*Fail Fast or Win Big* Bernhard Schroeder,2015-02-18 With today's marketplace changing at lightning speed, how can entrepreneurs spend the traditional several months perfecting their business plans and finding investors before finally launching their business? They can't! Because the truth is, the longer they take to launch their company, the more changes there will be in the marketplace--causing their business to be outdated before it even begins!Today's entrepreneurs must avoid the temptation to play it safe and launch a business in a bubble. Instead, they need to embrace the idea of "failing fast." Almost upon genesis of the idea, it is detrimental for the entrepreneur to connect with real customers and determine quickly whether their idea is worth pursuing, needs new direction, or should be abandoned altogether.In the groundbreaking, tell-it-like-it-is Fail Fast or Win Big, entrepreneurs will learn how to: • Create a rapid prototype of their product or service• Develop a business model instead of a business plan• Test it repeatedly with customers so they can spot failure early• Continue to refine the model based on customer interactions• Leverage their network and resources in order to run leanComplete with real-life examples of entrepreneurs who set out to fail fast and ended up winning big, Fail Fast or Win Big is the business plan you didn't study in college. But just like the marketplace, those outdated concepts have changed too!

***Nomads of the Borneo Rainforest*** Bernard Sellato,1994-08-01 The Punan societies of Borneo, traditionally nomadic rainforest hunters and gatherers, have undergone a transformation over the past centuries. As downriver farming peoples expanded upstream and their cultures and technologies diffused, the Punan gradually abandoned their nomadic existence for a more sedentary life of trade-related activities and subsistence agriculture. But the culture that has emerged from these changes is still based on the enduring ideological premises of nomadism. This study, historical in perspective, examines the many factors-ecological, economic, commercial, political, social, cultural, and ideological-that have played a part in this continuing transformation. Foreword by Georges Condominas.
