Baltic Energy Technology Scenarios 2018 Tomi J. Lindroos,Antti Lehtilä,Tiina Koljonen,Anders Kofoed-Wiuff,János Hethey,Nina Dupont,Aisma Vītiņa,2018-04-05 Baltic Energy Technology Scenarios 2018 (BENTE) is a scenario-based energy system analysis that explores the changes in the Baltic countries' energy systems. What are the drivers and their impacts in the following decades? What would be required for the Baltic countries to meet their climate and energy targets in 2030, and what development would lead the Baltics towards a 2°C pathway? The report finds that the Baltic countries' proposed renewable energy (RE) targets can be achieved using domestic resources. More renewable energy (electricity, heat and fuels) lets energy demanding sectors reduce GHG emissions and increase the RE share. However, the Baltic countries still do not reach their Effort Sharing Sector's 2030 targets in the 4°C Scenario (4DS). Without policies to stimulate local renewable energy generation, the Baltics are likely to become large net importers of electricity.

IBM and Cisco: Together for a World Class Data Center Jon Tate,Pall Beck,Peter Clemens,Santiago Freitas,Jeff Gatz,Michele Girola,Jason Gmitter,Holger Mueller,Ray O'Hanlon,Veerendra Para,Joe Robinson,Andy Sholomon,Jason Walker,IBM Redbooks,2013-07-31 This IBM® Redbooks® publication is an IBM and Cisco collaboration that articulates how IBM and Cisco can bring the benefits of their respective companies to the modern data center. It documents the architectures, solutions, and benefits that can be achieved by implementing a data center based on IBM server, storage, and integrated systems, with the broader Cisco network. We describe how to design a state-of-the art data center and networking infrastructure combining Cisco and IBM solutions. The objective is to provide a reference guide for customers looking to build an infrastructure that is optimized for virtualization, is highly available, is interoperable, and is efficient in terms of power and space consumption. It will explain the technologies used to build the infrastructure, provide use cases, and give guidance on deployments.
