The Complete Guide to Affiliate Marketing on the Web Bruce C. Brown,2009 Affiliate marketing is a highly profitable online advertising method in which website merchants pay independent third parties to promote the products or services of an advertiser on their Web site. In other words, affiliate marketing involves posting a company s banner on your Web site or blog and attempting to send visitors to their Web site. If someone clicks on that banner or goes to that site and buys something, you will be paid a commission. While some affiliates pay only when a sale is made, some selling big ticket items like cars, credit cards, travel, and so forth have modified the model and pay for qualified leads. Affiliate marketing is now viewed as a key component of a company's online marketing strategy. Affiliate marketing is an advertising technique that originally was developed by Amazon.com. In this new book you will learn how to master the art and science behind affiliate marketing in a matter of hours. By investing a few dollars you can easily increase the number of visitors to your Web site and significantly increase sales. If you want to drive high quality, targeted traffic to your site, there is no better way than affiliate marketing. The Complete Guide to Affiliate Marketing on the Web Jack Knight,2014-11-26 Affiliate marketing is a type of performance-based marketing in which a business rewards one or more affiliates for each visitor or customer brought by the affiliate's own marketing efforts. The industry has four core players: the merchant (also known as 'retailer' or 'brand'), the network (that contains offers for the affiliate to choose from and also takes care of the payments), the publisher (also known as 'the affiliate'), and the customer. The market has grown in complexity, resulting in the emergence of a secondary tier of players, including affiliate management agencies, super-affiliates and specialized third party vendors. Affiliate marketing overlaps with other Internet marketing methods to some degree, because affiliates often use regular advertising methods. Those methods include organic search engine optimization (SEO), paid search engine marketing (PPC - Pay Per Click), e-mail marketing, content marketing and in some sense display advertising. On the other hand, affiliates sometimes use less orthodox techniques, such as publishing reviews of products or services offered by a partner. Affiliate marketing is commonly confused with referral marketing, as both forms of marketing use third parties to drive sales to the retailer. However, both are distinct forms of marketing and the main difference between them is that affiliate marketing relies purely on financial motivations to drive sales while referral marketing relies on trust and personal relationships to drive sales.
