7 Practical Tips to Achieve a Positive Mindset David A. OSEI, 2019-11-12 Do you view yourself as someone who has a positive outlook on life? Do you hope that good things are coming your way soon? Well, one thing that is important to note is that positive thinking is a mental and emotional attitude. It pays a closer focus and interest on the bright side of life with the hope of having a positive outcome. Having positive thinking does not mean that you should bury your head in the sand. It does not mean that you should ignore life's painful and unpleasant situations. It simply means having the ability to approach life more positively and productively even in the face of unpleasantness. Even when things are not going your way, you keep your head up and look for hidden lessons and opportunities in bad situations! It is important for you to notice that you have the power to change your mindset. It all starts with self-talk. In other words, you must begin by stimulating endless streams of positive thoughts running through your head. The truth is, these thoughts can take two forms; the negative and the positive mainly because most of what you think are derived from logic and reason. However, other self-talks may arise from having misconceptions and assumptions that result from a lack of information. If you mostly have negative thoughts running

through your mind, most likely you are a pessimist. On the other hand, if most of the thoughts you have about life are mostly positive, there is a good chance that you are an optimist. In other words, you are someone that exercises positive thinking. When you focus on the positive, you will mentally anticipate good health, success, and happiness. You believe that even when faced with the most challenging and difficult situations, you will eventually overcome them. In other words, having positive thinking is not a concept that everyone believes in. Some people will see it as nonsense and scoff at those that believe in the power of positive thinking. The good news is that there are so many people who are slowly seeing the important role that positive thinking has on their lives and believe that it is effective.
