  Ryan Adams David Menconi,2012-09-01 A chronicle of Adams's rise from alt-

country to rock stardom, featuring stories about the making of the albums Strangers Almanac and Heartbreaker. Before he achieved his dream of being an internationally known rock personality, Ryan Adams had a band in Raleigh, North Carolina. Whiskeytown led the wave of insurgent-country bands that came of age with No Depression magazine in the mid-1990s, and for many people it defined the era. Adams was an irrepressible character, one of the signature personalities of his generation, and as a singer-songwriter he blew people away with a mature talent that belied his youth. David Menconi witnessed most of Whiskeytown's rocket ride to fame as the music critic for the Raleigh News & Observer, and in Ryan Adams, he tells the inside story of the singer's remarkable rise from hardscrabble origins to success with Whiskeytown, as well as Adams's post-Whiskeytown self-reinvention as a solo act. Menconi draws on early interviews with Adams, conversations with people close to him, and Adams's extensive online postings to capture the creative ferment that produced some of Adams's best music, including the albums Strangers Almanac and Heartbreaker. He reveals that, from the start, Ryan Adams had a determined sense of purpose and unshakable confidence in his own worth. At the same time, his inability to hold anything back, whether emotions or torrents of songs, often made Adams his own worst enemy, and Menconi recalls the excesses that almost, but never quite, derailed his career. Ryan Adams is a fascinating, multifaceted portrait of the artist as a young man, almost famous and still inventing himself, writing songs in a blaze of passion. "Menconi, a veteran music critic based in Raleigh, North Carolina, had a front row seat for alt-country wunderkind Ryan Adams' rise to prominence—from an array of local bands, to Whiskeytown, and on to a successful and prolific solo career. Here, Menconi enthusiastically revisits those heady days when the mercurial Adams' performances were either transcendent or tantrum-filled—the author was there for most of them, and he packs his book with tales of magical performances and utterly desperate train wrecks. . . . This interview- and anecdote-laden exposé of the artist's early career will doubtless find a happy home with Adams fans." —Publishers Weekly

Developing the Higher Education Curriculum Brent Carnell,Dilly Fung,2017-11-13 A complementary volume to Dilly Fung's A Connected Curriculum for Higher Education (2017), this book explores 'research-based education' as applied in practice within the higher education sector. A collection of 15 chapters followed by illustrative vignettes, it showcases approaches to engaging students actively with research and enquiry across disciplines. It begins with one institution's creative approach to research-based education – UCL's Connected Curriculum, a conceptual framework for integrating research-based education into all taught programmes of study – and branches out to show how aspects of the framework can apply to practice across a variety of institutions in a range of national settings. The 15 chapters are provided by a diverse range of authors who all explore research-based education in their own way. Some chapters are firmly based in a subject-discipline – including art history, biochemistry, education, engineering, fashion and design, healthcare, and veterinary sciences – while others reach across geopolitical regions, such as Australia, Canada, China, England, Scotland and South Africa. The final chapter offers 12 short vignettes of practice to highlight how engaging students with research and enquiry can enrich their learning experiences, preparing them not only for more advanced academic learning, but also for professional roles in complex, rapidly changing social contexts.

   Online Brand Communities Francisco J. Martínez-López,Rafael Anaya,Rocio Aguilar,Sebastián Molinillo,2015-12-11 This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

Ripped, torn and cut Subcultures Network,2018-08-02 Ripped, torn and cut offers a collection of original essays exploring the motivations behind — and the politics within — the multitude of fanzines that emerged in the wake of British punk from 1976. Sniffin' Glue (1976–77), Mark Perry's iconic punk fanzine, was but the first of many, paving the way for hundreds of home-made magazines to be cut and pasted in bedrooms across the UK. From these, glimpses into provincial cultures, teenage style wars and formative political ideas may be gleaned. An alternative history, away from the often-condescending glare of London's media and music industry, can be formulated, drawn from such titles as Ripped & Torn, Brass Lip, City Fun, Vague, Kill Your Pet Puppy, Toxic Grafity, Hungry Beat and Hard as Nails. The first book of its kind, this collection reveals the contested nature of punk's cultural politics by turning the pages of a vibrant underground press.

Planning to Teach History 2015-2016 Thompson Wayne 1958 - ,2015-03-20 This book is the result of research and teaching over a period of years. The method used to examine the teaching of History in secondary schools draws on the authors experience as a system analyst where detailed observations of current practice were undertaken and then compared what academic research indicated was best practice for teachers. The author worked as a teacher of History in ten secondary schools in metropolitan, regional, rural and remote schools in the Government, Catholic and Independent school sectors. Planning to Teach History is designed to provide pre-service and early career teachers with a bridge that takes them from their academic training to the classroom. It aims to: · Examine the links between academic research and what happens in the classroom, · Model the teaching of historical knowledge, historical concepts, historical skills in engaging ways integrating technology seamlessly into the classroom , · Provide insights into the professional life of a teacher with emphasis on communicating with parents through student reports, report comments and preparing for parent-teacher interviews, and · Provide Heads of Departments with a resource that offers innovative and engaging ideas on teaching and learning, assessment and reporting. The text covers the classroom environment exploring the characteristics of teachers and students, diversity within the student body and approaches to teaching that cater for this diversity. Content knowledge is a key factor in teaching successfully. The text asks the questions teachers need to be able to answer to teach the options within the curriculum. Productive pedagogy which was based on authentic pedagogy developed by Newman & other is reviewed as is the importance of developing relationships in the classroom. A range of teaching strategies is also examined. Technological knowledge involves knowing what options are available and how they can be used in the classroom. Integrating teacher content knowledge, pedagogical knowledge and technological knowledge into their classroom practice is important in producing students who have the work skills and abilities for the knowledge era. Mapping the curriculum is an important part of designing teaching and learning programs. Understanding what questions students need to explore and how they will demonstrate their knowledge and understanding are important precursors to designing units of work. The text maps the 7-10 History curriculum. Teaching and learning activities and evidence of learning are not in included for two reasons. Firstly, every class and school are different (resources, teacher abilities and technology) so choices of teaching and learning activities are best left to the teacher. Secondly, without access to a resource including a historical

narrative, historical sources and links to online resources the teaching and learning activities would be meaningless.
