Internationalisation of Post-1992 UK Universities Peter Brady,2020-03-19 When they gained university status ex-polytechnics expected to be funded on a par with their new university colleagues. This was not the case and a number of government initiatives encouraged them to look overseas to recruit fee-paying students. 'Internationalisation of Post-1992 UK Universities' details how the reaction to these initiatives changed the nature of post-1992 universities. It also looks at how these universities work overseas and how foreign government strategies and policies mean that they are helping competitors and ensuring that foreign students gain a better educational experience than home students.

Where The UK Went Wrong (Post WWII): A Personal Journey, 2nd Edition, Revised Alastair Macdonald Hart,2017-02-27 Born at the beginning of 1952, the Author missed World War II by less than seven years, yet the effects were still being felt all around him. Rationing and bomb sites were the norm as he grew up in a once great country still reeling from the effects of the most devastating war in world history. He considers himself lucky to have been born in the UK. He also considers himself lucky to have lived through the golden years, enjoying a level of prosperity his children and children's children will only be able to dream of. In both *Where the UK Went Wrong* [1945-2015] and *Where the UK Went Wrong* [Post WW11], second edition, the author compares the post-war commitment to social cohesion and universal prosperity with the late twentieth and early twenty-first centuries' weak, divisive, and ineffective political leadership (of all political parties) and the Darwinian 'survival of the fittest' society they have sought to create.

Post-war Architecture between Italy and the UK Lorenzo Ciccarelli,Clare Melhuish,2021-10-14 Italy and the UK experienced a radical re-organisation of urban space following the devastation of many towns and cities in the Second World War. The need to rebuild led to an intellectual and cultural exchange between a wave of talented architects, urbanists and architectural historians in the two countries. *Post-war Architecture Between Italy and the UK* studies this exchange, exploring how the connections and mutual influences contributed to the formation of a distinctive stance towards Internationalism, notwithstanding the countries' contrasting geographic and climatic conditions, levels of economic and industrial development, and social structures. Topics discussed in the volume include the influence of Italian historic town centres on British modernist and Brutalist architectural approaches to the design of housing and

university campuses as public spaces; post-war planning concepts such as the precinct; the tensions between British critics and Italian architects that paved the way for British postmodernism; and the role of architectural education as a melting pot of mutual influence. It draws on a wealth of archival and original materials to present insights into the personal relationships, publications, exhibitions and events that provided the crucible for the dissemination of ideas and typologies across cultural borders. Offering new insights into the transcultural aspects of European architectural history in the post-war years, and its legacy, this volume is vital reading for architectural and urban historians, planners and students, as well as social historians of the European post-war period.

The Governance of Agriculture in Post-Brexit UK Irene Antonopoulos, Matt Bell, Aleksandra Čavoški, Ludivine Petetin, 2022-02-27 This book provides a multidisciplinary analysis of the impact of Brexit on British agriculture and associated areas, discussing the Common Agricultural Policy and the Agriculture Act 2020. The Brexit referendum provoked new debates and questions over the future of agriculture in Britain and the potential positive and negative impacts of Brexit on both farmers and consumers. These debates, as well as the ensuing proposals relevant to the Agriculture Act 2020, have exposed the multidimensional effects of Brexit when it comes to agriculture. With a focus on profitability, the rights of farmers, environmental protection, as well as animal welfare, this book brings together an interdisciplinary analysis of the future of British agriculture in post-Brexit Britain. More specifically, it addresses the criticisms over the Common Agriculture Policy, presents an analysis of the Agriculture Act 2020, and considers suggestions for future developments. Through this analysis, the book suggests a way towards the future, with a positive outlook towards a competitive and sustainable agriculture that will satisfy the needs of farmers and consumers while ensuring environmental protection, animal welfare, and rural development. This book will be of great interest to students and scholars of food and agricultural policy and politics, agroecology and rural development, as well as policymakers involved in Britain's post-Brexit environmental policy.

Post-War Homelessness Policy in the UK Jamie Harding, 2019-08-14 This book discusses homelessness policy in the UK from 1945 to 2019. It identifies five key factors that have driven policy: the favoured explanations for homelessness, distinctions between different groups of homeless people, demand for social rented housing, geographical differences and the forms of prevention preferred by policy makers. The account analyses how these factors have influenced key pieces of legislation such as the 1948 National Assistance Act, the 1977 Housing (Homeless Persons) Act and the 2002 Homelessness Act. It also identifies the key issues that policy has sought to address at different times, including children being taken into care because of their parents' homelessness, rough sleeping, the use of bed and breakfast hotels as temporary accommodation, social exclusion and welfare reform. In addition to published sources and archival material, the book draws on the experiences of two former Ministers and other key figures in the development of homelessness policy.
