gitterman, 2017-02-14

Modern presidents are CEOs with broad powers over the federal government. The United States Constitution lays out three hypothetically equal branches of government—the executive, the legislative, and the judicial—but over the years, the president, as head of the executive branch, has emerged as the usually dominant political and administrative force at the federal level. In fact, Daniel Gitterman tells us, the president is, effectively, the CEO of an enormous federal bureaucracy. Using the unique legal authority delegated by thousands of laws, the ability to issue executive orders, and the capacity to shape how federal agencies write and enforce rules, the president calls the shots as to how the government is run on a daily basis. Modern presidents have, for example, used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers. Presidents and their staffs use specific tools, including executive orders and memoranda to agency heads, as instruments of control and influence over the government and the private sector. For more than a century, they have used these tools without violating the separation of powers. *Calling the Shots* demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal.

Constitutional Change and Transformation in Latin America Richard Albert, Carlos Bernal, Juliano Zaiden Benvindo, 2019-07-25

Over the past 30 years, Latin America has lived through an intense period of constitutional change. Some reforms have been limited in their design and impact, while others have been far-reaching transformations to basic structural features and fundamental rights. Scholars interested in the law and politics of constitutional change in Latin America are turning increasingly to comparative methodologies to expose the nature and scope of these changes, to uncover the motivations of political actors, to theorise how better to execute the procedures of constitutional reform, and to assess whether there should be any limitations on the power of constitutional amendment. In this collection, leading and emerging voices in Latin American constitutionalism explore the complexity of the vast topography of constitutional developments, experiments and perspectives in the region. This volume offers a deep understanding of modern constitutional change in Latin America and evaluates its implications for constitutionalism,

democracy, human rights and the rule of law.

Advanced Analysis of Steel Frames W.F. Chen,2018-01-18 The development of the limit state approach to design in recent years has focused particular attention on two basic requirements: accurate information regarding the behavior of structures throughout the entire range of loading up to the ultimate strength, and simple practical procedures to enable engineers to assess this behavior. This book satisfies these requirements by providing practical analysis methods for the design of steel frames. The book contains a wide range of second-order analyses: from elastic to inelastic, rigid to semi-rigid connections, and simple plastic hinge method to sophisticated plastic-zone method. Computer programs for each analysis are provided in the form of a floppy disk for easy implementation. Sample problems are described and user's manuals are well documented for each program developed in the book.

[1d pipe flow me 448 548 applied cfd computer action team](#) - Jun 14 2023
web overview this page has links to matlab code and documentation for the finite volume solution to the one dimensional equation for fully developed flow in a round pipe $\mu r r r u r p x 0 \mu r r r u r p x 0$
[the wise research group florida international university](#) - Dec 28 2021
web flows in pipe networks is a matlab code for computing flow discharges and pressures in complex pipe networks unlimited number of pipes curb and grate inlet flows and pipe flows july 2008 august 2009 for the street and pipe flows a finite volume shock capturing scheme was used collaborator prof leonardo nania universidad de granada
pipe tl mathworks makers of matlab and simulink - Jan 29 2022
web the pipe tl block represents thermal liquid flow through a pipe the block finds the temperature across the pipe from the differential between ports pipe elevation and any additional heat transfer at port h the pipe can have a constant or varying elevation between ports a and b
[transient pipe flow file exchange matlab central](#) - Jul 15 2023
web jan 22 2007 compute the transient velocity profile of a flow in a pipe separation of variables allows the determination of the transient velocity profile in a pipe the present program computes the zeros of the bessel function
developing a one dimensional two phase fluid flow model in - Jul 03 2022
web in this thesis a one dimensional two fluid model is developed in matlab simulink the model features a mass momentum and energy balance for each fluid an ideal gas and an incompressible liquid the simulation may model a straight pipe section or a pipe section that involves a cross sectional area change
[a pipe flow code](#) - Jun 02 2022

simple algorithm for pipe flow matlab answers - Jan 09 2023
web jul 1 2014 simple algorithm for pipe flow learn more about laminar pipe flow simple algorithm velocity profile semi implicit method for pressure linked equations
[pipe flow analysis with matlab computer action team](#) - Aug 16 2023
web this document describes a collection of matlab programs for pipe flow analysis using these functions it is relatively easy to perform head loss calcu lations solve flow rate problems generate system curves and find the design point for a system and pump governing equations figure 1 shows a single pipe flow system
[openpipeflow org](#) - Sep 05 2022
web code features primitive variable pipe flow code for incompressible flow simple scripts for visualisation with matlab octave visit readable fortran 90 uses modules and derived types no esoteric extensions core program 3000 lines spatial discretisation double fourier theta z finite difference r
rigid conduit for fluid flow in two phase fluid systems matlab - Aug 04 2022
web library two phase fluid elements description the pipe 2p block models the flow dynamics of a two phase fluid inside a rigid pipe the dynamic compressibility and thermal capacity of the fluid are assumed non negligible the two phase fluid conserving ports a and b represent the pipe inlets
[flow in the pipe matlab answers matlab central mathworks](#) - Mar 11 2023
web dec 9 2014 i want to show flow s displacement using v in second plot like animation second plot means pipe starting point velocity in pipe is 0 but t 0 1 100 flow is moving velocity is side velocity slower than the center velocity
a compact and fast matlab code solving the incompressible navier stokes - Oct 06 2022
web this code shall be used for teaching and learning about incompressible viscous flows it is an example of a simple numerical method for solving the navier stokes equations
simulate flow through pipe verify results by coding on matlab - Apr 12 2023
web jun 23 2020 aim to simulate flow through pipe for different reynolds number to perform grid dependency test and to verify the results by coding using matlab description and governing equations types of flow laminar flow laminar flow is characterized by smooth streamlines and highly ordered motion
question on code to calculate pipe flow matlab answers - Feb 10 2023

matlab code to solve the channel flow problem mathworks - May 13 2023
web apr 14 2020 this is a matlab code that uses finite volume method to discretize the channel flow domain to solve the continuity and the x y momentum equations using the semi implicit method for pressure linked equation simple u v velocities are declared and solved along the staggered mesh while the pressure uses the normal mesh
pipeline matlab expressions matlab simulink mathworks - Mar 31 2022
web pipeline matlab expressions with the coder hdl pipeline pragma you can specify the placement and number of

pipeline registers in the hdl code generated for a matlab expression if you insert pipeline registers and enable distributed pipelining hdl coder automatically moves the pipeline registers to break the critical path

[matlab code for pipe flow cfd online discussion forums](#) - Nov 07 2022

web jul 6 2011 2d flow of 2 parallel plates is not the same as flow through a pipe take for instance permeability of the pipe plates in case of a pipe $k_r = 2.8$ where for 2 plates $k_r = 2.3$ so be carefull interpreting your results from the 2d simulation i would also suggest you go to cylindrical coordinates if you really want to simulate pipeflow good

the wise research group - Feb 27 2022

web apr 15 2015 flows in pipe networks is a matlab code for computing flow discharges and pressures in complex pipe networks unlimited number of pipes this code can also handle any number of pumps
