In a concise but comprehensive manner, it contains analysis of key types of violations that occur in Crimea. Report demonstrates and proves that mass systematic violations of human rights in Crimea cause displacement of population from the occupied territory and the Russian Federation should be brought to justice for it.

Politics and Legitimacy in Post-Soviet Eurasia Martin Brusis, Joachim Ahrens, Martin Schulze Wessel, 2016-01-26 Political legitimacy has become a scarce resource in Russia and other post-Soviet states. A Sociology of Justice in Russia Marina Kurkchiyan, Agnieszka Kubal, 2018-07-12 Much of the media coverage and academic literature on Russia suggests that the justice system is unreliable, ineffective and corrupt. But what if we look beyond the stereotypes and preconceptions? This volume features contributions from a number of scholars who studied Russia empirically and in-depth, through extensive field research, observations in courts, and interviews with judges and other legal professionals as well as lay actors. A number of tensions in the everyday experiences of justice in Russia are identified and the concept of the 'administerial model of justice' is introduced to illuminate some of the less obvious layers of Russian legal tradition including: file-driven procedure, extreme legal formalism combined with informality of the pre-trial proceedings, followed by ritualistic format of the trial. The underlying argument is that Russian justice is a much more complex system than is commonly supposed, and that it both requires and deserves a more nuanced understanding.

Power and the People Yulian Konstantinov, 2023-10-04 This book discusses state-periphery relations from the view-point of a reindeer husbandry community in the Russian Far North (Murmansk Region). The time is the current period of Putin-led Russia. The analysis is based on the premise that the mode of current top-power governance can be described as selective de-

centralization. Below a certain level of state power interests, conflicts get resolved in favour of local communities. That gains support for the supreme leadership, and reproduces a Soviet-like reality. Termed sovkhoism, the latter holds the Soviet state-farm (sovkhoz) as creating an ideal socio-economic environment. When issues are of significant interest to superior power, selection favours cavalier bypassing of people-friendly concerns. At this level, power acts in an authoritarian mode, favouring the interests of state power structures in conjunction with the upper tiers of the loyal oligarchate. It is shown how this governing mode contains significant potential for escalating centre vs. periphery tensions.

Kyrgyzstan - Regime Security and Foreign Policy Kemel Toktomushev, 2016-10-04 Kyrgyzstan is an interesting example of a relatively weak state, which for its brief period of independence has already ousted two presidents, experienced two revolutions, survived two interethnic conflicts and yet remained intact. This book explores this apparent paradox and argues that the schism between domestic and international dimensions of state and regime security is key to understanding the nature of Kyrgyz

politics. The book shows how the foreign policy links to the Manas Air Base, used by the US military and essential for supplying their forces in Afghanistan, the economic arrangements necessary for sustaining the base, both inside and outside Kyrgyzstan, and the myriad of different actors involved in all this, combined to overshadow points of friction to ensure stable continuance of the status quo. Overall, the book shows how broad geopolitical forces and complex local factors together have a huge impact on the formation of Kyrgyz foreign policy.

Regulating Judges Richard Devlin, Adam Dodek, 2016-12-30
Regulating Judges presents a novel approach to judicial studies. It goes beyond the traditional clash of judicial independence versus judicial accountability. Drawing on regulatory theory, Richard Devlin and Adam Dodek argue that judicial regulation is multi-faceted and requires us to consider the complex interplay of values, institutional norms, procedures, resources and outcomes. Inspired by this conceptual framework, the book invites scholars from 19 jurisdictions to describe and critique the regulatory regimes for a variety of countries from around the world.

Bread and Autocracy Janetta Azarieva, Yitzhak M. Brudny, Eugene Finkel, 2023-09
Food has been crucial to the functioning and survival of governments and regimes since the emergence of early states. Yet, only in a few countries is the connection between food and politics as pronounced as in Russia. Since the 1917 Revolution, virtually every significant development in Russian and Soviet history has been either directly driven by or closely associated with the question of food and access to it. In fact, food shortages played a critical role in the collapse of both the Russian Empire and the USSR. Under Putin's watch, Russia moved from heavily relying on grain imports to feed the population to being one of the world's leading food exporters. In Bread and Autocracy, Janetta Azarieva, Yitzhak M. Brudny, and Eugene Finkel focus on this crucial yet widely overlooked transformation, as well as its causes and

consequences for Russia's domestic and foreign politics. The authors argue that Russia's food independence agenda is an outcome of a deliberate, decades-long policy to better prepare the country for a confrontation with the West. Moreover, they show that for the Kremlin, nutritional self-sufficiency and domestic food production is a crucial pillar of state security and regime survival. Azarieva, Brudny, and Finkel also make the case that Russia's focus on food independence also sets the country apart from almost all modern autocracies. While many authoritarian regimes have adopted industrial import-substitution policies, in Putin's Russia it is the substitution of food imports with domestically produced crops that is crucial for regime survival. As food reemerges as a key global issue and nations increasingly turn inwards, *Bread and Autocracy* provides a timely and comprehensive look into Russia's experience in building a nutritionally autarkic dictatorship.

Modern Pagan and Native Faith Movements in Central and Eastern Europe Kaarina Aitamurto, Scott

Simpson, 2014-10-20 The resurgence of religiosity in post-communist Europe has been widely noted, but the full spectrum of religious practice in the diverse countries of Central and Eastern Europe has been effectively hidden behind the region's range of languages and cultures. This volume presents an overview of one of the most notable developments in the region, the rise of Pagan and Native Faith movements. *Modern Pagan and Native Faith Movements in Central and Eastern Europe* brings together scholars from across the region to present both systematic country overviews - of Armenia, Bulgaria, the Czech Republic, Hungary, Latvia, Lithuania, Poland, Romania, Russia, Slovenia, and Ukraine - as well as essays exploring specific themes such as racism and the internet. The volume will be of interest to scholars of new religious movements especially those looking for a more comprehensive picture of contemporary paganism beyond the English-speaking world.

Organized Crime and Corruption Across Borders T. Wing Lo, Dina Siegel, Sharon I Kwok, 2019-09-10 This book explores China's Belt and Road Initiative and the criminogenic potential for economic, financial, and socio-cultural cooperation across countries, where some are known for weak law enforcement and high levels of corruption. It examines whether these flows of capital are increasing the amount of organized crime in the newly linked regions and how law enforcement agencies are responding. Bringing together experts across the Global South and Europe, this book considers transnational organized crime and corruption across One Belt One Road (OBOR). It examines crime and corruption in China and its international United Front tactic; analyzes various forms of transnational organized crime such as trafficking of illegal drugs, looted antiquities, and wildlife and counterfeit products; and presents studies on corruption and organized crime in selected OBOR countries including Russia, Kazakhstan, Lithuania, Czech Republic, Poland, and Bangladesh. This book makes a significant contribution to the development of southern criminology and will also be of interest to those engaged with transnational organized crime, political economy, international relations, and Asian and Chinese studies.

Russia's Arctic Policy in the Twenty-First Century Maria L. Lagutina, 2019-02-07 This book deals with the current Arctic policy of Russia in its domestic and foreign dimensions in global epoch. It offers the first comprehensive examination of Russia's arctic interests, approaches, and strategy in different areas: from political issues to social policy, and main difficulties and challenges in the modern Russian Arctic.

Building an Authoritarian Polity Graeme Gill, 2015-11-12 Graeme Gill shows why post-Soviet Russia has failed to achieve the democratic outcome widely expected at the time of the fall of the Soviet Union, instead emerging as an authoritarian polity. He argues that the decisions of dominant elites have been central to the construction of an authoritarian polity, and explains how this

occurred in four areas of regime-building: the relationship with the populace, the manipulation of the electoral system, the internal structure of the regime itself, and the way the political elite has been stabilised. Instead of the common 'Yeltsin is a democrat, Putin an autocrat' paradigm, this book shows how Putin built upon the foundations that Yeltsin had laid. It offers a new framework for the study of an authoritarian political system, and is therefore relevant not just to Russia but to many other authoritarian polities.

Baker & McKenzie International Arbitration Yearbook: 2011-2012 Baker & McKenzie, 2012-03-01 This is the fifth edition of the Baker & McKenzie International Arbitration Yearbook, an annual series established by the Firm in 2007. This collection of articles is comprised of reports in key jurisdictions around the globe on arbitration. Leading lawyers of the Firm's International Arbitration Practice Group, a division of the Firm's Global Dispute Resolution Practice Group, report on recent developments in national laws relating to arbitration and address current arbitral trends and tendencies in the jurisdictions in which they practice. This Yearbook highlights the more important recent developments in international arbitration, without aspiring to be an exhaustive case reporter or a text-book to arbitration in the broad sense. This volume will prove a useful tool for those contemplating and using arbitration to resolve international business disputes.

Regulating Strikes in Essential Services Moti (Mordehai) Mironi, Monika Schlachter, 2018-11-09 Designing a fair, effective and acceptable regime that will reconcile public interest and the public's need for an uninterrupted flow of essential services on the one hand, while maintaining the freedom of collective bargaining on the other, is an ever more difficult public policy challenge. This book, the first detailed comparative analysis of existing legal and practical approaches across a spectrum of key national jurisdictions, provides a structured and insightful

overview of the law and practice of regulating strikes in essential services. As such it can be of great value for public policy debate and the enhancement of national law in the field. The editors have assembled experts from fourteen countries who describe and analyse their respective country's experience with strikes in essential services and the legislative and judicial as well as informal approaches towards regulating and intervening in such strikes. Departing from legal theory with systematic comparative 'law in action' research, the contributors offer innumerable valuable insights into a broad array of issues and topics as the following: - mechanisms aiming at compensating employees for encroaching on their collective bargaining rights; - public accountability and responsible management of public finance; - role of international conventions; - effects of globalization and advances in technology; - privatization, outsourcing and the decline of unions and workers' solidarity; - growing popular intolerance towards strikes in essential services; - effect of human rights-related court decisions; - convergence and divergence among contemporary legal regimes in defining and approaching strikes in essential services; - dispute process design and dispute resolution processes (mediation, conciliation and arbitration); and - substantive and procedural restrictions on the right to organize, bargain collectively and strike. The country reports are preceded by a detailed analysis of the inherent normative policy dilemma and a conceptual framework for designing and evaluating models of regulation. The concluding chapter presents a comparative overview of the insights gained. With its comparative perspective on one of the most sensitive areas of industrial relations and labour law, and its contextually relevant options for strategic choice and public policy debate, this incomparable volume will be welcomed by labour lawyers, legislators, policy makers, judicial bodies and researchers in the field of collective labour relations and fundamental human rights of workers on the national as well as international level.
